Advisory

Regarding Forward-Looking Statements

This presentation contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "continue", "estimate", "objective", "ongoing", "may", "will", "project", "should", "believe", "plans", "intends" and similar expressions are intended to identify forward-looking information or statements. More particularly and without limitation, this presentation contains forward looking statements and information concerning Peyto Energy Trust ("Peyto") production; reserves, resources and gas in place; undeveloped land holdings; reserve life index; product mix, business strategy; future development and growth prospects, profile targets and rates; prospects; asset base; tax pools; drilling locations and inventory, down-spacing potential; exploration risk; access to capital; future cash flow, value, debt levels and debt to cash flow; capital investment and expenditure programs and the funding thereof, anticipated cash-on-cash yield; net asset value; credit facility; and statements with respect to levels of dividends to be paid to shareholders, dividend policy, and the timing of payment of such dividends.

The forward-looking statements and information are based on certain key expectations and assumptions made by Peyto, including expectations and assumptions concerning prevailing commodity prices and exchange rates, applicable royalty rates and tax laws; future well production rates; reserve and resource volumes; the performance of existing wells; the success obtained in drilling new wells; and the sufficiency of budgeted capital expenditures in carrying out planned activities; and the availability and cost of labour and services. Although Peyto believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward looking statements and information because Peyto can give no assurance that they will prove to be correct.

Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties. Actual results could differ materially from those currently anticipated due to a number of factors and risks. These include, but are not limited to, the risks associated with the oil and gas industry in general such as operational risks in development, exploration and production; delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of reserve and resource estimates; the uncertainty of estimates and projections relating to reserves, resources, production, costs and expenses; health, safety and environmental risks; commodity price and exchange rate fluctuations; marketing and transportation; loss of markets; environmental risks; competition; incorrect assessment of the value of acquisitions; failure to realize the anticipated benefits of acquisitions; ability to access sufficient capital from internal and external sources; and changes in legislation, including but not limited to tax laws, royalties and environmental regulations.

Readers are cautioned that the foregoing list of factors is not exhaustive. Additional information on these and other factors that could affect the operations or financial results of Peyto are included in reports on file with applicable securities regulatory authorities and may be accessed through the SEDAR website (www.sedar.com). The forward-looking statements and information contained in this presentation are made as of the date hereof and Peyto undertakes no obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws.

The information contained in this presentation does not purport to be all-inclusive or to contain all information that a prospective investor may require. Prospective investors are encouraged to conduct their own analyses and reviews of Peyto and of the information contained in this presentation. Without limitation, prospective investors should consider the advice of their financial, legal, accounting tax and other advisors and such other factors that they consider appropriate in investigating and analyzing Peyto.

Reserves

The recovery and reserve estimates of Peyto's crude oil, natural gas liquids and natural gas reserves provided in the presentation are estimates only and there is no guarantee that the estimated reserves will be recovered. Actual crude oil, natural gas liquids and natural gas reserves may be greater than or less than the estimates provided herein. Reserve and production volumes are quoted before royalty deductions.

Barrels of Oil Equivalent

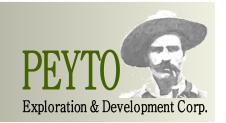

"Boe" means barrel of oil equivalent on the basis of 1 boe to 6,000 cubic feet of natural gas. Boe's may be misleading, particularly if used in isolation. A boe conversion ratio of 1 boe for 6,000 cubic feet of natural gas is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

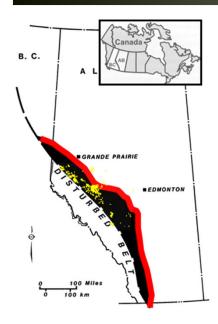

Original Gas in Place

Original gas in place includes both discovered and undiscovered resources, and there is no certainty that any portion of the undiscovered resources will be discovered and, if discovered, that any volumes will be economically viable or technically feasible to recover or produce. Original gas in place also includes volumes that have already been produced from such accumulations. Readers should not unduly rely upon estimates of original gas in place in terms of assessing the combined company's reserves or recoverable resources.

Prices

PEY.TO Who We Are

- * Pure Play Alberta Deep Basin ~405 mmcf/d Gas, 11,000 bbl/d NGLs
- * Returns Focused Strategy Avg ROCE 15%, ROE 28% over last 21 yrs, among highest in the industry
- **X** Long Reserve Life Asset YE 2019: 9 yrs PDP, 29 yrs 2P, sweet gas, no mobile water risk
- * Lowest Cost Producer \$0.95/mcfe (\$5.69/boe) 2019 total cash costs*
- * Own and Control Operate 99% of production, Own/operate 9 gas plants with 850 mmcf/d processing capacity

Quarterly Dividend: \$0.01/share (CTD YE19 \$19.25/share)

Shares O/S: 164.9 million (3% insider ownership)

Q2/20 Net Debt: \$415 million (senior secured notes, 3.7-4.9%CND)

\$758 million (\$0.95B secured bank facility)

\$1.173B (\$1.365B total capacity)

Enterprise Value: \$1.7 billion (\$3.00/share)

Full Time Employees: 51

*Cash costs are royalties, operating costs, transportation, G&A and interest BOE factor - 6 mcf = 1 bbl of oil equivalent

PEY.TO

COVID19 Preparedness

1. Office Preparations

- All staff set up with remote desktop working capabilities (multiple communication tools: email, text, phone, conference, Webex, etc)
- Small, tight knit office staff with 51 full time employees, 12 consultants
- Flat organizational structure, self motivated, senior staff
- Tested protocols during 2013 Calgary floods

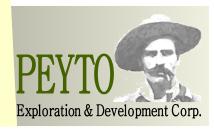

2. Field Preparations

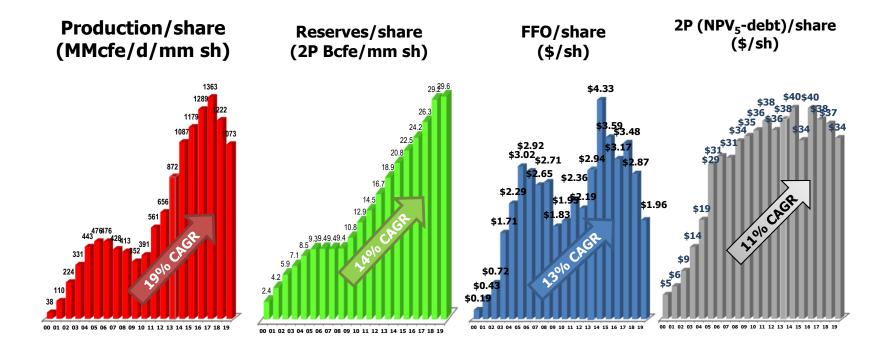

- Already prepared for supply chain disruption with stockpiled materials (methanol, lube oil, glycol, air filters, spark plugs, etc.)
- Part of Energy Mutual Aid Co-Operative (EMAC) for last 10 yrs. O&G operators, local & prov. govt agencies, mutual aid during emergency situations, multiple ERPs in place, field "community" works together
- Full remote control and monitoring capability with SCADA, IT and Automation systems
- Operator Working Alone Policy well established and in place for many years

PEY.TO

20 Year Growth Per Share

"Over time, the Peyto model is designed to deliver a superior total return with growth in value, income and assets."

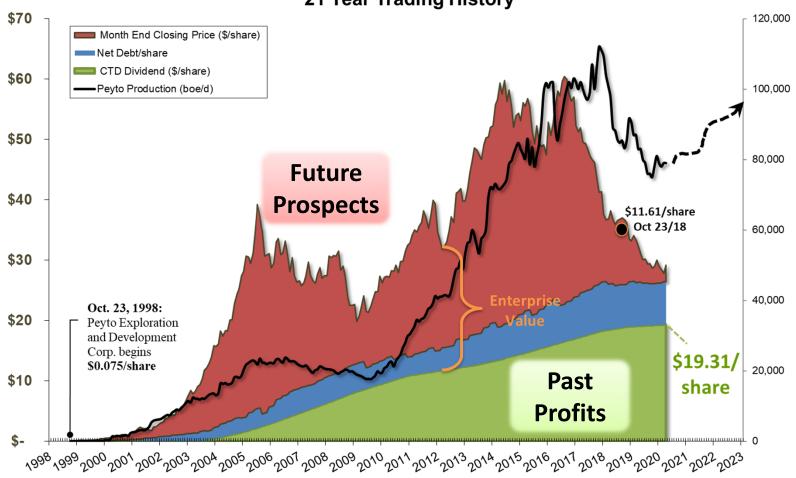

PEY.TO

Total Shareholder Return Model

"Our track record of success is defined by our past profits. Our plan is to continue this trend, despite how the market currently values our future prospects."

Peyto Exploration and Development Corp. 21 Year Trading History

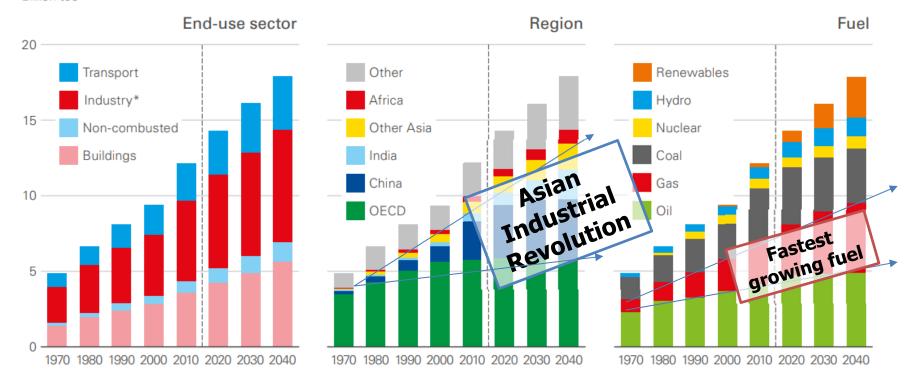

They Want More Energy – We Won't Change That

"Nothing Canada does can change the demand for energy. We can, however, be part of the solution when it comes to responsible supply."

Primary energy demand

Billion toe

^{*}Industry excludes non-combusted use of fuels

7

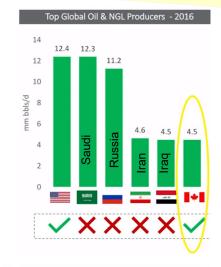

Source: BP Energy Outlook 2019 9/1/2020

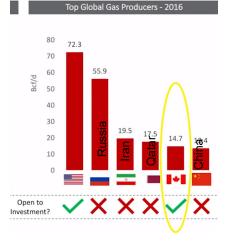

The World Needs More Canadian Energy

"Canada is the logical supplier of choice for the world's energy needs. But we will have to fight for market share and the right to provide that energy to the world."

- ✓ Environmental Regulations
- ✓ Worker Safety
- ✓ Human Rights
- ✓ Ethical Standards
- ✓ Gender Equality
- ✓ Indigenous Consultation

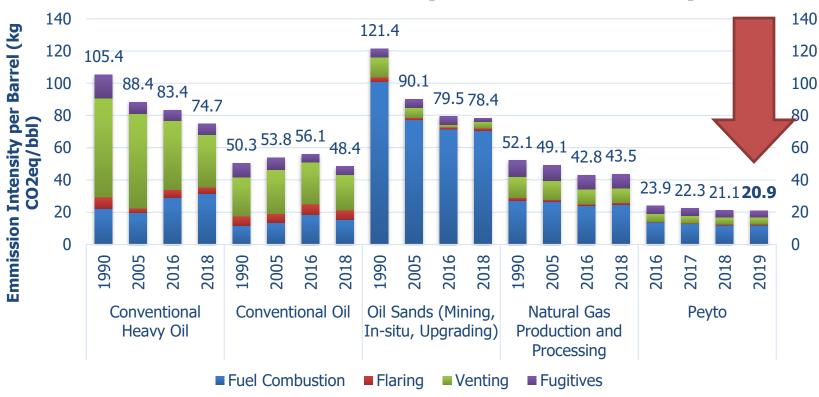

Continuously Improving – Peyto Leading the Way

"Peyto provides energy for the world for far less environmental impact than even the rest of the Canadian Energy Industry."

Emission Intensity by Source Type for Canadian Oil and Gas (1990, 2005, 2016)

Notes:

Intensities are based on total subsector emissions and relevant production amounts. They represent overall averages, not facility intensities.

*Calculated on a barrel of oil equivalent (boe) basis by converting production volumes to energy basis and then dividing by energy content of light crude oil. 1 barrel (bbl) = 0.159 m3

Production data from Statistics Canada 1991-2017 and AER (2017)

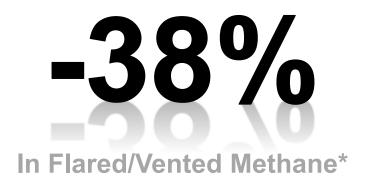

^{*}Original chart can be found at: https://www.canada.ca/content/dam/eccc/documents/pdf/climate-change/emissions-inventories-reporting/nir-executive-summary/National%20Inventory%20Report%20Executive%20Summary%202018.pdf

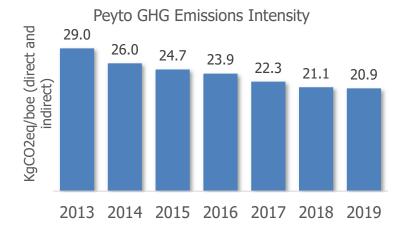

Continuously Improving Environmental Performance

"We are continuously improving our environmental performance, lowering emissions every year!"

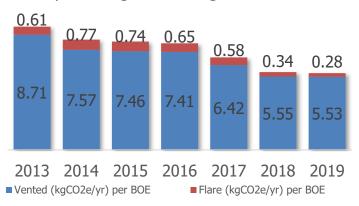

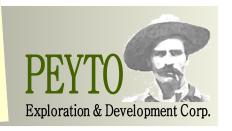

Peyto Flaring and Venting of Methane

*Peyto strives to maintain an accurate GHG emissions inventory from its operations. As such, we go above and beyond currently mandated quantification requirements of vented methane emissions. This proactive approach will facilitate us in mitigating variations in our GHG inventory when the AER implements updated D60 and D17 regulations. For comparative purposes, Peyto's total emissions and emissions intensity will be greater than other industry participants who are currently only reporting mandated quantification requirements. Historical emissions may change in future publications as new data becomes available and our greenhouse gas inventory is refined.

The Big Picture So What Does All This Mean?

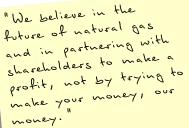

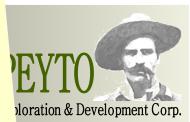

- ✓ Canada has energy abundance.
- ✓ Canada has a moral obligation to provide the rest of the world with our clean, responsibly developed energy to improve lives and preserve the environment.
- ✓ Peyto can continue to be an industry leader by providing this energy more efficiently.

Peyto's Strategy What We Continue To Believe

- * "Nature's gas is the fuel for the future."
- * "Our gas and NGLs have some of the lowest emissions of any hydrocarbons produced in Canada."
- * "Our business focus is to maximize the return on invested capital your capital."
- * "By maintaining low cash costs over the entire production life it ensures returns are maximized regardless of commodity price volatility."

Peyto's Strategy

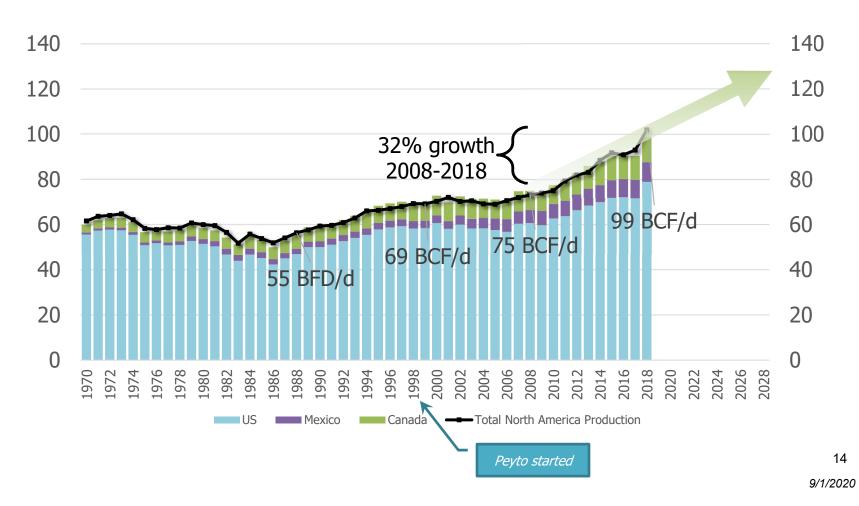

Growing North American Gas Market

"It is likely, over the next decade, North American natural gas consumption will be up another 30 BCF/d.

That's another Marcellus or two Canadas!"

North America Gas Consumption (BCF/d)

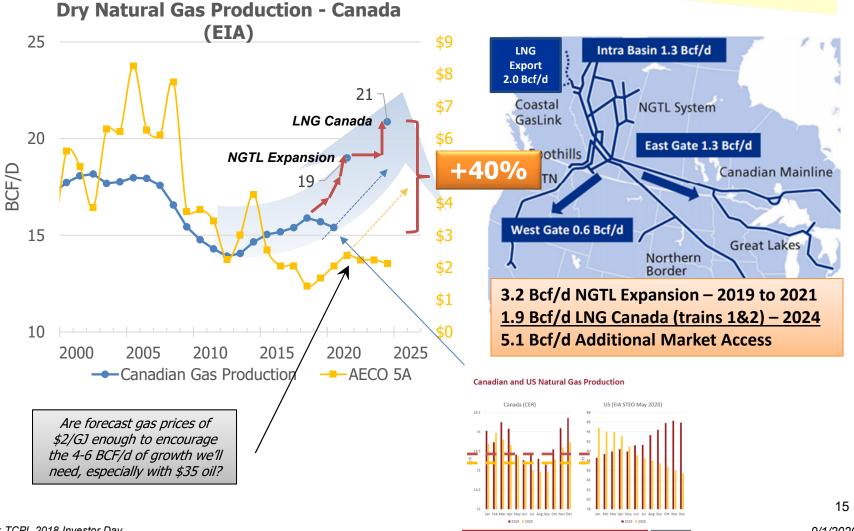

(BP Statistical Review of World Energy 2019)

Peyto's Strategy

Canadian Gas Egress Is Expanding

"Canada's has already begun to play its part in supplying that growing consumption with infrastructure expansion but no volumes yet."

Fund Growth From Cashflow

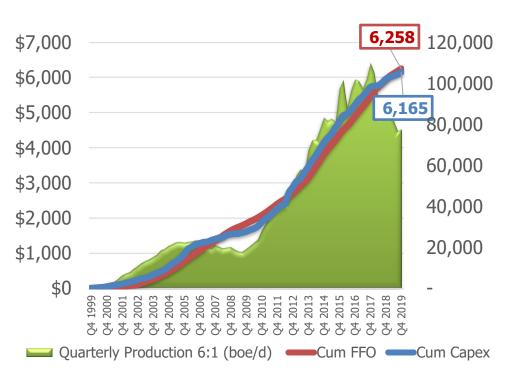

"Over the last 20 yrs, Peyto has invested \$6.2 billion in capital to fund organic resource development that has produced \$6.3 billion in funds from operations."

Peyto Capital CTD Q4/19

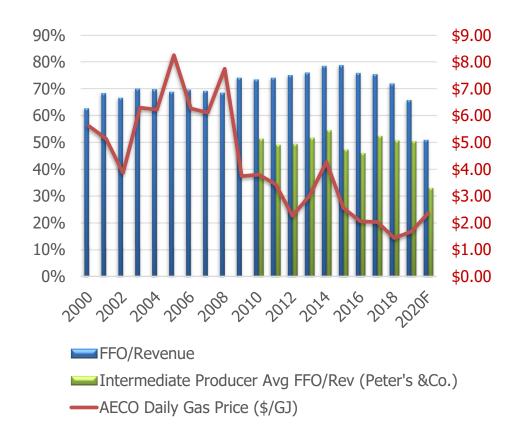

High Operating Margins

"Over the last 10 yrs Peyto has delivered an average operating margin of 74% compared to our peers at 50%."

72%

Peyto Operating Margin 20 Year Avg.

Invest For Profit Not Growth

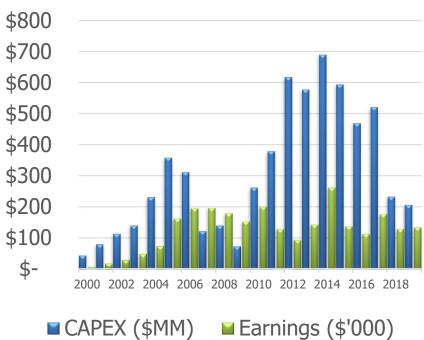

"Peyto's track record of generating \$0.40 of earnings for every dollar of capital invested is one of the highest in the industry.

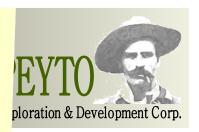

Peyto Capital CTD Q4/19

Future Market Diversification and Gas Price Protection

"Peyto has used financial basis deals between AECO and other hubs to gain market diversification and allow us to hedge at various markets. Basis deals have very little physical deliver risk and are shorter term than many pipe contracts."

Fixed Price Swaps For Gas and Liquids

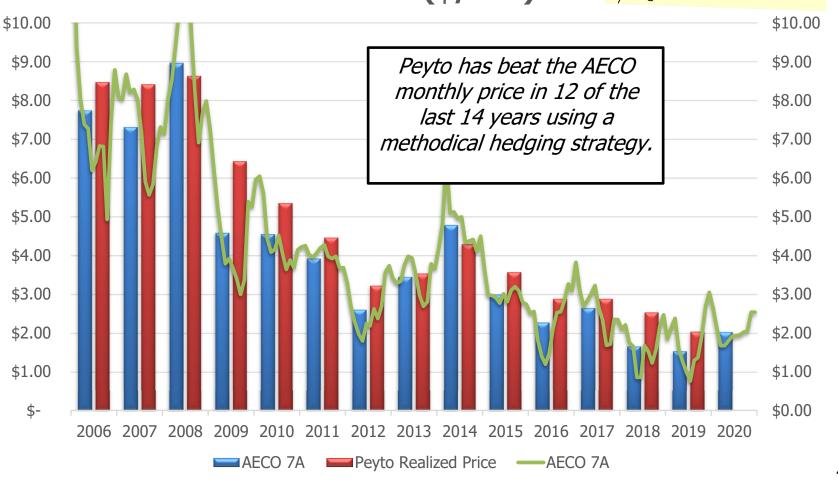

"Peyto uses a dollar cost averaging approach to smooth out the volatility in future prices by forward selling small blocks of production every give price certainty."

Successful Hedging Strategy Smoothes Volatility

"The "dollar cost averaging" approach to our forward sales is to smooth out the volatility and avoid speculation. We ITP. target a progressive stepping—down schedule of coverage over the next 3 years."

Gas Price (\$/mcf)

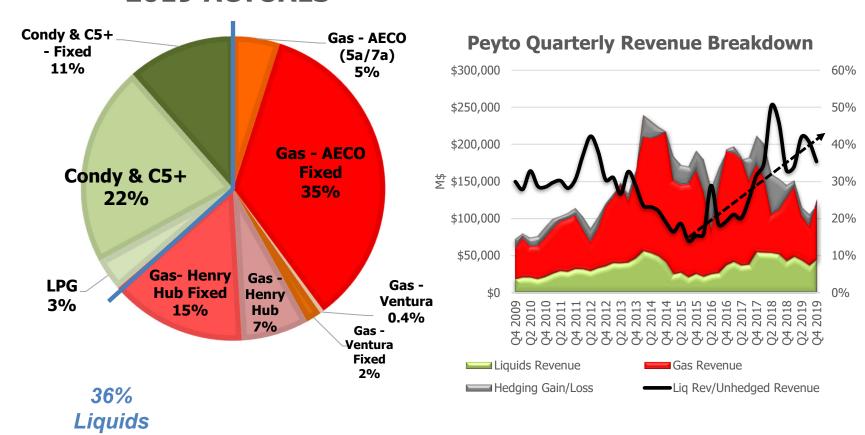

Balanced Revenue Stream

"As we transition to more Cardium production our revenue stream becomes more balanced between gas and liquids."

¹ Management uses funds from operations to analyze operating performance. In order to facilitate comparative analysis funds from operations is defined throughout this report as earnings before performance based compensation, non-cash and non-recurring expenses. As presented, funds from operations does not have any standardized meaning prescribed by Canadian GAAP.

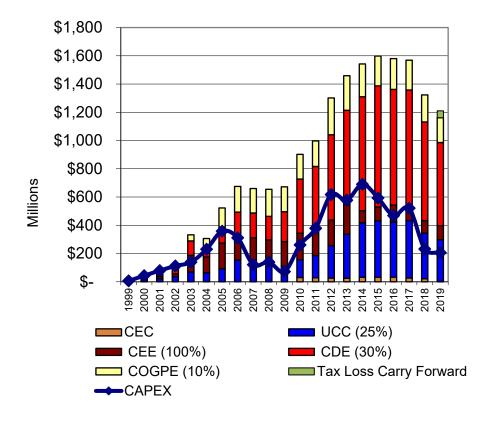

² Net debt does not include provision for future performance based compensation, site restoration, abandonment and income taxes.

Organic Business Model

Peyto's Tax Pools
