

Advisory

Regarding Forward-Looking Statements

This presentation presents certain non-GAAP measures to assist readers in understanding the Company's performance. These measures do not have any standardized meaning and therefore are unlikely to be comparable to similar measures presented by other issuers and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. Management uses these non-GAAP measures to analyze and evaluate operating performance. Non-GAAP financial measures presented and discussed in this presentation are "Funds flow from operations" and "Net Debt". For further information on such Non-GAAP measures, including a description of how Peyto calculates such measures, their most applicable directly comparable GAAP measure and a reconciliation of each Non-GAAP measure to its most directly comparable GAAP measure, please see Peyto's management's discussion and analysis available on www.sedar.com in respect of its year ended December 31, 2020, and three and nine months ended Sept 30, 2021.

This presentation also contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "continue", "estimate", "objective", "ongoing", "may", "will", "project", "should", "believe", "plans", "intends" and similar expressions are intended to identify forward-looking information or statements. More particularly and without limitation, this presentation contains forward looking statements and information concerning Peyto Energy Trust ("Peyto") production; reserves, resources and gas in place; undeveloped land holdings; reserve life index; product mix; business strategy; future development and growth prospects, profile targets and rates; prospects; asset base; tax pools; drilling locations and inventory, down-spacing potential; exploration risk; access to capital; future cash flow, value, debt levels and debt to cash flow; capital investment and expenditure programs and the funding thereof; anticipated cash-on-cash yield; net asset value; credit facility; and statements with respect to levels of dividends to be paid to shareholders, dividend policy, and the timing of payment of such dividends.

The forward-looking statements and information are based on certain key expectations and assumptions made by Peyto, including expectations and assumptions concerning prevailing commodity prices and exchange rates, applicable royalty rates and tax laws; future well production rates; reserve and resource volumes; the performance of existing wells; the success obtained in drilling new wells; and the sufficiency of budgeted capital expenditures in carrying out planned activities; and the availability and cost of labour and services. Although Peyto believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward-looking statements and information because Peyto can give no assurance that they will prove to be correct.

Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties. Actual results could differ materially from those currently anticipated due to a number of factors and risks. These include, but are not limited to, the risks associated with the oil and gas industry in general such as operational risks in development, exploration and production; delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of reserve and resource estimates; the uncertainty of estimates and projections relating to reserves, resources, production, costs and expenses; health, safety and environmental risks; commodity price and exchange rate fluctuations; marketing and transportation; loss of markets; environmental risks; competition; incorrect assessment of the value of acquisitions; failure to realize the anticipated benefits of acquisitions; ability to access sufficient capital from internal and external sources; and changes in legislation, including but not limited to tax laws, royalties and environmental regulations.

Readers are cautioned that the foregoing list of factors is not exhaustive. Additional information on these and other factors that could affect the operations or financial results of Peyto are included in reports on file with applicable securities regulatory authorities and may be accessed through the SEDAR website (www.sedar.com). The forward-looking statements and information contained in this presentation are made as of the date hereof and Peyto undertakes no obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws.

The information contained in this presentation does not purport to be all-inclusive or to contain all information that a prospective investor may require. Prospective investors are encouraged to conduct their own analyses and reviews of Peyto and of the information contained in this presentation. Without limitation, prospective investors should consider the advice of their financial, legal, accounting, tax and other advisors and such other factors that they consider appropriate in investigating and analyzing Peyto.

Reserves

The recovery and reserve estimates of Peyto's crude oil, natural gas liquids and natural gas reserves provided in the presentation are estimates only and there is no guarantee that the estimated reserves will be recovered. Actual crude oil, natural gas liquids and natural gas reserves may be greater than or less than the estimates provided herein. Reserve and production volumes are quoted before royalty deductions.

Barrels of Oil Equivalent

"Boe" means barrel of oil equivalent on the basis of 1 boe to 6,000 cubic feet of natural gas. Boe's may be misleading, particularly if used in isolation. A boe conversion ratio of 1 boe for 6,000 cubic feet of natural gas is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

Original Gas in Place

Original gas in place includes both discovered and undiscovered resources, and there is no certainty that any portion of the undiscovered resources will be discovered and, if discovered, that any volumes will be economically viable or technically feasible to recover or produce. Original gas in place also includes volumes that have already been produced from such accumulations. Readers should not unduly rely upon estimates of original gas in place in terms of assessing the combined company's reserves or recoverable resources.

Prices

All dollar values are quoted in Canadian currency.

New To Peyto?

Who We Are

- ☀️ 5th Largest Canadian Gas Producer > 620 MMcfe/d
- ☀️ 11th Largest Canadian Gas Processor 875 MMcf/d capacity
- ☀️ Pure Play Alberta Deep Basin *Multizone stacked resource, 5.4 TCFe 2P reserves*
- ☀️ Long Reserve Life Asset *9yr PDP, 25yr 2P, sweet gas, no mobile water risk*
- ☀️ Returns Focused Strategy *Avg ROCE 15%, ROE 26% over last 22yrs*
- ☀️ Lowest Cost Producer *\$1.01/mcfe (\$6.09/boe) 2020 total cash costs**
- ☀️ Own and Control *Operate 99% of production, Own/operate 10 gas plants*

2022	\$ 4.04	\$ 74.70
2023	\$ 3.33	\$ 67.96
2024	\$ 3.11	\$ 63.20

Includes a capital provision of \$800k/well to account for full cycle costs.

IRR for entire capital program in 2021 including Cecilia producing assets is 96%

Peyto's Returns

High Returns On Your Capital And Equity

"Investors rarely get to participate in the wells themselves, making type well economics somewhat meaningless. ROE and ROCE are the returns investors get, after deducting corporate costs."

26%

22 yr Avg ROE to 2020

15%

22 yr Avg ROCE to 2020

Return on Equity (ROE) is earnings for the period divided by average shareholders equity – reveals how much profit a company generates with the money shareholders have invested (22 yrs 1999-2020)

Return on Capital Employed (ROCE) is earnings before interest and tax for the period divided by total assets less current liabilities - indicates the efficiency and profitability of a company's capital investments

Peyto's Future

Peyto's Future

2022 Outlook

"2022 plans are for a repeat of 2021. Peyto will look to offset inflation with continually stronger well results."

\$350M-
\$400M

2022 Capital Program

- ✓ **Drill ~90Hz Wells**
(Liquids Rich Natural Gas) vs 91 in 2021
- ✓ **Expand Infrastructure**
New Chambers Gas Plant (prepaid equipment)
- ✓ **Increase Opportunities**
Expand Undeveloped Land Base
- ✓ **Diversify Markets**
Continue to Evaluate New Pipe/Basis Options
- ✓ **Improve Balance Sheet**
Fund capital program/dividend from free cashflow, materially reduce revolving debt

Peyto's Future

Gas Price Stability Before Returning to Growth

"The outlook for production and capital is very fluid, contingent on the futures curve for AECO/NYMEX gas prices which are changing rapidly. Peyto is nimble and can respond quickly with ramped up drilling or production shut-ins/deferrals."

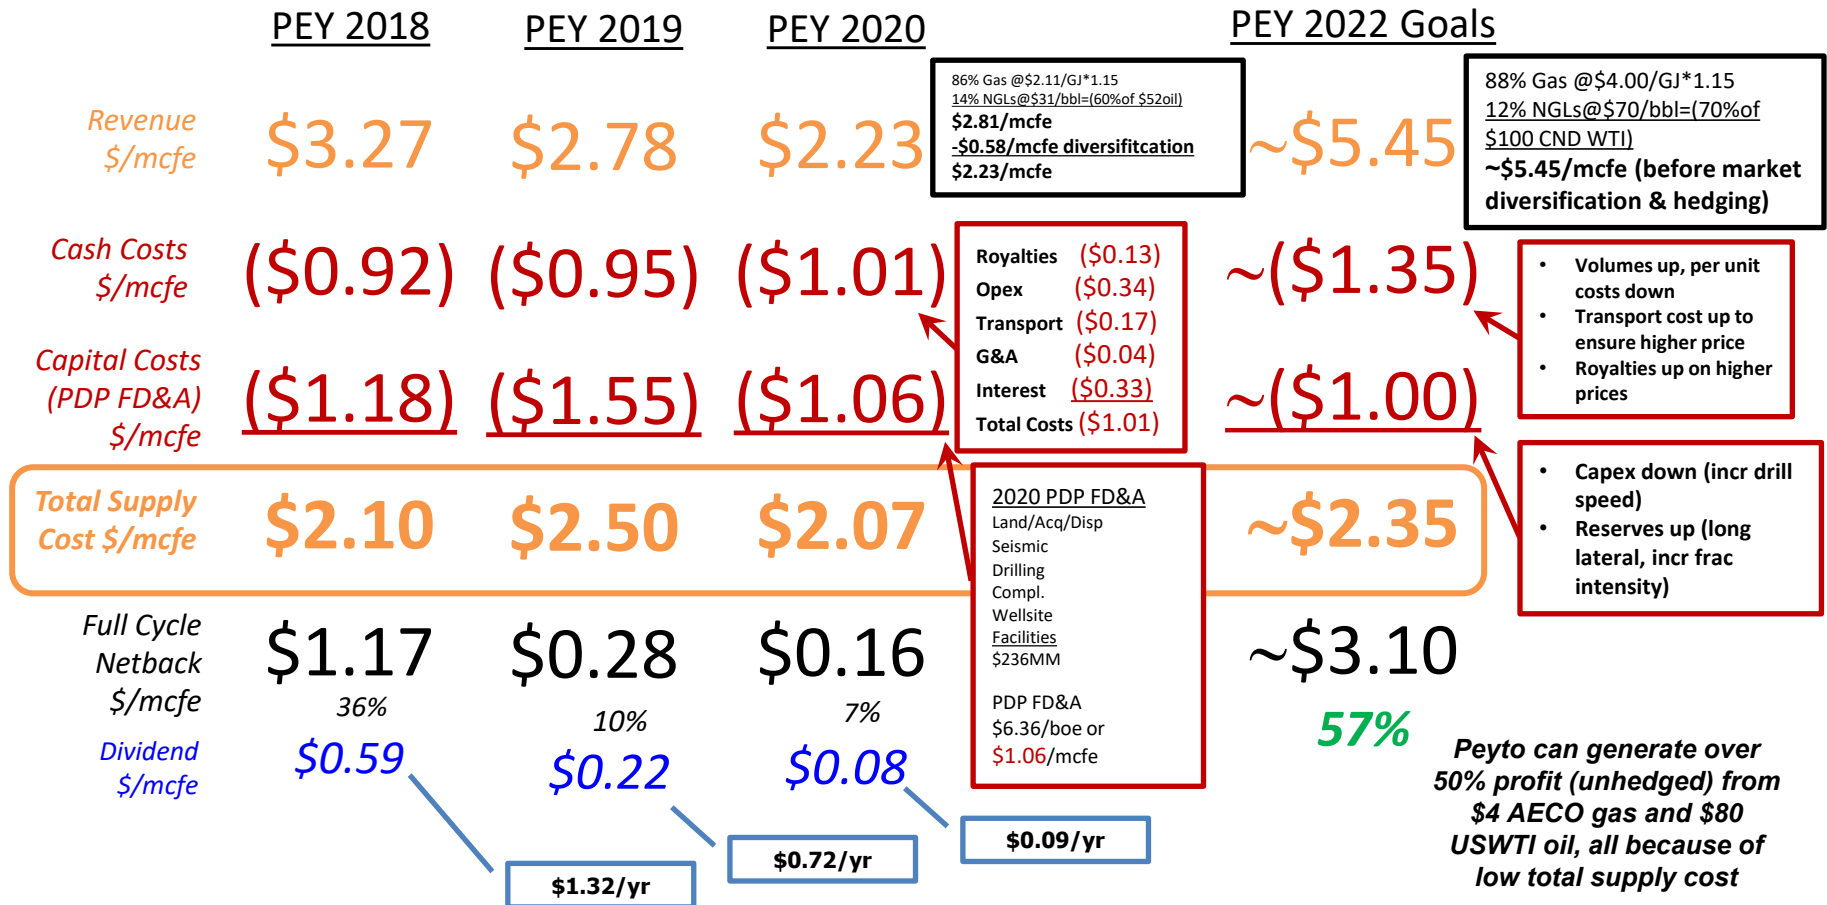

Holding investment flat at \$350MM/yr could drive a measured 7-10% production growth rate, while generating substantial free cashflow

* 2022 and beyond provided for illustration only. Budgets and forecasts are subject to change due to a variety of factors including but not limited to prior year's results. FFO – Funds from Operations, see definition in Financial Reports. Future illustration derived from historical well performance and cost assumptions.

Peyto's Future

Lower Costs to Preserve Profit

"We must drive down our costs further to protect against a prolonged low gas price. There are no guarantees it will ever go higher. Hope is not a strategy, but cost control is."

Peyto can generate over 50% profit (unhedged) from \$4 AECO gas and \$80 USWTI oil, all because of low total supply cost

Peyto's Future

Balance Sheet Priority

"We spent the last few years getting our cashflow back up, now it's time to get our debt down. Q4 will hopefully be record cashflow for us."

* 2022 and beyond provided for illustration only using Oct 29, 2021 strip prices and \$350MM flat capital investment as illustrated in slide 47. Budgets and forecasts are subject to change due to a variety of factors including but not limited to prior year's results. FFO – Funds from Operations, see definition in Financial Reports. Future illustration derived from historical well performance and cost assumptions.

Peyto's Future

Back to Strong Earnings and Dividends

"Peyto has an incredible track record of earnings and dividends. 2020 was our only blemish. 2022 will hopefully be a record year for us."

Peyto Earnings per share

* 2021 and beyond provided for illustration only using Oct 29, 2021 strip prices, \$350MM flat capital investment as illustrated in slide 45 and current dividend level. Budgets and forecasts are subject to change due to a variety of factors including but not limited to prior year's results. FFO – Funds from Operations, see definition in Financial Reports. Future illustration derived from historical well performance and cost assumptions.

Peyto's Future

Blue Hydrogen? We Have All the Right Ingredients

"If Hydrogen is the fuel of the future, then Peyto is perfectly positioned to develop it."

>4 TCF of 2P natural gas reserves

Interconnected gas pipeline and facility infrastructure

Big Sunny underground storage cavern for CO₂

Rail, Hwy, and ultimately pipeline for hydrogen transport

= H₂

Gas Marketing

Future Market Diversification and Gas Price Protection

"Peyto has used financial basis deals between AECO and other hubs to gain market diversification and allow us to hedge at various markets. Basis deals have very little physical deliver risk and are shorter term than many pipe contracts."

Gas Position Chart 3-5 yr diversification program

Our plan is to fill this up with Midwest US /Eastern CND exposure and more direct connect industrial

*Average Heating Value of approximately 1.15 GJ/mcf for Peyto's gas

Gas Marketing

Fixed Price Swaps For Gas and Liquids

"Peyto uses a dollar cost averaging approach to smooth out the volatility in future prices by forward selling small blocks of production every week. Fixed price swaps give price certainty."

1.15 Heating Value GJ/mcf
1.255 cad/usc
