

New To Peyto?

Who We Are

PEYTO

Exploration & Development Corp.

- ☀️ 5th Largest Canadian Gas Producer ~ 635 MMcfe/d
- ☀️ 10th Largest Canadian Gas Processor 970 MMcf/d capacity
- ☀️ Pure Play Alberta Deep Basin *Multizone stacked resource, 5.4 TCFe 2P reserves*
- ☀️ Long Reserve Life Asset *9yr PDP, 25yr 2P, sweet gas, no mobile water risk*
- ☀️ Returns Focused Strategy *Avg ROCE 14%, ROE 26% over last 23yrs*
- ☀️ Lowest Cost Producer *\$1.25/mcfe (\$7.49/boe) 2021 total cash costs**
- ☀️ Own and Control *Operate 99% of production, Own/operate 12 gas plants*

Monthly Dividend:	\$0.05/share (Increasing to \$0.11/share in Jan 2023)
Shares O/S:	172 million (4% insider ownership)
Q3/22 Net Debt:	\$415 million (senior secured notes, 3.7-4.9% CND) \$555 million (\$0.8B secured bank facility) \$970MM (\$1.365B total capacity)
Enterprise Value:	\$3.0 billion (\$12.00/share)
Full Time Employees:	56

*Cash costs are royalties, operating costs, transportation, G&A and interest
Reserve Life based on Q4 2021 production rate of 98,400 boe/d
BOE factor – 6 mcf = 1 bbl of oil equivalent

PEY.TO

Continuously Improving Emissions

"We are continuously improving our environmental performance, lowering emissions every year!"

Corp.

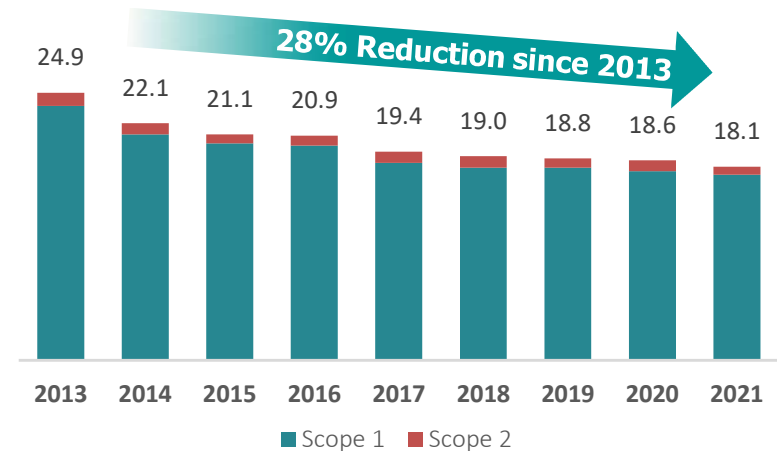

-28%

in GHG Emissions Intensity*

-59%

In Flared/Vented Methane*

Peyto Emissions Intensity

Peyto Flared/Methane Emissions Intensity

*Peyto strives to maintain an accurate GHG emissions inventory from its operations. As such, we go above and beyond currently mandated quantification requirements of vented methane emissions. This proactive approach will facilitate us in mitigating variations in our GHG inventory when the AER implements updated D60 and D17 regulations. For comparative purposes, Peyto's total emissions and emissions intensity will be greater than other industry participants who are currently only reporting mandated quantification requirements. Historical emissions may change in future publications as new data becomes available and our greenhouse gas inventory is refined.

Non-GAAP measures and ratios do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to the section entitled "Non-GAAP and Other Financial Measures" and "Non-GAAP and Other Financial Ratios" contained within the fourth quarter 2021 MD&A for an explanation of composition.

Responsible Land and Water Use

"Peyto has always strived to limit water and land use to minimize its environmental footprint and save costs"

Corp.

Land Use Reduction
Cumulative Hectares/Well

Water Injected per BOE¹
by Operator, 2021

Peyto's high quality Deep Basin Cretaceous reservoirs require less water for fracturing and smaller leases for fracturing operations than the Montney or Duvernay plays.

¹Water pumped during fracturing operations in 2021 divided by total production (converted at 6mcf:1 boe) from only wells with a minimum of 6 months (4400 hours) history. All operators in the Deep Basin area of Alberta have been included but only the lowest 10 water intensity producers are shown for comparison: ARC Resources, Canadian Natural Resources, Nuvista Energy, Ovintiv, Paramount Resources, Spartan Delta, Tourmaline Oil, and Whitecap Resources.

Peyto's Assets

Brazeau PrivateCo and Area Growth

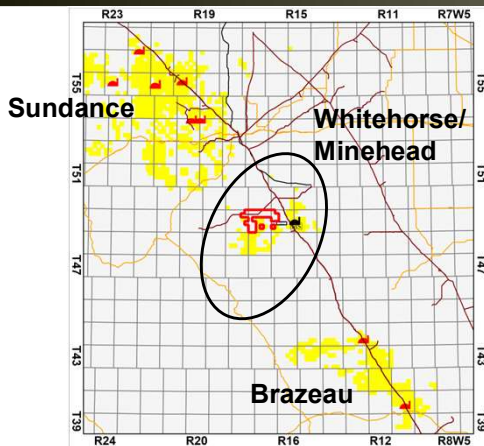

"Peyto continues to bolt on properties in 2022 and expand the Brazeau area infrastructure."

Peyto's Assets

Whitehorse/Minehead ERHs

"Peyto will apply the latest ERH well design to the development of the Whitehorse area with plans to construct a new 50 mmcf/d plant in 2023 using equipment in inventory"

Timeline:

- 2017/18: Drilled ten, 1-mile horizontals
- 2021/22: Successfully tested three extended reach horizontals to improve the economics of the play. Acquired 22 sections at land sale to bring total ERH WLRC location count to 110 gross with additional upside in other stacked targets expected – similar to development in other PEY core areas with the deeper Wilrich anchoring the development
- 2022: Entered into a farm-in agreement adding 30 sections (in this area) and 50 ERH Wilrich locations
- Fall Winter 2022/23: Additional delineation wells planned, commence drilling farm-in locations
- 2023: Construct new Whitehorse plant using re-purposed equipment for 50mmcf/d capacity

Economics on Strip:

Gas: 4.0 bcf sales
 NGLs: 88 MMBL (22 bbls/mm)
 EUR: 763 MBOE, IP12: 2,200 mcf/d

Unique Infrastructure Location

"Peyto's Greater Sundance Area plant/gathering/resource sits on Nova, on a divided highway, on rail, and on the 3 phase power grid making it perfectly situated for Petchem and power generation infrastructure investments."

Greater Sundance Area Location Advantages:

- Nova/Alliance Supply Backstop
- CN Rail (export)
- Paved Highway (export)
- Athabasca River (water supply)
- 3-Phase Power Lines (generation)

Attractive For:

- Petrochemical Production
- Propane Fractionation/Export
- Power Generation

Cascade Power Project ISD mid-2023

- 900 MW Combined-Cycle Power plant
- 120,000 GJ/d consumption
- Peyto direct connected
- Will have the capability to provide 100% of fuel

Whitehorse (proposed)

Peyto's Returns

High Returns On Your Capital And Equity

"Investors rarely get to participate in the wells themselves, making type well economics somewhat meaningless. ROE and ROCE are the returns investors get, after deducting corporate costs."

26%

23 yr Avg ROE to 2021

14%

23 yr Avg ROCE to 2021

Return on Equity (ROE) is earnings for the period divided by average shareholders equity – reveals how much profit a company generates with the money shareholders have invested (23 yrs 1999-2021)

Return on Capital Employed (ROCE) is earnings before interest and tax for the period divided by total assets less current liabilities - indicates the efficiency and profitability of a company's capital investments

ROE and ROCE are non-GAAP financial ratios. Refer to the heading entitled "Non-GAAP and Other Financial Measures" contained within the "Advisories" section of this presentation for further information.

Gas Marketing

Rising Gas Prices?

"Is North America now back to a demand driven market where the future curve is in backwardation and spot prices rise?"

Non-GAAP measures and ratios do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to the section entitled "Non-GAAP and Other Financial Measures" and "Non-GAAP and Other Financial Ratios" contained within the fourth quarter 2021 MD&A for an explanation of composition.

Gas Marketing

The Future of Gas Prices

"What will the future natural gas price be? No one really knows, which is why we focus on costs, because that is something we can control."

Corp.

Relative North American Gas Prices (Nov 7, 2022)

*Source for future strip is TD

Non-GAAP measures and ratios do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to the section entitled "Non-GAAP and Other Financial Measures" and "Non-GAAP and Other Financial Ratios" contained within the fourth quarter 2021 MD&A for an explanation of composition.

Gas Marketing

Future Market Diversification and Gas Price Protection

"Peyto has used financial basis deals between AECO and other hubs to gain market diversification and allow us to hedge at various markets. Basis deals have very little physical deliver risk and are shorter term than many pipe contracts."

\$3.12 \$3.74 \$4.09 \$3.84 \$3.84 \$4.89 \$5.23 \$4.92 \$4.93 \$4.90 \$4.99 \$4.82 \$4.83 \$4.84 \$4.88 \$4.87 \$4.88 \$4.83

Example: Peyto realized gas price (\$/GJ) at \$US5.00/MMBtu Henry Hub, \$4.00/GJ AECO, \$120/MWh, 1.35 CAD/USD :

Our plan is to fill this up with Midwest US /Eastern CND exposure and more direct connect industrial

Or fixed price AECO

*Average Heating Value of approximately 1.15 GJ/mcf for Peyto's gas

- Average fixed price volumes include all fixed price financial and physical contracts, fuel deduction of ~2% and all market diversification costs. Q3 2022 USD contracts are converted at ~1.31 CAD/USD. All other USD contracts are converted at ~1.36 CAD/USD
- Emerson 2 volumes are priced on the Emerson 2 index less fuel of ~5%. Peyto incurs a diversification cost of ~ \$0.48/GJ to get to Emerson 2 from Empress, which is decreasing to ~\$0.40/GJ in 2023.
- Henry Hub, Malin, and Dawn volumes are sold using financial basis deals from AECO and Empress and are priced on the respective indexes less the hub basis shown above and fuel of ~ 2%
- Ventura volumes are priced on the Ventura index less transportation, marketing and fuel for total deductions of ~ \$US1.14/MMBtu
- Cascade Power pricing is a floating price that fluctuates with Alberta pool power prices
- Empress service allows Peyto to diversify from the AECO market for future basis deals and physical contracts. Peyto incurs transportation costs of ~ \$0.19/GJ to get to Empress

Non-GAAP measures and ratios do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to the section entitled "Non-GAAP and Other Financial Measures" and "Non-GAAP and Other Financial Ratios" contained within the fourth quarter 2021 MD&A for an explanation of composition.

Gas Marketing

Rising Realized Gas Price and Rising Production

"Peyto's rising realized price (despite future backwardation) and growing production are expected to result in rising cashflows, rising earnings and falling debt."

*Using Futures price strip at Nov 7, 2022

Non-GAAP measures and ratios do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Gas Marketing

Successful Hedging Strategy Smooths Volatility

"The "dollar cost averaging" approach to our forward sales is to smooth out the volatility and avoid speculation. We target a progressive stepping-down schedule of coverage over the next 3 years."

Gas Price (\$/mcf)

Non-GAAP measures and ratios do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to the section entitled "Non-GAAP and Other Financial Measures" and "Non-GAAP and Other Financial Ratios" contained within the fourth quarter 2021 MD&A for an explanation of composition.

Gas Marketing

Rockies LNG Partnership – West Coast LNG Option

"As a participant in Rockies LNG, Peyto looks to gain exposure to west coast BC LNG exports. We have long reserve life natural gas assets that align with long term contracts."

Rockies LNG Partners

Rockies LNG is a partnership of Canadian natural gas producers working together to advance West Coast LNG opportunities.

Together we produce approximately 3 billion cubic feet per day of natural gas, representing 20% of Canada's natural gas production.

We hold 26 TCF of proven and probable (2P) natural gas reserves in the Western Canadian Sedimentary Basin, which provides decades of future growth to serve local and international markets via LNG exports.

LNG Project

Rockies is collaborating with the Nisga'a Nation and Western LNG to develop an LNG export opportunity on the west coast of British Columbia.

Ksi Lisims LNG represents a unique partnership between the Nisga'a Nation, a modern treaty Nation in British Columbia, Western LNG, an experienced LNG developer, and Rockies LNG, a partnership of Canadian natural gas producers.

Ksi Lisims LNG offers an extraordinary economic and social opportunity for Canadians and will help in the global fight against climate change. The project will provide an opportunity for Rockies' producers to access growing markets for natural gas, bringing reliable, safe, clean energy to customers in Asia.

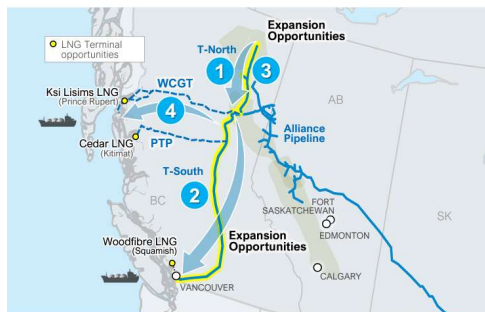

KSI LISIMS LNG

ROCKIES LNG Partners

LNG Exports: B.C. Pipeline Expansion

- 1) T-North Expansion (~\$1.0B) New**
 - Serves production and demand growth
 - ~400 MMcf/d expansion (2026)
 - Open season underway
- 2) T-South Expansion (~\$2.5B+)**
 - Serves Pacific Northwest demand
 - ~300 MMcf/d expansion (2027)
 - Targeting open season in Q3
- 3) Potential T-North Expansion New**
 - Serves production and demand growth
 - ~300 MMcf/d expansion (potentially paired with T-South Expansion)
- 4) Long term LNG Development Optionality**
 - PTP¹ and WCGT² pipeline routes
 - PTP¹ fully permitted right of way

B.C. Pipeline System expansions essential to W. Canadian LNG exports

Forward-Looking Statements

This presentation contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "continue", "estimate", "objective", "ongoing", "may", "will", "project", "should", "believe", "plans", "intends" and similar expressions are intended to identify forward-looking information or statements. More particularly and without limitation, this presentation contains forward looking statements and information concerning Peyto Exploration & Development Corp. ("Peyto" or the "Company") production; reserves; undeveloped land holdings; reserve life index; product mix; business strategy; future development and growth prospects, profile targets and rates; prospects; asset base; decline rates; tax pools; drilling locations and inventory; exploration risk; access to capital; future cash flow, value, debt levels and debt to cash flow; capital investment and expenditure programs and the funding thereof; net asset value; credit facility; and statements with respect to levels of dividends to be paid to shareholders, dividend policy, and the timing of payment of such dividends.

The forward-looking statements and information are based on certain key expectations and assumptions made by Peyto, including expectations and assumptions concerning prevailing commodity prices and exchange rates, applicable royalty rates and tax laws; future well production rates; reserve and resource volumes; the performance of existing wells; the success obtained in drilling new wells; and the sufficiency of budgeted capital expenditures in carrying out planned activities; and the availability and cost of labour and services. Although Peyto believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward-looking statements and information because Peyto can give no assurance that they will prove to be correct.

Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties. Actual results could differ materially from those currently anticipated due to a number of factors and risks. These include, but are not limited to, the risks associated with the oil and gas industry in general such as operational risks in development, exploration and production; delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of reserve and resource estimates; the uncertainty of estimates and projections relating to reserves, resources, production, costs and expenses; health, safety and environmental risks; commodity price and exchange rate fluctuations; marketing and transportation; loss of markets; environmental risks; competition; incorrect assessment of the value of acquisitions; failure to realize the anticipated benefits of acquisitions; ability to access sufficient capital from internal and external sources; and changes in legislation, including but not limited to tax laws, royalties and environmental regulations.

Readers are cautioned that the foregoing list of factors is not exhaustive. Additional information on these and other factors that could affect the operations or financial results of Peyto are included in reports on file with applicable securities regulatory authorities and may be accessed through the SEDAR website (www.sedar.com). The forward-looking statements and information contained in this presentation are made as of the date hereof and Peyto undertakes no obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws.

The information contained in this presentation does not purport to be all-inclusive or to contain all information that a prospective investor may require. Prospective investors are encouraged to conduct their own analyses and reviews of Peyto and of the information contained in this presentation. Without limitation, prospective investors should consider the advice of their financial, legal, accounting, tax and other advisors and such other factors that they consider appropriate in investigating and analyzing Peyto.

Financial Outlook

This presentation contains information that may be considered a financial outlook under applicable securities laws about the Company's potential financial position, including, but not limited to, Peyto's anticipated net capital expenditures, production growth rate, capital efficiency, base decline; and IRR and NPV in respect of type curve economics, all of which are subject to numerous assumptions, risk factors, limitations and qualifications, including those set forth in the above paragraphs. The actual results of operations of the Company and the resulting financial results will vary from the amounts set forth in this presentation and such variations may be material. This information has been provided for illustration only and with respect to future periods are based on budgets and forecasts that are speculative and are subject to a variety of contingencies. Accordingly, these estimates are not to be relied upon. Because this information is subjective and subject to numerous risks, it should not be relied on as indicative of future results. Except as required by applicable securities laws, the Company undertakes no obligation to update such financial outlook. The financial outlook contained in this presentation was made as of the date of this presentation and was provided for the purpose of providing further information about the Company's potential future business operations. Readers are cautioned that the financial outlook contained in this presentation is not conclusive and is subject to change.

Non-GAAP and Other Financial Measures

Throughout this presentation Peyto employs certain measures to analyze financial performance, financial position, and cash flow. These non-GAAP and other financial measures do not have any standardized meaning prescribed under IFRS and therefore may not be comparable to similar measures presented by other entities. The non-GAAP and other financial measures should not be considered to be more meaningful than GAAP measures which are determined in accordance with IFRS, such as net income (loss), cash flow from operating activities, and cash flow used in investing activities, as indicators of Peyto's performance. Additional information on these terms are included in the Company's most recently filed Management's Discussion and Analysis and other reports on file with applicable securities regulatory authorities and may be accessed through the SEDAR website (www.sedar.com) or Peyto's website (www.peyto.com).

Advisories

Funds from Operations

"Funds from operations" ("FFO") is a non-GAAP measure which represents cash flows from operating activities before changes in non-cash operating working capital and provision for future performance-based compensation. Management considers funds from operations and per share calculations of funds from operations to be key measures as they demonstrate the Company's ability to generate the cash necessary to pay dividends, repay debt and make capital investments. Management believes that by excluding the temporary impact of changes in non-cash operating working capital, funds from operations provides a useful measure of Peyto's ability to generate cash that is not subject to short-term movements in operating working capital. The most directly comparable GAAP measure is cash flows from operating activities.

Net Debt

"Net debt" is a non-GAAP measure that is the sum of long-term debt and working capital excluding the current financial derivative instruments and current provision for future performance-based compensation. It is used by management to analyze the financial position and leverage of the Company. Net debt is reconciled to long-term debt which is the most directly comparable GAAP measure.

Non-GAAP Financial Ratios

Funds from Operations per Share

Peyto presents funds from operations per share by dividing funds from operations by the Company's diluted or basic weighted average common shares outstanding. "Funds from operations" is a non-GAAP financial measure. Management believes that funds from operations per share provides investors an indicator of funds generated from the business that could be allocated to each shareholder's equity position.

Netback

"Netback" is a non-GAAP financial ratio that represents the profit margin associated with the production and sale of petroleum and natural gas on a per unit basis. Peyto computes "field netback per mcf" as commodity sales from production less royalties, operating, and transportation expense divided by production and "cash netback" as "field netback" less interest and general and administration expense divided by production. Netbacks are per unit of production measures used to assess Peyto's performance and efficiency. The primary factors that produce Peyto's strong netbacks and high margins are a low-cost structure and the high heat content of its natural gas that results in higher commodity prices.

Return on Equity

Peyto calculates ROE, expressed as a percentage, as Earnings divided by the Equity. Peyto uses ROE as a measure of long-term financial performance, to measure how effectively Management utilizes the capital it has been provided by shareholders and to demonstrate to shareholders the returns generated over the long term.

Return on Average Capital Employed

Peyto calculates ROCE, expressed as a percentage, as Earnings before Interest and Tax divided by Total Assets less Current Liabilities per the Financial Statements. Peyto uses ROCE as a measure of long-term financial performance, to measure how effectively Management utilizes the capital (debt and equity) it has been provided and to demonstrate to shareholders the returns generated over the long term.

Oil and Gas Advisories

Thousands of Cubic Feet Equivalent

Certain crude oil and natural gas liquids ("NGLs") volumes have been converted to thousands of cubic feet equivalent ("mcf"), millions of cubic feet equivalent ("mmcf") or billions of cubic feet equivalent ("bcfe") on the basis of one barrel ("bbl") of crude oil or NGLs to six thousand cubic feet ("mcf") of natural gas. Also, certain natural gas volumes have been converted to barrels of oil equivalent ("boe"), thousands of boe ("mboe") or millions of boe ("mmboe") using the same equivalency measure. Such equivalency measures may be misleading, particularly if used in isolation. A conversion ratio of one bbl to six mcf is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. As the value ratio between natural gas and crude oil based on the current prices of natural gas and crude oil is significantly different from the energy equivalency of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indication of value.

Finding, Development and Acquisition Costs

This presentation contains disclosure regarding finding, development and acquisition costs ("FD&A"). The aggregate of the exploration and development costs incurred in the most recent financial year and the change during that year in estimated future development costs generally will not reflect total finding and development costs related to reserves additions for that year.

Reserves

The recovery and reserve estimates of Peyto's crude oil, natural gas liquids and natural gas reserves provided in the presentation are estimates only and there is no guarantee that the estimated reserves will be recovered. Actual crude oil, natural gas liquids and natural gas reserves may be greater than or less than the estimates provided herein. Reserve and production volumes are quoted before royalty deductions.

The estimated net present values disclosed in this presentation do not represent fair market value. Unless otherwise expressly stated, the information in this presentation pertaining to future drilling locations or drilling inventories is based solely on internal estimates made by management and such locations have not been reflected in any independent reserve or resource evaluations and have not been recognized as reserves or resources as defined in NI 51-101. See information on drilling locations below.

Exploration & Development Corp.

Oil and Gas Metrics

This presentation contains a number of oil and gas and finance metrics, including "FD&A cost", "cash costs", "supply cost", "full cycle netback", "reserve life", "payout", "IP12 rates", "internal rate of return (IRR)", "corporate decline rate" and "NPV" which do not have standardized meanings or standard methods of calculation and therefore such measures may not be comparable to similar measures used by other companies and should not be used to make comparisons. Such metrics have been included herein to provide readers with additional measures to evaluate Peyto's performance; however, such measures are not reliable indicators of the future performance of the Company and future performance may not compare to the performance in previous periods and therefore such metrics should not be unduly relied upon. Management uses these oil and gas and finance metrics for its own performance measurements and to provide securityholders with measures to compare Peyto's operations over time. Readers are cautioned that the information provided by these metrics, or that can be derived from the metrics presented in this presentation, should not be relied upon for investment or other purposes.

Drilling Locations

This presentation discloses drilling inventory in two categories: (i) proved and probable ("booked") locations; and (ii) unbooked locations. Booked locations are derived from GLJ Ltd. reserves evaluation effective December 31, 2021 and account for drilling locations that have associated proved and/or probable reserves, as applicable. Unbooked locations are internal estimates based on our prospective acreage and an assumption as to the number of wells that can be drilled per section based on industry practice and internal review. Unbooked locations do not have attributed reserves or resources. Of the 2,600 total drilling locations identified herein, 1,274 are booked locations and 1,326 to 1,352 are unbooked locations. Unbooked locations have been identified by management as an estimation of our multi-year drilling activities based on evaluation of applicable geologic, seismic, engineering, production and reserves information. There is no certainty the Company will drill all unbooked drilling locations and if drilled there is no certainty that such locations will result in additional oil and gas reserves, resources or production. The drilling locations on which we actually drill wells will ultimately depend upon the availability of capital, regulatory approvals, seasonal restrictions, oil and natural gas prices, costs, actual drilling results, additional reservoir information that is obtained and other factors. While certain of the unbooked drilling locations have been de-risked by drilling existing wells in relative close proximity to such unbooked drilling locations, other unbooked drilling locations are farther away from existing wells where management has less information about the characteristics of the reservoir and therefore there is more uncertainty whether wells will be drilled in such locations and if drilled there is more uncertainty that such wells will result in additional oil and gas reserves, resources or production.

Type Curves

Peyto has presented certain type curves and well economics for its Deep Basin areas. The type curves presented are based on Peyto's historical production. Such type curves and well economics are useful in understanding management's assumptions of well performance in making investment decisions in relation to development drilling in the Montney area and for determining the success of the performance of development wells; however, such type curves and well economics are not necessarily determinative of the production rates and performance of existing and future wells and such type curves do not reflect the type curves used by our independent qualified reserves evaluator in estimating our reserves volumes. The type curves differ as a result of varying horizontal well length, stage count and stage spacing. The type curves represent the average type curves expected. In this presentation, estimated ultimate recovery ("EUR") represents the estimated ultimate recovery associated with the type curves presented; however, there is no certainty that Peyto will ultimately recover such volumes from the wells it drills.
