Management's discussion and analysis

This Management's Discussion and Analysis ("MD&A") of Peyto Exploration & Development Corp. ("Peyto" or the "Company") is Management's analysis of the financial performance and significant trends and external factors that may affect future performance. This MD&A was prepared using information that is current as of March 10, 2026 and should be read in conjunction with the audited consolidated financial statements (the "financial statements") as at and for the year ended December 31, 2025 and 2024, as well as Peyto's Annual Information Form, each of which is available at www.sedarplus.ca and on Peyto's website at www.Peyto.com.

All references are to Canadian dollars unless otherwise indicated.

Throughout this MD&A and in other materials disclosed by the Company, Peyto adheres to IFRS® Accounting Standards (the "Accounting Standards" or "GAAP") as issued by the International Accounting Standards Board; however, the Company also employs certain non-GAAP and other financial measures to analyze financial performance, financial position, and cash flow including, but not limited to "funds from operations", "free funds flow", "total capital expenditures" and "net debt". These non-GAAP and other financial measures do not have any standardized meaning prescribed under the Accounting Standards and therefore may not be comparable to similar measures presented by other entities. The non-GAAP and other financial measures should not be considered to be more meaningful than GAAP measures which are determined in accordance with the Accounting Standards, such as earnings (loss), cash flow from operating activities, and cash flow used in investing activities, as indicators of Peyto's performance. See "Non-GAAP and Other Financial Measures" included at the end of this MD&A for an explanation of these financial measures and reconciliation to the most directly comparable financial measure under the Accounting Standards.

Readers are cautioned that this MD&A contains certain forward-looking information and should be read in conjunction with Peyto's "Forward-Looking Statements" section included at the end of this MD&A.

OVERVIEW

Peyto is a Canadian energy company involved in the development and production of natural gas, oil and natural gas liquids in Alberta's deep basin. At December 31, 2025, the Company's total Proved plus Probable reserves were 8.7 trillion cubic feet equivalent (1.45 billion barrels of oil equivalent) as evaluated by its independent petroleum engineers. Production is weighted approximately 88% to natural gas and 12% to natural gas liquids.

The Peyto model is designed to deliver a superior total return with growth in value, assets, production and income, all on a debt adjusted per share basis. The model is built around three key strategies:

- Use technical expertise to achieve the best return on capital employed through the development of internally generated drilling projects.
- Build an asset base which is made up of high-quality natural gas reserves.
- Over time, balance dividends paid to shareholders with earnings and cash flow, and balance funding for the capital program with cash flow, equity and available credit lines.

Operating results over the last 27 years indicate that these strategies have been successfully implemented.

RESULTS OF OPERATIONS

Production

	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Natural gas (MMcf/d)	740.1	708.1	5%	708.0	659.2	7%
NGLs (or "Liquids") (bbl/d)	17,439	15,409	13%	16,048	15,334	5%
Total (boe/d)	140,794	133,426	6%	134,055	125,202	7%
Total (MMcfe/d)	844.8	800.6	6%	804.3	751.2	7%

Peyto's total production for the fourth quarter of 2025 increased 6% to 140,794 boe/d, compared to 133,426 boe/d for the fourth quarter of 2024. For the year ended December 31, 2025, total production increased by 7% to 134,055 boe/d, compared to 125,202 boe/d for 2024. The increased production in the fourth quarter and year ended December 31, 2025, was driven by strong well results from the Company's 2025 drilling program.

Natural Gas Liquids Production by Component

	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Condensate and Pentanes Plus (bbl/d)	9,562	8,360	14%	8,662	8,089	7%
Other Natural gas liquids (bbl/d)	7,877	7,049	12%	7,386	7,245	2%
Natural gas liquids (bbl/d)	17,439	15,409	13%	16,048	15,334	5%
Liquid to gas ratio (bbls/MMcf)	23.6	21.8	8%	22.7	23.3	-3%

The liquid-to-gas ratio was 23.6 bbls/MMcf for the fourth quarter of 2025 compared to 21.8 bbls/MMcf for the same period of 2024. This ratio fluctuates depending on the mix of rich and lean gas wells drilled as Peyto attempts to maximize overall returns.

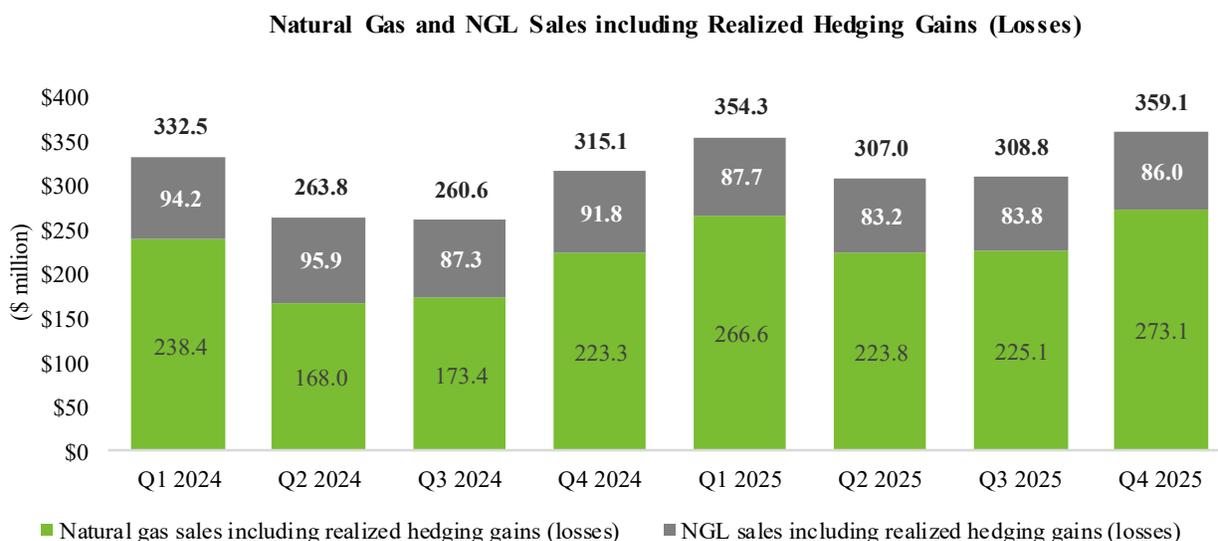

Revenue from Natural Gas and NGL Sales and Realized Hedging Gains (Losses)

(\$000)	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Natural gas sales ⁽¹⁾	221,339	147,970	50%	749,393	485,857	54%
NGL sales	81,651	90,516	-10%	331,045	371,370	-11%
Natural gas and NGL sales	302,990	238,486	27%	1,080,438	857,227	26%
Realized hedging gains - gas	51,773	75,300	-31%	239,118	317,077	-25%
Realized hedging gains (losses) - NGLs	4,313	1,312	229%	9,619	(2,225)	-532%
Realized gain on derivative financial instruments	56,086	76,612	-27%	248,737	314,852	-21%
Natural gas and NGL sales including realized hedging gains (losses)	359,076	315,098	14%	1,329,175	1,172,079	13%

(1) Excludes marketing revenue and other income.

For the fourth quarter of 2025, natural gas and NGL sales including realized hedging gains increased 14% to \$359.1 million compared to \$315.1 million for the fourth quarter of 2024. For the year ended December 31, 2025, natural gas and NGL sales including realized hedging gains increased 13% to \$1.33 billion from \$1.17 billion for the same period in 2024. The increases for the three months and year ended December 31, 2025, compared to the same periods of 2024, were driven by higher production volumes and realized gas prices, partially offset by lower realized NGL prices and hedging gains.

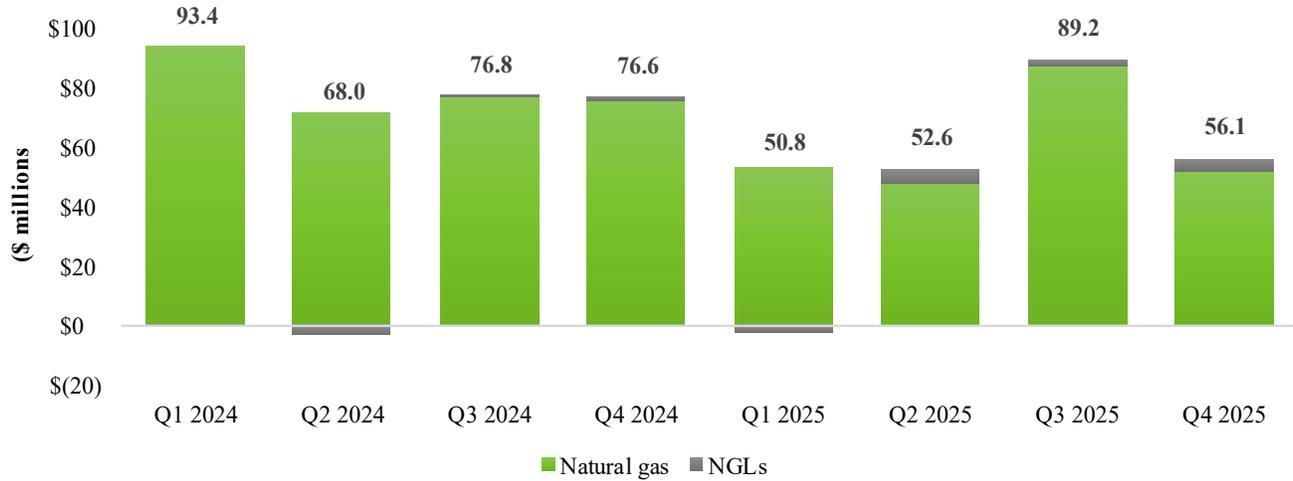

Peyto's natural gas and NGL sales including realized hedging gains (losses) over the past eight quarters are summarized below.

According to the Company's commodity hedging policy, Peyto enters into risk management contracts with well-established counterparties for the purpose of protecting a portion of its future revenues from the volatility of oil and natural gas prices. In periods of increasing commodity prices, Peyto expects to realize hedging losses and in periods of falling commodity prices, Peyto expects to realize hedging gains. Peyto's hedging program since inception in 2003 has generated cumulative realized gains of \$759 million.

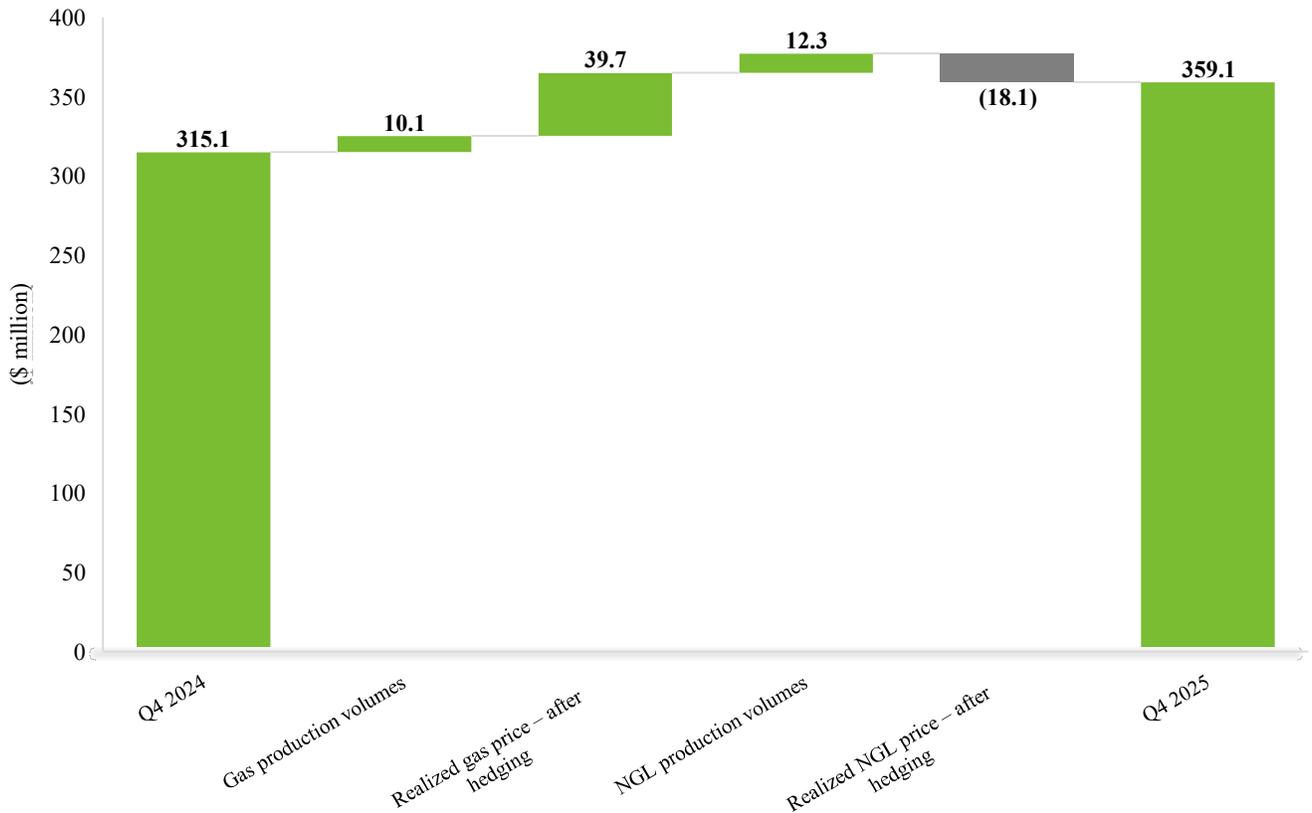

Realized hedging gains (losses) over the past eight quarters are summarized below.

Realized Hedging Gains (Losses)

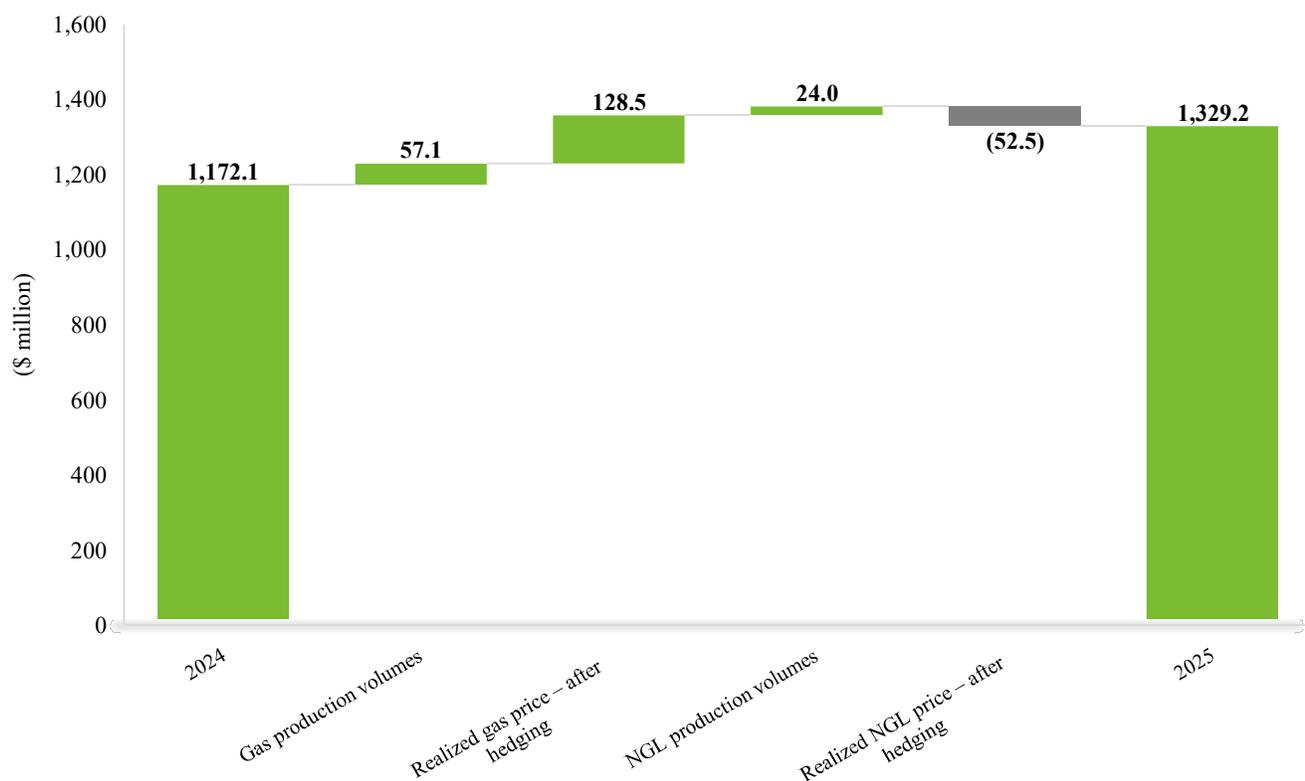

The change in revenue from natural gas and NGL sales including realized hedging gains (losses) in the three months and year ended December 31, 2025, from the same periods of 2024, are detailed in the following charts:

Change in Revenue and Realized Hedging Losses Three Months Ended December 31

Total realized hedging gain (loss) (\$/boe)	4.33	6.24	-31%	5.08	6.87	-26%

(1) Condensate, pentanes plus and other liquids prices are Peyto realized prices in Canadian dollars adjusted for fractionation and transportation. Excludes marketing revenue

(2) Excludes marketing revenue but includes fixed price physical contracts

(3) Market diversification cost represents the total marketing and synthetic transportation cost

Peyto actively markets all components of its production stream including natural gas, condensate, pentane, butane and propane.

Natural Gas Prices

Peyto's realized natural gas price, before hedging, rose 43% to \$3.25/Mcf for the fourth quarter of 2025 from \$2.27/Mcf for the fourth quarter of 2024 due to higher benchmark natural gas prices. The higher benchmark prices in the quarter decreased Peyto's realized hedging gains from \$1.16/Mcf for the fourth quarter of 2024 to \$0.76/Mcf for the fourth quarter of 2025. The Company's realized natural gas price, after hedging and diversification, totaled \$4.01/Mcf (or \$3.49/GJ) for the quarter, which was 17% higher than in the fourth quarter of 2024 and 57% higher than the AECO 7A benchmark price of \$2.22/GJ for the same period.

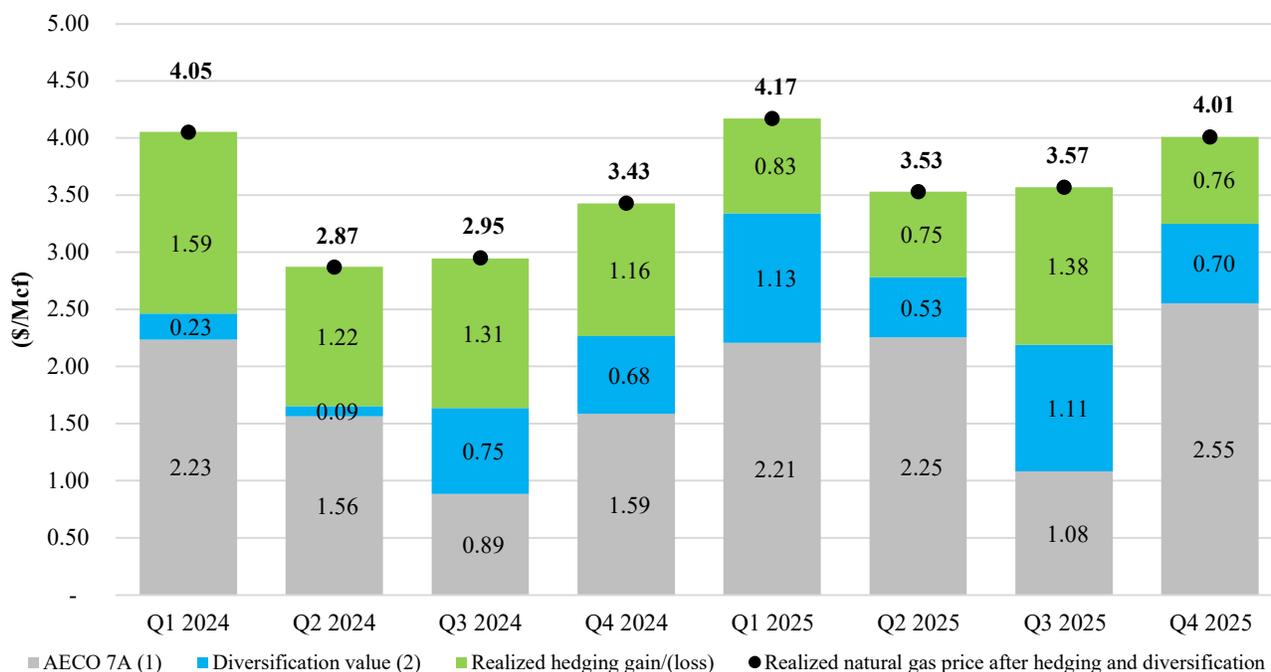

For the year ended December 31, 2025, Peyto's realized natural gas price, after hedging and diversification, increased 15% to \$3.82/Mcf from \$3.32/Mcf in the same period of 2024, driven mainly from higher benchmark prices at the Company's non-AECO hubs, partially offset by lower realized hedging gains.

Peyto's natural gas market diversification activity resulted in natural gas sales being priced off various hubs including AECO, Ventura, Emerson 2, Malin, Dawn/Parkway, Chicago and Henry Hub using both physical fixed price and temporary basis transactions to access those locations. Natural gas prices were left to float on daily pricing or locked in using fixed price swaps at those hubs and Peyto's realized price was benchmarked against those local prices, then adjusted for marketing arrangements (either physical or short-term synthetic) to those markets. This gas market diversification cost represents the total marketing and synthetic transportation cost, not just the difference between those markets and an AECO equivalent price.

Additionally, Peyto's market diversification activity includes its 60,000 GJ/day gas supply agreement ("GSA") with the Cascade 900 MWh Combined-Cycle Power Plant. Peyto's realized price under the GSA is indexed to Cascade's realized power price.

The value of Peyto's natural gas market diversification and hedging activities over the past eight quarters, relative to the AECO 7A benchmark, is included in the following chart.

Natural Gas Price

- (1) AECO 7A monthly benchmark has been converted to \$/Mcf at Peyto's average heat content of 1.15 GJ/Mcf.
- (2) Diversification value represents the difference between Peyto's realized natural gas price (after diversification cost but before realized hedging gain/(loss)) and the AECO 7A monthly benchmark price.

NGL Prices

Peyto's realized NGL price, before hedging, declined 20% to \$50.89/bbl for the fourth quarter of 2025, from \$63.85/bbl for the fourth quarter in 2024, driven by lower benchmark oil and NGL benchmark prices over the same period. Peyto's realized NGL price, after hedging, averaged \$53.58/bbl, down 17% from \$64.78/bbl for the fourth quarter of 2024, as the decline in benchmark oil and NGL prices was partially mitigated from realized NGL hedging gains of \$2.69/bbl in the quarter.

For the year ended December 31, 2025, Peyto's NGL price, after hedging, decreased 12% to \$58.16/bbl from \$65.77/bbl in 2024, driven by the decline in benchmark oil and NGL prices, partially mitigated from realized NGL hedging gains.

The Company's liquids were actively marketed with condensate being sold on a monthly index differential linked to WTI oil prices. Peyto's NGLs (a blend of pentanes plus, butane, and propane) are fractionated by a third party in Fort Saskatchewan, Alberta; however, Peyto markets each product separately. Pentanes plus were sold on a monthly index differential linked to WTI, with some volumes forward sold on fixed differentials to WTI. Butane was sold as a % of WTI or a fixed differential to the Mount Belvieu, Texas market. Propane was sold on a fixed differential to the Conway, Kansas market. While some products were sold pursuant to annual term contracts to ensure delivery paths remain open, others were marketed on the daily spot market.

Marketing Revenue and Marketing Purchases

(\$000)	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Marketing revenue	4,499	8,038	-44%	23,118	51,023	-55%
Marketing purchases	(3,199)	(6,776)	-53%	(19,553)	(47,793)	-59%
Net marketing revenue ⁽¹⁾	1,300	1,262	-3%	3,565	3,230	-10%

(1) This is a non-GAAP financial measure or ratio. Refer to the section entitled "Non-GAAP and Other Financial Measures" contained within this MD&A for further information.

Peyto has NGL marketing contracts whereby the Company purchases NGL mix from third parties, transports and fractionates the product, and sells the NGL components. The marketing revenue and marketing purchases are recorded gross on Peyto's income statement and are accounted for separately from Peyto's own production.

For the fourth quarter of 2025, Peyto recorded marketing revenue totaling \$4.5 million, and marketing purchases of \$3.2 million, compared to marketing revenue of \$8.0 million, and marketing purchases of \$6.8 million for the fourth quarter of 2024. For 2025, marketing revenue totaled \$23.1 million, and marketing purchases totaled \$19.6 million, compared to \$51.0 million and \$47.8 million, respectively, for 2024. The decrease in marketing revenue and marketing purchases for the three months and full year ended December 31, 2025, was due to decreased contracted volumes.

Other Income

(\$000)	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Other Income	5,527	3,512	57%	14,965	10,389	44%

Peyto's other income includes third-party gathering and processing income, sales of excess natural gas transportation service, and electricity sales generated by the Company's cogeneration facility at the Edson Gas Plant. For the fourth quarter of 2025, other income increased 57% to \$5.5 million, compared to \$3.5 million for the fourth quarter of 2024. For the year ended December 31, 2025, other income increased to \$15.0 million from \$10.4 million for 2024. The increase in the three months and year ended December 31, 2025, over the same periods of 2024, was driven by increased revenue from new third-party gathering and processing contracts and increased sales of excess transportation service, partially offset by lower electricity sales due to weaker Alberta power prices.

Royalties

Royalties are paid to the owners of the mineral rights with whom leases are held, including the provincial government of Alberta. Alberta Crown royalties on natural gas and NGLs are invoiced on the Crown's share of production based on a monthly established reference price ("Reference Price"). The natural gas Reference Price is a monthly weighted average price of gas consumed in Alberta and gas exported from Alberta reduced for transportation and marketing allowances. Royalties also include Gas Cost Allowance ("GCA"), which reduces royalties payable to the Crown for capital and operating expenditures incurred by Peyto in gathering and processing the Crown's share of natural gas and NGL production. Additionally, all of Peyto's new wells qualify for the Alberta Crown Drilling and Completion Cost Allowance program, which has a 5% initial royalty rate under the Modernized Royalty Framework.

	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Royalties (\$000)	14,087	15,768	-11%	47,203	61,551	-23%
per cent of sales before hedging	4.6%	6.6%	-30%	4.4%	7.2%	-39%
\$/Mcf	0.18	0.21	-14%	0.16	0.22	-27%
\$/boe	1.09	1.28	-15%	0.96	1.34	-28%

For the three months and year ended December 31, 2025, royalties decreased to \$14.1 million and \$47.2 million, respectively, from \$15.8 million and \$61.6 million in the comparative prior periods. The decreases in the three months and year ended

December 31, 2025, were driven by lower NGL royalties from the sharp decline in benchmark oil and NGL prices, coupled with increased GCA credits associated with Peyto's 2025 gathering and processing facility additions.

On a percentage of sales basis, royalties declined to 4.6% and 4.4% for the three months and year ended December 31, 2025, respectively, from 6.6% and 7.2% for the comparative prior periods. The lower royalty rates reflect the decrease in NGL royalties and increased GCA credits noted above but were also impacted by Peyto's natural gas sales to non-AECO market hubs. The Company's realized natural gas prices at non-AECO hubs have been markedly stronger than AECO, driving strong natural gas sales, and lowering the royalty rates compared to the same periods of 2024.

In its 27-year history, Peyto has invested \$9.4 billion in capital projects and acquisitions, found, acquired and developed 7.2 TCFe of natural gas reserves and paid over \$1.3 billion in royalties.

Operating Costs & Transportation

Peyto's operating expenses include all costs with respect to day-to-day well and facility operations.

	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Government Cost (\$000) ¹	9,239	8,645	7%	41,704	37,183	12%
Other expenses (\$000)	29,229	28,406	3%	111,084	108,160	3%
Operating costs (\$000)	38,468	37,051	4%	152,788	145,343	5%
\$/Mcf	0.49	0.50	-2%	0.52	0.53	-2%
\$/boe	2.97	3.02	-2%	3.12	3.17	-2%

\$/Mcf	0.30	0.27	11%	0.30	0.30	0%
\$/boe	1.77	1.63	9%	1.80	1.77	2%

¹ Government cost include property taxes, carbon tax, Crown lease rentals, Alberta Energy Regulator administration fees and Orphan Well Association fees

For the three months and year ended December 31, 2025, operating costs rose to \$38.5 million and \$152.8 million, respectively, compared to \$37.1 million and \$145.3 million for the same periods of 2024, driven by increased production volumes and higher government costs. On a unit-of-production basis, operating costs decreased 2% to \$0.49/Mcfe in the fourth quarter of 2025 from \$0.50/Mcfe in the same period of 2024. For the year ended December 31, 2025, operating costs decreased 2% to \$0.52/Mcfe compared to \$0.53/Mcfe in the same period of 2024. The decreases on a unit-of-production basis are primarily

due to increased production volumes, partially offset by higher non-controllable government costs, compared to the same periods of 2024.

Transportation expenses rose to \$23.0 million and \$88.1 million for the three months and year ended December 31, 2025, respectively, from \$20.0 million, and \$81.2 million for the same periods of 2024, driven by NGTL toll increases and new Dawn service that commenced in November 2025. On a unit-of-production basis, the higher tolls and new Dawn service increased fourth quarter transportation expenses to \$0.30/Mcfe from \$0.27/Mcfe for the fourth quarter of 2024.

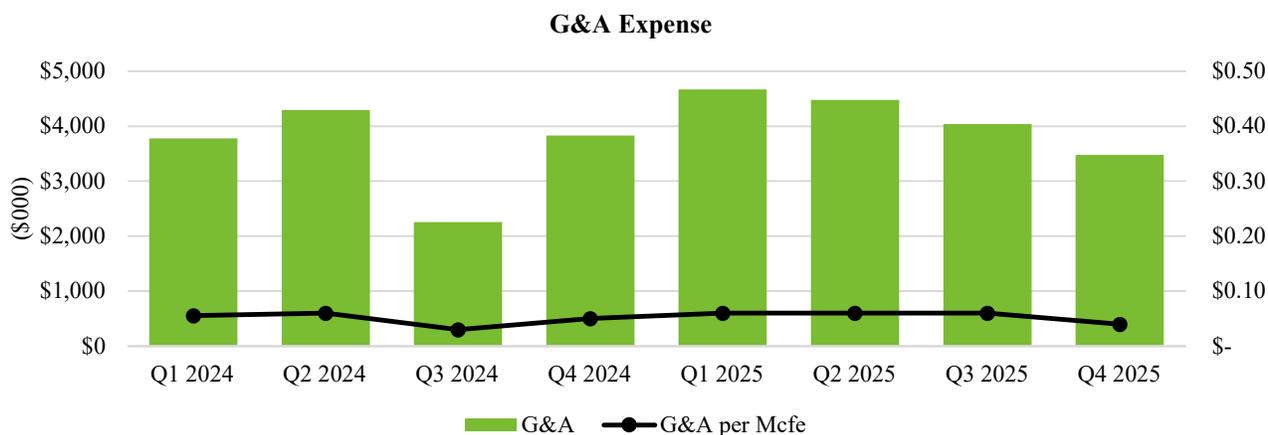

General and Administrative ("G&A") Expenses

	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Gross G&A expenses (\$000)	7,683	7,266	6%	30,549	28,880	6%
Overhead recoveries (\$000)	(4,206)	(3,434)	22%	(13,891)	(14,722)	-6%
G&A expenses (\$000)	3,477	3,832	-9%	16,658	14,158	18%
\$/Mcfe	0.05	0.05	0%	0.06	0.05	20%
\$/boe	0.27	0.31	-13%	0.34	0.31	10%

In the three months and year ended December 31, 2025, G&A expenses (before overhead recoveries) increased to \$7.7 million and \$30.5 million, respectively, compared to \$7.3 million and \$28.9 million for the same periods of 2024. The increases are primarily due to increased employment, information technology and professional services.

Gross G&A expenses averaged \$0.10/Mcfe before overhead recoveries of \$0.05/Mcfe for G&A expenses of \$0.05/Mcfe in the fourth quarter of 2025 consistent with the comparative period.

Peyto capitalizes G&A expenses and performance-based compensation related to the execution of its capital program. For the three months and year ended December 31, 2025, Peyto capitalized \$3.7 million and \$12.2 million, respectively, of expenses directly attributable to exploration and development activities compared to \$2.2 million and \$11.9 million for the same periods of 2024.

Performance and Stock-Based Compensation

The Company awards performance-based compensation to employees, key consultants and directors. Performance and stock-based compensation is comprised of stock options, deferred share units, total shareholder return rights and reserve value-based bonus.

Performance-Based Compensation

The reserve value-based bonus is 4% of the incremental increase in per share value, if any, as adjusted to reflect changes in debt, dividends, general and administrative expenses and interest expense, of proved producing reserves, calculated using un-escalated, average realized prices of the current year and a discount rate of 8%. Peyto recorded \$10.5 million and \$18.0 million for performance-based compensation expense in the three months and year ended December 31, 2025, respectively (2024 - \$10.3 million and \$15.3 million).

Stock-Based Compensation

Total Shareholder Return Rights

In May 2025, the Company adopted, and shareholders approved the Total Shareholder Return Rights Plan ("TSRRP") to replace Peyto's stock option program as the Company's only security-based compensation arrangement for employees, executive officers and consultants. Under the TSRRP, participants are granted rights ("Rights") that vest ratably over three years. The future value of which is based on the difference between the market value of the common shares on the date of grant and the market value of the common shares on vesting date, plus the dividends paid to shareholders during such period. Plan participants who are executive officers of the Company will be subject to performance conditioning metrics on 50% of the Rights granted to them (the "Performance Rights").

Employees and officers are expected to settle any in-the-money rights through the issuance of common shares, which will be issued from treasury. Rights held by consultants are expected to be settled in cash. The TSRRP provides that the aggregate number of common shares issuable thereunder and under all other security-based compensation arrangements of the Company at any time may not exceed 6.5% of the total number of issued and outstanding common shares from time to time.

Stock Options

The Company has a stock option plan allowing for the granting of stock options to officers, employees and consultants of the Company. Stock options were granted periodically with a three-year vesting period. At the vesting, recipients have thirty days to exercise options after which any unexercised options expire. With the adoption and approval of the TSRRP, Peyto has ceased granting new awards under the stock option plan. Outstanding stock options will vest, exercise or expire according to original grant agreements.

Deferred Share Units

Peyto has a deferred share unit ("DSU") plan, whereby DSUs may be issued to members of the Board of Directors. Each DSU is a notional unit equal in value to one Common Share, which entitles the holder to receive a common share upon redemption. DSUs vest immediately but can only be converted to a share upon the holder ceasing to be a Director of the Company. The expense associated with the DSU plan is determined based on the 5-day VWAP of Common Shares at the grant date. The expense is recognized in the income statement in the quarter in which the units are granted, with a corresponding charge to contributed surplus in the balance sheet.

Stock-Based Compensation Expense

Stock-based compensation is calculated on 7.5 million non-vested stock options (3.7% of the total number of common shares outstanding), 3.6 million Rights (1.8% of the total number of common shares outstanding) and 0.3 million vested DSU's (0.2% of the total number of common shares outstanding). Peyto records a non-cash provision for compensation expense over the life of the awards calculated using a Black-Scholes valuation model. Stock-based compensation expense for the three months and year ended December 31, 2025, was \$3.8 million and \$14.7 million, respectively (2024 - \$3.8 million and \$14.1 million).

Finance Costs

	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Accretion of decommissioning provision (\$000)	3,599	2,407	50%	13,330	9,457	41%
Lease Interest (\$000)	110	123	-11%	455	378	20%
Financing Expense (\$000)	731	942	-22%	3,557	3,468	3%
Interest (\$000)	15,867	22,888	-31%	70,827	93,811	-25%
Interest and financing costs	16,598	23,830	-30%	74,384	97,279	-24%
Finance Cost	20,307	26,360	-23%	88,169	107,114	-18%
Interest and financing \$/Mcf	0.21	0.33	-36%	0.25	0.36	-31%
Interest and financing \$/boe	1.28	1.95	-34%	1.52	2.13	-29%
Average interest rate	5.7%	6.8%	-16%	5.9%	7.1%	-16%

For the three months and year ended December 31, 2025, interest and financing costs fell to \$16.6 million and \$74.4 million, respectively, compared to \$23.8 million and \$97.3 million for the same periods of 2024. The decrease in interest and financing costs, compared to the same periods of 2024, is due to lower interest rates on the Company's bank debt, coupled with lower average bank debt outstanding. For 2025, Peyto's average interest rate fell to 5.9% from 7.1% in 2024, primarily driven by decreases to the Bank of Canada's policy rate.

Accretion expense increased to \$3.6 million and \$13.3 million for the three months and year ended December 31, 2025, respectively, compared to \$2.4 million and \$9.5 million for the same periods of 2024, primarily due to an increase in the long-term bond rate used to discount the decommissioning provision.

(1) This is a non-GAAP ratio. Refer to the section entitled "Non-GAAP and Other Financial Measures" contained within this MD&A for further information

Netbacks are a non-GAAP measure that represents the profit margin associated with the production and sale of petroleum and natural gas. Netbacks are per unit of production measures used to assess Peyto's performance and efficiency. The primary factors that produce Peyto's strong netbacks and high margins are a low-cost structure and its hedging and diversification program.

Net Sales Price and Cash Costs

(1) Excludes marketing revenue and other income

Depletion and Depreciation

	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Depletion and depreciation (\$000)	99,667	98,055	2%	387,533	377,689	3%
\$/Mcf	1.28	1.33	-4%	1.32	1.37	-4%
\$/boe	7.69	7.99	-4%	7.92	8.24	-4%

The Company's depletion and depreciation totaled \$99.7 million (\$1.28/Mcfe) in the fourth quarter of 2025 compared to \$98.1 million (\$1.33/Mcfe) in the fourth quarter of 2024. For the year ended December 31, 2025, depletion and depreciation totaled \$387.5 million (\$1.32/Mcfe) compared to \$377.7 million (\$1.37/Mcfe) for the same period of 2024. The increases on an absolute basis are due to higher production volumes over the same periods in 2024. The decrease in depletion and depreciation on a per-unit basis reflects a lower depletion rate due to updated reserves and future development costs.

Income Taxes

Peyto recorded current tax expense of \$24.5 million and \$106.6 million for the three months and year ended December 31, 2025, respectively, compared to \$20.5 million and \$73.5 million for the same periods of 2024. These increases reflect higher taxable income compared to the corresponding periods in 2024.

For the three months and year ended December 31, 2025, deferred tax expense was \$2.2 million and \$10.6 million, respectively, consistent with \$2.7 million and \$11.0 million for the same periods of 2024.

Peyto's estimated income tax pools are as follows:

Income Tax Pool Type (\$ millions)	Annual Deductibility	December 31, 2025
Canadian Oil and Gas Property Expense	10% declining balance	133.0
Canadian Development Expense (CDE)	30% declining balance	622.0
Successored CDE	30% declining balance	10.9
Successored Canadian Exploration Expense	100%	45.5
Undepreciated Capital Cost	Primarily 25% declining balance	372.3
Other	20%	13.7
Total Federal Tax Pools		1,197.4

MARKETING AND RISK MANAGEMENT

Financial Derivative Instruments

The Company is a party to certain derivative financial instruments, including fixed price contracts. The Company enters into these forward contracts with well-established counterparties for the purpose of protecting a portion of its future revenues from the volatility of oil, natural gas prices, the foreign exchange rate and interest rates. To minimize counterparty risk, these marketing contracts are executed with financial institutions which are members of Peyto's banking syndicate.

Financial derivative instruments are valued on the consolidated balance sheet using quoted market prices at period end. Physical delivery contracts are not considered financial instruments and therefore, no asset or liability is recognized on the consolidated balance sheet.

Commodity Price Risk Management

During the three months and year ended December 31, 2025, Peyto recorded realized hedging gains on commodity contracts of \$57.9 million and \$258.9 million, respectively, compared to \$79.7 million and \$320.4 million for the same periods of 2024. Peyto has the following commodity contracts in place at December 31, 2025.

Natural Gas – AECO 7A Monthly Index			Average Price

Foreign Exchange Forward Contracts

During the three months and year ended December 31, 2025, Peyto recorded realized hedging losses of \$1.8 million and \$10.2 million, respectively, on foreign exchange forward contracts, compared to losses of \$3.1 million and \$5.6 million for the same periods of 2024. Peyto has the following foreign exchange forward contracts in place at December 31, 2025.

Average Rate forward	Amount (USD)	Rate (CAD/USD)
Sold USD Contracts		
Q1 2026	\$51.7 million	1.3688
Q2 2026	\$40.0 million	1.3630
Q3 2026	\$40.0 million	1.3630
Q4 2026	\$16.5 million	1.3675
Q1 2027	\$4.8 million	1.3865
Q2 2027	\$12.0 million	1.3646
Q3 2027	\$12.0 million	1.3646
Q4 2027	\$4.0 million	1.3646

Had these contracts settled on December 31, 2025, Peyto would have realized a gain in the amount of \$0.7 million.

Subsequent to December 31, 2025, Peyto entered into the following contracts:

Average Rate forward	Amount (USD)	Rate (CAD/USD)
Sold USD Contracts		
Q4 2026	\$6.0 million	1.3500
Q1 2027	\$9.0 million	1.3500
Q2 2027	\$4.8 million	1.3450
Q3 2027	\$4.8 million	1.3450
Q4 2027	\$1.6 million	1.3450

Interest Rate Contracts

During the three months and year ended December 31, 2025, Peyto recorded realized hedging losses on interest rate swaps of \$0.1 million and \$0.2 million, respectively (2024 – realized hedging gains of \$0.01 million and \$0.7 million). Realized gains and losses on interest rate swaps are recorded to interest expense. Peyto has the following interest rate swap contracts in place at December 31, 2025.

Term	Notional Amount	Peyto pays fixed rate	Peyto receives floating rate
March 17, 2023 to March 17, 2026 ⁽¹⁾	\$50 million	3.28%	CORRA
January 30, 2025 to January 30, 2028	\$50 million	2.67%	CORRA

⁽¹⁾ The March 17, 2023 interest rate contracts were modified in June 2024 with the transition of the underlying interest rate benchmark from the Canadian Dollar Offer Rate (CDOR) to the Canadian Overnight Repo Rate Average (CORRA).

Had these contracts closed on December 31, 2025, Peyto would have realized a loss in the amount of \$0.3 million.

Commodity Price Sensitivity

Peyto's earnings are largely determined by commodity prices for crude oil and natural gas including the US/Canadian dollar exchange rate. Volatility in these oil and gas prices can cause fluctuations in Peyto's earnings and cash flow. The Company's commodity contracts, low operating costs and long reserve life reduce Peyto's sensitivity to changes in commodity prices.

Currency Risk Management

The Company is exposed to fluctuations in the Canadian/US dollar exchange ratio since commodities are effectively priced in US dollars and converted to Canadian dollars. Peyto mitigates exchange rate risks using foreign exchange forward contracts and by hedging certain products with Canadian dollar contracts. Additionally, the \$40 million USD in senior secured notes provides structural foreign exchange risk mitigation.

Interest Rate Risk Management

The Company is exposed to interest rate risk in relation to interest expense on its revolving credit facility. Peyto uses interest rate swaps on a portion of its floating rate debt to mitigate its interest rate exposure. At December 31, 2025, the increase or decrease in before tax earnings for each 100 bps (1%) change in weighted average borrowing rate paid on the outstanding revolving credit facility amounts to approximately \$1.8 million per quarter. The average debt outstanding for the quarter was \$1.20 billion (including \$490 million fixed rate debt).

Cash Flow from Operating Activities, Funds from Operations and Earnings

(\$000 except per share amounts)	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change

(1) This is a non-GAAP measure or ratio. Refer to the section entitled "Non-GAAP and Other Financial Measures" contained within this MD&A for further information.

Cash Flow from Operating Activities and Funds from Operations

For the fourth quarter of 2025, cash flow from operating activities increased to \$238.8 million from \$186.2 million in the fourth quarter of 2024. Funds from operations ("FFO") increased 23% to \$245.0 million for the fourth quarter of 2025, compared to \$199.1 million in the fourth quarter of 2024. These increases were primarily driven by:

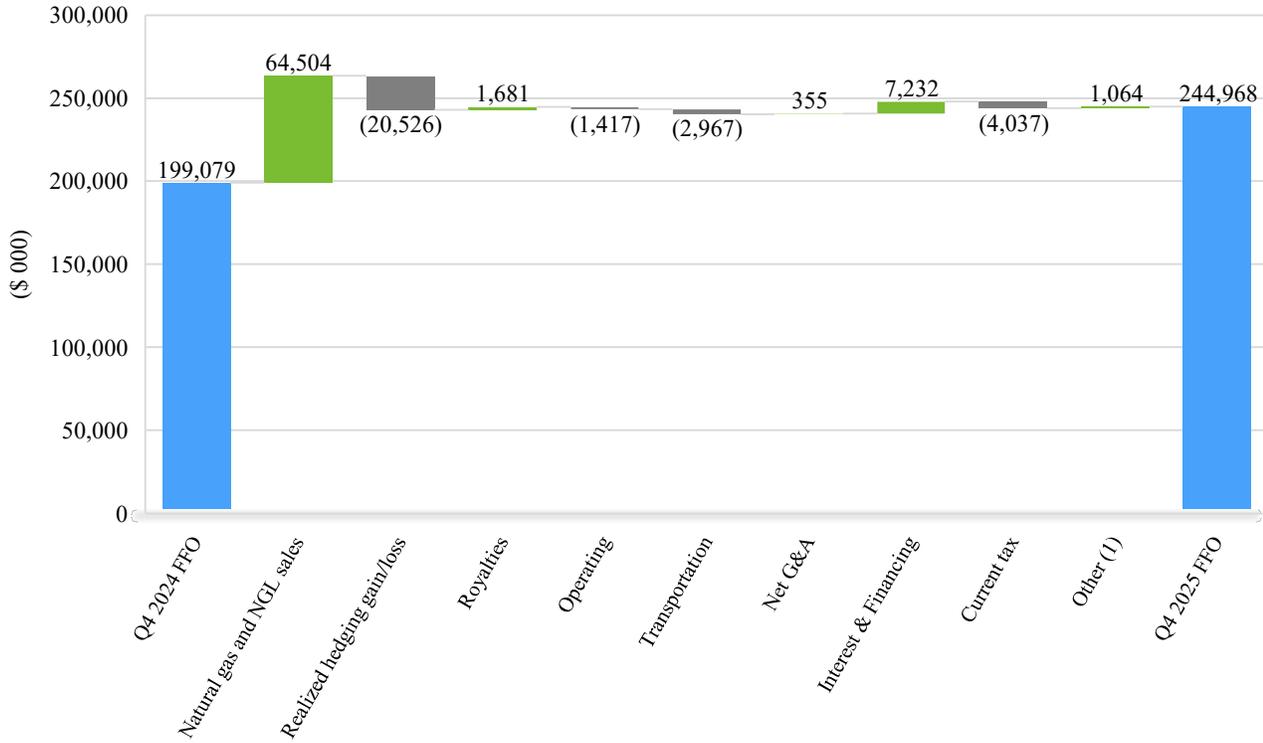

- higher production volumes, and realized natural gas prices coupled with lower interest and financing costs;
- partially offset by lower realized hedging gains, and higher operating, transportation, G&A and current tax expenses.

For the year ended December 31, 2025, cash flow from operating activities increased to \$857.6 million from \$672.7 million for 2024. FFO totaled \$860.5 million for the year end December 31, 2025, compared to \$713.1 million for 2024. These increases were mainly due to:

- higher production volumes, and realized natural gas prices coupled with lower royalties and interest and financing costs;
- partially offset by lower realized hedging gains, and higher operating, transportation, G&A and current tax expenses.

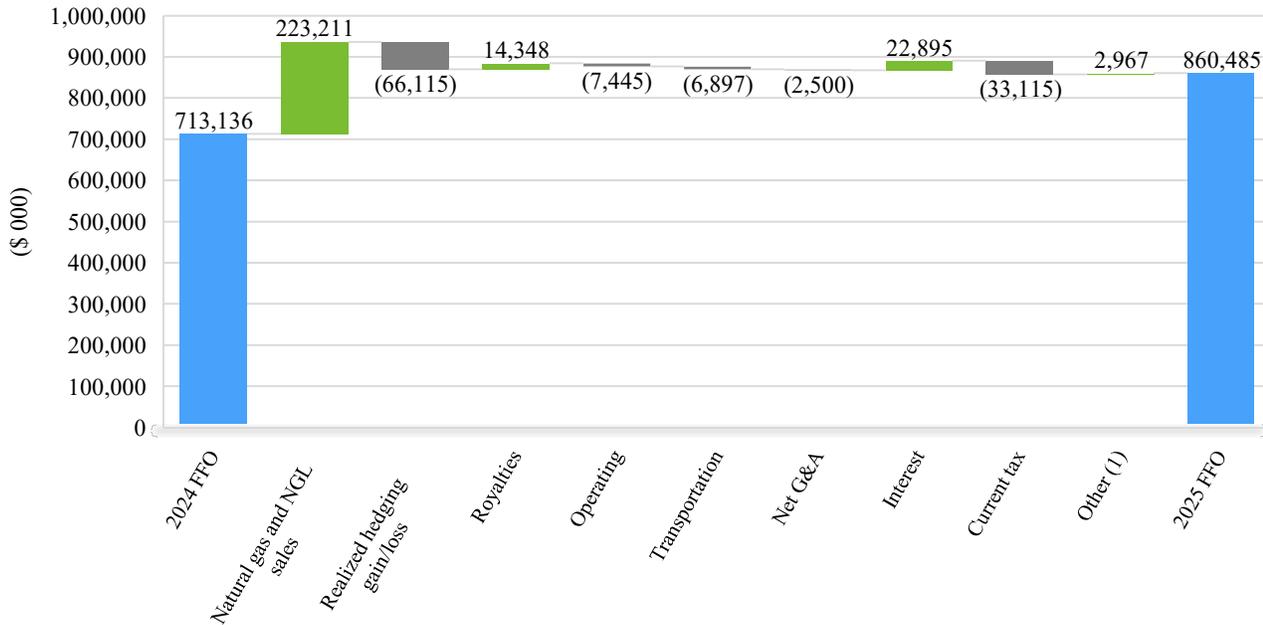

Funds from operations is a non-GAAP financial measure, refer to the section entitled "Non-GAAP and Other Financial Measures" for additional information contained within this MD&A.

**Change in Funds from Operations
Three Months December 31, 2025**

(1) "Other" includes other income, net marketing revenue, and realized gain/loss on foreign exchange

**Change in Funds from Operations
Year End December 31**

(1) "Other" includes other income, net marketing revenue, and realized gain/loss on foreign exchange

Free Funds Flow

Peyto uses free funds flow, defined as cash flow from operating activities before changes in non-cash operating working capital, provision for performance-based compensation, and transaction costs, less total capital expenditures, as an indicator of the funds available for capital allocation. For the three months and year ended December 31, 2025, free funds flow was \$102.0 million and \$375.2 million, respectively, compared to \$79.7 million and \$247.1 million for the same periods of 2024. Free funds flow is a non-GAAP financial measure, refer to the section entitled "Non-GAAP and Other Financial Measures" for additional information contained within this MD&A.

Earnings

The Company's earnings in the three months and year ended December 31, 2025, rose to \$125.9 million and \$418.6 million from \$78.2 million and \$280.6 million for the same periods of 2024. These increases were primarily driven by:

- higher sales revenue and an increased unrealized foreign exchange gain, along with lower royalties and financing costs;
- partially offset by lower realized hedging gains, realized losses on foreign exchange, and higher operating, transportation, performance-based compensation, G&A, depletion and depreciation, and income taxes.

Capital Expenditures

Peyto invested \$142.1 million in total capital expenditures for the fourth quarter of 2025. The Company drilled 24 wells (22.5 net), completed 28 wells (26.5 net) and brought 26 wells (24.5 net) on production for drilling, completions, equipping and tie-in capital of \$122.0 million. Facilities and pipeline projects totaled \$18.9 million in the quarter, which included the completion and commissioning of a new field compressor station in the Swanson area, compressor upgrades at several gas plants, and pipeline de-bottlenecking projects in the Nosehill and Swanson areas of Sundance.

For the year ended December 31, 2025, capital expenditures totaled \$475.2 million, an increase of 4% compared to \$457.6 million for the year ended December 31, 2024. Peyto drilled 82 gross (78.4 net) horizontal wells and completed 76 gross (72.4 net) wells in the year for drilling, completions, equipping and tie-in capital of \$386.4 million, or 81% of total capital expenditures. Facilities and major pipeline projects totaled \$86.2 million, included the construction of a new field compressor station in the Swanson area, a new pipeline to connect third-party volumes to Peyto's Brazeau plant for long-term fee income, and optimization and de-bottlenecking projects.

The following table summarizes capital expenditures for the three months and year ended December 31, 2025 and 2024:

(\$000)	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Land	365	841	-57%	2,113	1,811	17%
Seismic	549	440	25%	529	884	-40%

(1) This is a non-GAAP measure or ratio. Refer to the section entitled "Non-GAAP and Other Financial Measures" contained within this MD&A for further information.

LIQUIDITY AND CAPITAL RESOURCES

Net Debt

Net debt is a non-GAAP financial measure used by the Company in monitoring and assessing its capital structure. Net debt as at December 31, 2025, and December 31, 2024 are summarized as follows:

(\$000)	As at December 31, 2025	As at December 31, 2024
Long-term debt	1,074,273	1,295,238
Current assets	(360,297)	(394,517)
Current liabilities	365,910	269,609
Financial derivative instruments - current	111,682	188,136
Current portion of lease obligation	(991)	(936)
Decommissioning provision - current	(13,000)	(8,956)
Net debt ⁽¹⁾	1,177,577	1,348,574

(1) This is non-GAAP financial measure. Refer to the section entitled "Non-GAAP and Other Financial Measures" contained within this MD&A for further information

Peyto's net debt of \$1.18 billion as at December 31, 2025, decreased by \$171.0 million from December 31, 2024.

The Company's 2026 capital expenditure budget has been approved at \$450 to \$500 million. Peyto believes funds from operations based on current strip pricing, together with available borrowings under the revolving credit facility will be sufficient to maintain dividends, finance current operations, and fund the planned capital expenditure program.

The total amount of capital invested in 2026 will be driven by the number and quality of projects generated. Capital will only be invested if it meets the long-term return objectives of the Company. The majority of the capital program will involve drilling, completion and tie-in of lower risk development gas wells. Peyto's rapidly scalable business model has the flexibility to match planned capital expenditures to actual cash flow.

Current and Long-Term Debt

(\$000)	As at December 31, 2025	As at December 31, 2024
Revolving credit facility	690,000	760,000
Term Loan	-	106,000
Long-term senior secured notes	489,824	492,556
Current and long-term debt, before deferred financing costs	1,179,824	1,358,556
Deferred financing costs	(5,551)	(5,463)
Total current and long-term debt	1,174,273	1,353,093
Current portion of long-term debt	100,000	57,855
Long-term debt	1,074,273	1,295,238

On October 23, 2025, the Company entered into an agreement with its syndicate of lenders to amend and extend its credit facilities, which increased the revolving operating facility (the "Revolving Credit Facility") to \$1.05 billion. The maturity date of the Revolving Credit Facility was extended to October 23, 2029, and consists of a \$40 million working capital tranche and a \$1,010 million production line, available on a revolving basis. Additionally, effective October 23, 2025, Peyto repaid the \$50 million outstanding balance under its amortizing term facility (the "Term Loan") using proceeds from the increased Revolving Credit Facility and terminated the Term Loan.

Borrowings under the Revolving Credit Facility bears interest at Canadian bank prime or US base rate, or, at Peyto's option, Canadian dollar CORRA advances or US dollar SOFR loan rates, plus adjustments and applicable margin.

The Company had \$9.1 million Letters of Credit outstanding at December 31, 2025 (\$6.6 million at December 31, 2024).

Peyto is subject to financial covenants as defined in the credit facility and note purchase agreements. The Company's financial covenants include financial measures defined within its revolving credit facility agreement that are not defined under the Accounting Standards. These financial measures are defined in the amended credit facility agreement as follows:

- Total Debt: includes long-term debt and subordinated debt plus bank overdraft and letters of credit.
- Senior Debt: includes long-term debt plus bank overdraft and letters of credit.
- EBITDA: trailing twelve-month net income before non-cash items, interest, and income taxes.

Financial covenant	Limit	December 31, 2025	December 31, 2024
Total Debt to EBITDA	Less than 4.0	1.16	1.57
Senior Debt to EBITDA	Less than 3.5	1.16	1.57
Interest coverage	Greater than 3.0	13.76	8.93

Peyto is in compliance with all financial covenants at December 31, 2025.

Outstanding secured senior notes as at December 31, 2025 are as follows:

Senior Secured Notes	Date Issued	Rate	Maturity Date
\$100 million (CAD)	January 3, 2019	4.39%	January 3, 2026
\$100 million (CAD)	January 2, 2018	3.95%	January 2, 2028
\$40 million (USD)	October 29, 2021	3.98%	October 29, 2028
\$160 million (CAD)	October 24, 2023	6.46%	October 24, 2030
\$75 million (CAD)	October 17, 2024	5.638%	October 17, 2034

On January 5, 2026, Peyto issued \$100 million of senior secured notes. The notes have a coupon rate of 5.03% and mature on January 5, 2033. The notes were issued by way of a private placement pursuant to a note purchase agreement and rank equally with Peyto's obligations under its bank facility and existing note purchase and private shelf agreement. Interest will be paid semi-annually in arrears. Proceeds from the notes were used to repay the \$100 million, 4.39% notes that matured on January 3, 2026.

Capital

Authorized: Unlimited number of voting common shares

Issued and Outstanding

Common Shares (no par value)	Number of Common Shares	Amount \$'000
Balance, December 31, 2024	197,829,480	1,977,905
Common shares issued under stock option plan	5,228,703	70,862
Private placement	211,761	3,519
Issued on settlement of DSU's	73,547	661
Contributed surplus on exercised of stock options	-	15,031
Common share issuance costs (net of tax)	-	(196)
Balance, December 31, 2025	203,343,491	2,067,782

For the year ended December 31, 2025 the Company issued 5,228,703 common shares under its stock option program for proceeds of \$70.9 million. Additionally, on April 14, 2025, Peyto closed a private placement issuing 211,761 common shares, at price of \$16.62 per common share, to employees and officers of the Company for proceeds of \$3.5 million.

Total Payout Ratio

"Total payout ratio" is a non-GAAP measure which is calculated as the sum of dividends declared plus total capital expenditures and decommissioning expenditures, divided by funds from operations. This ratio represents the percentage of total capital expenditures, decommissioning expenditures and dividends that is funded by cashflow. Management uses this measure, among others, to assess the sustainability of Peyto's dividend and capital program. Refer to the section entitled "Non-GAAP and Other Financial Measures" in this MD&A for further information.

(\$000, except total payout ratio)	Three Months Ended December 31			Year Ended December 31		
	2025	2024	% Change	2025	2024	% Change
Total dividends declared	66,921	65,140	3%	264,941	258,369	3%
Total capital expenditures ⁽¹⁾	142,093	117,525	21%	475,171	457,607	4%
Decommissioning expenditures	849	1,836	-54%	10,115	8,446	20%
Total payout ⁽¹⁾	209,863	184,501	14%	750,227	724,422	4%
Funds from operations ⁽¹⁾	244,968	199,079	23%	860,485	713,136	21%
Total payout ratio ⁽¹⁾	86%	93%	-7%	87%	102%	-14%

(1) This is a non-GAAP financial measure. Refer to the section entitled "Non-GAAP and Other Financial Measures" contained within this MD&A for further information.

Contractual Obligations

In addition to those recorded on the Company's balance sheet, the following is a summary of Peyto's contractual obligations and commitments as at December 31, 2025:

(\$000)	2026	2027	2028	2029	2030	Thereafter
Interest payments ⁽¹⁾	20,926	20,743	16,937	14,565	13,703	16,914
Transportation commitments	117,986	94,880	61,907	45,484	39,502	397,471
Operating leases	2,429	2,436	2,438	2,539	2,569	2,884
Methanol	6,909	-	-	-	-	-
Total	148,250	118,059	81,282	62,588	55,774	417,269

(1) Fixed interest payments on senior secured notes

Related Party Transactions

Certain directors of Peyto are considered to have significant influence over other reporting entities that Peyto engages in commercial transactions with. Such services are provided in the normal course of business and at market rates. These directors are not involved in the day-to-day operational decision making of the Company. The dollar value of the transactions between Peyto and each of the related reporting entities is summarized below:

Expense (Income) (\$000)		Accounts Payable (Accounts Receivable) (\$000)	
Year ended December 31		As at December 31	
2025	2024	2025	2024
(693)	1,952	32	6

RISK FACTORS

Investors who purchase common shares are participating in the total returns from a portfolio of western Canadian natural gas producing properties. As such, the total returns earned by investors and the value of the shares are subject to numerous risks inherent in the oil and natural gas industry.

Expected returns depend largely on the volume of petroleum and natural gas production and the price received for such production, along with the associated costs. The price received for oil depends on a number of factors, including West Texas Intermediate oil prices, Canadian/US currency exchange rates, quality differentials and Edmonton par oil prices. The price received for natural gas production is dependent on current Alberta, Henry Hub, Malin, Dawn, Chicago, Ventura, and Emerson market prices and Canadian/US currency exchange rates. Peyto's marketing strategy is designed to smooth out short-term fluctuations in the price of natural gas through future sales. It is meant to be methodical and consistent and to avoid speculation.

Although Peyto's focus is on internally generated drilling programs, any acquisition of oil and natural gas assets depends on an assessment of value at the time of acquisition. Incorrect assessments of value can adversely affect dividends to shareholders and the value of the common shares. Peyto employs experienced staff and performs appropriate levels of due diligence on the analysis of acquisition targets, including a detailed examination of reserve reports; if appropriate, re-engineering of reserves for a large portion of the properties to ensure the results are consistent; site examinations of facilities for environmental liabilities; detailed examination of balance sheet accounts; review of contracts; review of prior year tax returns and modeling of the acquisition to attempt to ensure accretive results to the shareholders.

Inherent in development of the existing oil and gas reserves are the risks, among others, of drilling dry holes, encountering production or drilling difficulties or experiencing high decline rates in producing wells. To minimize these risks, Peyto employs experienced staff to evaluate and operate wells and utilize appropriate technology in operations. In addition, prudent work practices and procedures, safety programs and risk management principles, including insurance coverage protect Peyto against certain potential losses.

Peyto's operating costs could escalate and become uncompetitive due to supply chain disruptions, inflationary cost pressures, equipment limitations, escalating supply costs, commodity prices, and additional government intervention through stimulus spending or additional regulations. Peyto's inability to manage costs may impact project returns and future development decisions, which could have a material adverse effect on its financial performance and cash flows.

The cost or availability of oilfield services may adversely affect Peyto's ability to undertake exploration, development and construction projects. The crude oil and natural gas industry is cyclical in nature and is prone to shortages of supply of equipment and services including drilling rigs, geological and geophysical services, engineering and construction services, major equipment items for infrastructure projects, and construction materials generally. These materials and services may not be available when required at reasonable prices. A failure to secure the services and equipment necessary to Peyto's operations for the expected price, on the expected timeline, or at all, may have an adverse effect on Peyto's financial performance and cash flows.

Peyto routinely monitors its financial forecasts, capital spending, balance sheet and dividend policy and has the ability to make operational and financial changes to help ensure Peyto remains compliant with all financial covenants. If necessary, Peyto can request temporary relief from financial covenants from lenders. In the event Peyto does not comply with its financial covenants and lenders do not grant covenant relief, Peyto's access to capital could be restricted or repayment required.

The value of Peyto's common shares is based on, among other things, the underlying value of the oil and natural gas reserves. Geological and operational risks can affect the quantity and quality of reserves and the cost of ultimately recovering those reserves. Lower oil and gas prices increase the risk of write-downs on oil and gas property investments. In order to mitigate this risk, proven and probable oil and gas reserves are evaluated each year by a firm of independent reservoir engineers. Both the reserves committee and the Board of Directors reviews and approves the reserve report.

Access to markets may be restricted at times by pipeline or processing capacity. These risks are minimized by controlling as much of the processing and transportation activities as possible and ensuring transportation and processing contracts are in place with reliable cost-efficient counterparties.

The petroleum and natural gas industry is subject to extensive controls, regulatory policies and income and resource taxes imposed by various levels of government. These regulations, controls and taxation policies are amended from time to time. Peyto has no control over the level of government intervention or taxation in the petroleum and natural gas industry. Peyto operates in such a manner to ensure, to the best of its knowledge that it is in compliance with all applicable regulations and are able to respond to changes as they occur.

The petroleum and natural gas industry is subject to both environmental regulations and an increased environmental awareness. Peyto has reviewed its environmental risks and is, to the best of its knowledge, in compliance with the appropriate environmental legislation and have determined that there is no current material impact on operations. Peyto employs environmentally responsible business operations and looks to both Alberta provincial authorities and Canada's federal authorities for direction and regulation regarding environmental and climate change legislation.

Changes to the demand for oil and natural gas products and the rise of petroleum alternatives may negatively affect Peyto's financial condition, results of operations and cash flows. Fuel conservation measures, alternative fuel requirements, increasing consumer demand for alternatives to oil and natural gas and technological advances in fuel economy and renewable energy generation systems could reduce the demand for oil, natural gas and liquid hydrocarbons. Recently, certain jurisdictions have implemented policies or incentives to decrease the use of hydrocarbons and encourage the use of renewable fuel alternatives,

which may lessen the demand for petroleum products and put downward pressure on commodity prices. Advancements in energy efficient products have a similar effect on the demand for oil and natural gas products. Peyto cannot predict the impact of changing demand for oil and natural gas products, and any major changes may have a material adverse effect on Peyto's business, financial condition, results of operations and cash flow by decreasing Peyto's profitability, increasing its costs, limiting its access to capital and decreasing the value of its assets.

A number of factors, including the effects of the use of hydrocarbons on climate change, the impact of crude oil and natural gas operations on the environment, environmental damage relating to spills of crude oil products during production and transportation, and Indigenous rights, have affected certain investors' sentiments towards investing in the crude oil and natural gas industry. As a result of these concerns, some institutional, retail and governmental investors have announced that they are no longer funding or investing in crude oil and natural gas assets or companies, or are reducing the amount thereof over time. In addition, certain institutional investors are requesting that issuers develop and implement more robust ESG policies and practices. Developing and implementing such policies and practices can involve significant costs and require a significant time commitment from the Board, Management and employees of Peyto. Failing to implement the policies and practices, as requested by institutional investors, may result in such investors reducing their investment in Peyto, or not investing in Peyto at all. Any reduction in the investor base interested or willing to invest in the crude oil and natural gas industry and more specifically, Peyto, may result in limiting Peyto's access to capital, increasing the cost of capital, and decreasing the price and liquidity of Peyto's securities even if Peyto's operating results, underlying asset values, or cash flows have not changed.

Peyto is subject to financial market risk. In order to maintain substantial rates of growth, Peyto must continue reinvesting in, drilling for or acquiring petroleum and natural gas. The capital expenditure program is funded primarily through funds from operations, debt and, if appropriate, equity.

Information technology systems and cyber-security breaches of Peyto's cyber-security and loss of, or unauthorized access to, electronic data may adversely impact Peyto's operations and financial position. Peyto has become increasingly dependent upon the availability, capacity, reliability, and security of our information technology infrastructure and our ability to expand and continually update this infrastructure to conduct daily operations. Peyto depends on various information technology systems to estimate reserve quantities, process and record financial data, manage Peyto's land base, manage financial resources, analyze seismic information, administer contracts with operators and lessees, and communicate with employees and third-party partners.

Further, Peyto is subject to a variety of information technology and system risks as a part of its normal course operations, including potential breakdown, invasion, virus, cyber-attack, cyber-fraud, security breach, and destruction or interruption of Peyto's information technology systems by third parties or insiders. Unauthorized access to these systems by employees or third parties could lead to corruption or exposure of confidential, fiduciary or proprietary information, interruption to communications or operations or disruption to business activities, or Peyto's competitive position. In addition, cyber-phishing attempts, in which a malicious party attempts to obtain sensitive information such as usernames, passwords, credit card and banking details, or approval of wire transfer requests by disguising as a trustworthy entity in an electronic communication, have become more widespread and sophisticated in recent years.

Increasingly, social media is used as a vehicle to carry out cyber-phishing attacks. Information posted on social media sites, for business or personal purposes, may be used by attackers to penetrate Peyto's systems and obtain confidential information. Peyto provides employees with social media guidelines that align with its Code of Business Conduct and Ethics Policy. Despite these efforts, as social media continues to grow in influence and access to social media platforms becomes increasingly prevalent, there are significant risks that Peyto may not be able to properly regulate social media use and preserve adequate records of business activities.

If Peyto becomes a victim to a cyber-phishing attack it could result in a loss or theft of Peyto's financial resources or critical data and information, or could result in a loss of control of Peyto's technological infrastructure or financial resources. Peyto's employees are often the targets of such cyber-phishing attacks, as they are and will continue to be targeted by parties using fraudulent "spoof" emails to misappropriate information or to introduce viruses or other malware through "Trojan horse" programs to Peyto's computers. These emails appear to be legitimate emails, but direct recipients to fake websites operated by the sender of the email or request recipients to send a password or other confidential information through email or to download malware.

Peyto maintains policies and procedures that address and implement employee protocols with respect to electronic communications and electronic devices and conducts regular cyber-security risk assessments and training and education programs for its employees. Peyto also employs encryption protection of its confidential information on all computers and other electronic devices. Despite Peyto's efforts to mitigate such cyber-phishing attacks through education and training, cyber-phishing activities remain a serious problem that may damage its information technology infrastructure. Peyto applies technical

and process controls in line with industry-accepted standards to protect its information, assets and systems, including a written incident response plan for responding to a cybersecurity incident. However, these controls may not adequately prevent cybersecurity breaches. Disruption of critical information technology services, or breaches of information security, could have a negative effect on Peyto's performance and earnings, as well as its reputation, and any damages sustained may not be adequately covered by Peyto's current insurance coverage, or at all. The significance of any such event is difficult to quantify, but may in certain circumstances be material and could have a material adverse effect on Peyto's business, financial condition, and results of operations.

On June 20, 2024, amendments to the Competition Act (Canada) came into force with the adoption of Bill C-59, An Act to Implement Certain Provisions of the Fall Economic Statement which impact environmental and climate disclosures by businesses. As a result of these amendments, certain public representations by a business regarding the benefits of the work it is doing to protect or restore the environment or mitigate the environmental and ecological causes or effects of climate change may violate the Competition Act's deceptive marketing practices provisions. These amendments include substantial financial penalties and, effective June 20, 2025, a private right of action which will permit private parties to seek an order from the Competition Tribunal under the deceptive marketing practices provisions. Uncertainty surrounding the interpretation and enforcement of this legislation may expose the Company to increased litigation and financial penalties, the outcome and impacts of which can be difficult to assess or quantify and may have a material adverse effect on the Company's business, reputation, financial condition, and results.

There is a risk that (i) the tariffs that are currently in effect on goods exported from or imported into Canada continue in effect for an extended period of time, the tariffs that have been threatened are implemented, that tariffs that are currently suspended are reactivated, the rate or scope of tariffs are increased, or new tariffs are imposed, including on oil and natural gas, (ii) the U.S. and/or Canada imposes any other form of tax, restriction or prohibition on the import or export of products from one country to the other, including on oil and natural gas, and (iii) the tariffs imposed or threatened to be imposed by the U.S. on other countries and retaliatory tariffs imposed or threatened to be imposed by other countries on the U.S., will trigger a broader global trade war which could have a material adverse effect on the Canadian, U.S. and global economies, and by extension the Canadian oil and natural gas industry and the Company, including by decreasing demand for (and the price of) oil and natural gas, disrupting supply chains, increasing costs, causing volatility in global financial markets, and limiting access to financing.

For a detailed discussion of the risks, uncertainties and industry conditions associated with Peyto's business, refer to the Company's Annual Information Form, which is available under Peyto's SEDAR+ profile at www.sedarplus.ca and at www.peyto.com.

CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer have designed, or caused to be designed under their supervision, disclosure controls and procedures to provide reasonable assurance that: (i) material information relating to the Company is made known to the Company's Chief Executive Officer and Chief Financial Officer by others, particularly during the period in which the annual and interim filings are being prepared; and (ii) information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted by it under securities legislation is recorded, processed, summarized and reported within the time period specified in securities legislation. Such officers have evaluated, or caused to be evaluated under their supervision, the effectiveness of the Company's disclosure controls and procedures at the year end of the Company and have concluded that the Company's disclosure controls and procedures are effective at the financial period end of the Company for the foregoing purposes.

Internal Control over Financial Reporting

The Company's Chief Executive Officer and Chief Financial Officer have designed, or caused to be designed under their supervision, internal control over financial reporting to provide reasonable assurance regarding the reliability of the Company's financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. Such officers have evaluated, or caused to be evaluated under their supervision, the effectiveness of the Company's internal control over financial reporting at the financial period end of the Company and concluded that the Company's internal control over financial reporting is effective, at the financial period end of the Company, for the foregoing purpose.

Peyto is required to disclose herein any change in Peyto's internal control over financial reporting that occurred during the year ended December 31, 2025 that has materially affected, or is reasonably likely to materially affect, Peyto's internal control over financial reporting. No material changes in Peyto's internal control over financial reporting were identified during such period that has materially affected, or are reasonably likely to materially affect, Peyto's internal control over financial reporting.

It should be noted that a control system, including the Company's disclosure and internal controls and procedures, no matter how well conceived, can provide only reasonable, but not absolute, assurance that the objectives of the control system will be met and it should not be expected that the disclosure and internal controls and procedures will prevent all errors or fraud.

OFF-BALANCE SHEET FINANCING

Peyto does not have any guarantees or off-balance sheet arrangements that have been excluded from the balance sheets other than commitments disclosed in the "Contractual Obligations" section of this MD&A.

CRITICAL ACCOUNTING ESTIMATES

Reserve Estimates

Estimates of oil and natural gas reserves, by necessity, are projections based on geologic and engineering data, and there are uncertainties inherent to the interpretation of such data as well as the projection of future rates of production and the timing of development expenditures. Reserve engineering is an analytical process of estimating underground accumulations of oil and natural gas that can be difficult to measure. The accuracy of any reserve estimate is a function of the quality of available data, engineering and geological interpretation and judgment. Estimates of economically recoverable oil and natural gas reserves and future net cash flows necessarily depend upon a number of variable factors and assumptions, such as historical production from the area compared with production from other producing areas, the assumed effects of regulations by governmental agencies and assumptions governing future oil and natural gas prices, future royalties and operating costs, development costs and workover and remedial costs, all of which may in fact vary considerably from actual results. For these reasons, estimates of the economically recoverable quantities of oil and natural gas attributable to any particular group of properties, classifications of such reserves based on risk recovery, and estimates of the future net cash flows expected there from may vary substantially. Any significant variance in the assumptions could materially affect the estimated quantity and value of the reserves, which could affect the carrying value of Peyto's oil and natural gas properties and the rate of depletion of the oil and natural gas properties as well as the calculation of the reserve value based compensation. Actual production, revenues and expenditures with respect to Peyto's reserves will likely vary from estimates, and such variances may be material.

Peyto's estimated quantities of proved and probable reserves at December 31, 2025 were evaluated by independent petroleum engineers GLJ Ltd.

Depletion and Depreciation Estimate

All costs of exploring for and developing petroleum and natural gas reserves, together with the costs of production equipment, are capitalized and then depleted and depreciated on the unit-of-production method based on proved plus probable reserves. Petroleum and natural gas reserves and production are converted into equivalent units based upon estimated relative energy content (6 mcf to 1 barrel of oil). Costs for gas plants and other facilities are capitalized and depreciated on a declining balance basis.

Impairment of Long-Lived Assets

Impairment is indicated if the carrying value of the long-lived asset or oil and gas cash generating unit exceeds its recoverable amount under the Accounting Standards. If impairment is indicated, the amount by which the carrying value exceeds the estimated fair value of the long-lived asset is charged to earnings. The determination of the recoverable amount for impairment purposes under the Accounting Standards involves the use of numerous assumptions and judgments including future net cash flows from oil and gas reserves, future third-party pricing, inflation factors, discount rates and other uncertainties. Future revisions to these assumptions impact the recoverable amount.

Decommissioning Provision

The decommissioning provision is estimated based on existing laws, contracts or other policies. The fair value of the obligation is based on estimated future costs for abandonment and reclamation discounted at a risk-free interest rate. The liability is adjusted each reporting period to reflect the passage of time and for revisions to the estimated future cash flows, with the accretion charged to earnings. By their nature, these estimates are subject to measurement uncertainty and the impact on the financial statements could be material.

Reserve Value Performance Based Compensation

The reserve value-based compensation is calculated using the year end independent reserves evaluation which was completed in February 2026. A quarterly provision for the reserve value-based compensation is calculated using estimated proved producing reserve additions adjusted for changes in debt, equity and dividends. Actual proved producing reserves additions and forecasted commodity prices could vary significantly from those estimated and may have a material effect on the calculation.

Income Taxes

The determination of the Company's income and other tax liabilities requires interpretation of complex laws and regulations often involving multiple jurisdictions. All tax filings are subject to audit and potential reassessment after the lapse of considerable time. Accordingly, the actual income tax liability may differ significantly from that estimated and recorded.

Accounting Changes

Voluntary changes in accounting policy are made only if they result in financial statements which provide more reliable and relevant information. Accounting policy changes are applied retrospectively unless it is impractical to determine the period or cumulative impact of the change. Corrections of prior period errors are applied retrospectively and changes in accounting estimates are applied prospectively by including these changes in earnings. When the Company has not applied a new primary source of GAAP that has been issued, but is not effective, the Company will disclose the fact along with information relevant to assessing the possible impact that application of the new primary source of GAAP will have on the financial statements in the period of initial application.

ADDITIONAL INFORMATION

Additional information relating to Peyto Exploration & Development Corp. can be found on SEDAR+ at www.sedarplus.ca and www.Peyto.com.

NON-GAAP AND OTHER FINANCIAL MEASURES

Throughout this MD&A and in other materials disclosed by the Company, Peyto employs certain measures to analyze financial performance, financial position, and cash flow. These non-GAAP and other financial measures do not have any standardized meaning prescribed under the Accounting Standards and therefore may not be comparable to similar measures presented by other entities. The non-GAAP and other financial measures should not be considered to be more meaningful than GAAP measures which are determined in accordance with the Accounting Standards, such as net income (loss), cash flow from operating activities, and cash flow used in investing activities, as indicators of Peyto's performance.

Non-GAAP Financial Measures

Funds from Operations

"Funds from operations" is a non-GAAP measure which represents cash flows from operating activities before changes in non-cash operating working capital, decommissioning expenditure, provision for performance-based compensation and transaction costs, if any. Management considers funds from operations and per share calculations of funds from operations to be key measures as they demonstrate the Company's ability to generate the cash necessary to pay dividends, repay debt and make capital investments. Management believes that by excluding the temporary impact of changes in non-cash operating working capital, funds from operations provides a useful measure of Peyto's ability to generate cash that is not subject to short-term movements in operating working capital. The most directly comparable GAAP measure is cash flows from operating activities.

(\$000)	Three Months Ended December 31		Year Ended December 31	
	2025	2024	2025	2024
Cash flows from operating activities	238,751	186,236	857,562	672,741
Change in non-cash working capital	(5,115)	757	(25,175)	16,699
Decommissioning expenditures	849	1,836	10,115	8,446
Performance based compensation	10,483	10,250	17,983	15,250
Funds from operations	244,968	199,079	860,485	713,136

Free Funds Flow

Peyto uses "free funds flow" as an indicator of the efficiency and liquidity of Peyto's business, measuring its funds after capital investment available to manage debt levels, pay dividends, and return capital to shareholders through activities such as share repurchases. Peyto calculates free funds flow as cash flows from operating activities before changes in non-cash operating working capital, provision for performance-based compensation, and transaction costs, less total capital expenditures, allowing Management to monitor its free funds flow to inform its capital allocation decisions. The most directly comparable GAAP

measure to free funds flow is cash from operating activities. The following table details the calculation of free funds flow and the reconciliation from cash flow from operating activities to free funds flow.

(\$000)	Three Months Ended December 31		Year Ended December 31	
	2025	2024	2025	2024
Cash flows from operating activities	238,751	186,236	857,562	672,741
Change in non-cash working capital	(5,115)	757	(25,175)	16,699
Performance based compensation	10,483	10,250	17,983	15,250
Total capital expenditures	(142,093)	(117,525)	(475,171)	(457,607)
Free funds flow	102,026	79,718	375,199	247,083

Total Capital Expenditures

Peyto uses the term "total capital expenditures" as a measure of capital investment in exploration and production activity, as well as property acquisitions and divestitures, and such spending is compared to the Company's annual budgeted capital expenditures. The most directly comparable GAAP measure for total capital expenditures is cash flow used in investing activities. The following table details the calculation of cash flow used in investing activities to total capital expenditures.

(\$000)	Three Months Ended December 31		Year Ended December 31	
	2025	2024	2025	2024
Cash flows used in investing activities	135,701	134,269	452,454	432,243
Change in prepaid capital	(1,214)	(2,261)	3,256	1,209
Change in non-cash working capital relating to investing activities	7,606	(14,483)	19,461	24,155
Total capital expenditures	142,093	117,525	475,171	457,607

Net Debt

"Net debt" is a non-GAAP financial measure that is the sum of long-term debt and working capital excluding the current financial derivative instruments, current portion of lease obligations and current portion of decommissioning provision. It is used by management to analyze the financial position and leverage of the Company. Net debt is reconciled to long-term debt which is the most directly comparable GAAP measure.

(\$000)	As at	As at
	December 31, 2025	December 31, 2025
Long-term debt	1,074,273	1,295,238
Current assets	(360,297)	(394,517)
Current liabilities	365,910	269,609
Financial derivative instruments - current	111,682	188,136
Current portion of lease obligation	(991)	(936)
Decommissioning provision - current	(13,000)	(8,956)
Net debt	1,177,577	1,348,574

Net Marketing Revenue

Peyto uses the term "net marketing revenue" to evaluate the profitability of products purchased from third parties that are resold. Net marketing revenue is calculated as marketing revenue less marketing purchases. In reporting for prior periods, marketing revenue and marketing purchases were reported as "sales of natural gas and natural gas liquids from third parties" and "natural gas and natural gas liquids purchased from third parties."

(\$000)	Three Months Ended December 31		Year Ended December 31	
	2025	2024	2025	2024
Marketing revenue	4,499	8,038	23,118	51,023
Marketing purchases	(3,199)	(6,776)	(19,553)	(47,793)
Net marketing revenue	1,300	1,262	3,565	3,230

Non-GAAP Financial Ratios

Funds from Operations per Share

Peyto presents funds from operations per share by dividing funds from operations by the Company's diluted or basic weighted average common shares outstanding. "Funds from operations" is a non-GAAP financial measure. Management believes that funds from operations per share provides investors an indicator of funds generated from the business that could be allocated to each shareholder's equity position.

Netback per MCFE and BOE

"Netback" is a non-GAAP measure that represents the profit margin associated with the production and sale of petroleum and natural gas. Peyto computes "field netback per Mcfe" as commodity sales from production, plus net marketing revenue, if any, plus other income, less royalties, operating, and transportation expenses, divided by production. "Cash netback" is calculated as "field netback" less interest, less general and administration expense and plus or minus realized gain on foreign exchange, divided by production. "After-tax cash netback" is calculated as "cash netback" less current tax, divided by production. Netbacks are per-unit-of-production measures used to assess Peyto's performance and efficiency.

(\$/Mcf)	Three Months Ended December 31		Year Ended December 31	
	2025	2024	2025	2024
Gross Sale Price	3.90	3.24	3.68	3.12
Realized hedging gain (loss)	0.72	1.04	0.85	1.14
Net Sale Price	4.62	4.28	4.53	4.26
Net Marketing revenue	0.02	0.02	0.01	0.01
Other income	0.07	0.03	0.05	0.04
Royalties	(0.18)	(0.21)	(0.16)	(0.22)
Operating costs	(0.49)	(0.50)	(0.52)	(0.53)
Transportation	(0.30)	(0.27)	(0.30)	(0.30)
Field netback	3.74	3.35	3.61	3.26
G&A	(0.05)	(0.05)	(0.06)	(0.05)
Interest and financing	(0.21)	(0.33)	(0.25)	(0.36)
Realized gain (loss) on foreign exchange	(0.01)	0.01	(0.01)	0.01
Cash netback (\$/Mcf)	3.47	2.98	3.29	2.86
Current Tax	(0.32)	(0.28)	(0.36)	(0.27)
After tax cash netback (\$/Mcf)	3.15	2.70	2.93	2.59
After tax cash netback (\$/boe)	18.91	16.21	17.59	15.55

Net Marketing Revenue per Mcfe

"Net marketing revenue per Mcfe" comprises marketing revenue less marketing purchases, as determined in accordance with the Accounting Standards, divided by the Company's total production.

Total Payout Ratio

"Total payout ratio" is a non-GAAP measure which is calculated as the sum of dividends declared plus total capital expenditures and decommissioning expenditures, divided by funds from operations. This ratio represents the percentage of the capital expenditures, decommissioning expenditures and dividends that is funded by cashflow. Management uses this measure, among others, to assess the sustainability of Peyto's dividend and capital program.

(\$000, except total payout ratio)	Three Months Ended December 31		Year Ended December 31	
	2025	2024	2025	2024
Total dividends declared	66,921	65,140	264,941	258,369
Total capital expenditures	142,093	117,525	475,171	457,607
Decommissioning expenditures	849	1,836	10,115	8,446
Total payout	209,863	184,501	750,227	724,422
Funds from operations	244,968	199,079	860,485	713,136
Total payout ratio (%)	86%	93%	87%	102%

Supplementary Financial Measures

"Diversification activities" are the costs of the basis on physical natural gas sales contracts that access various hubs including Ventura, Emerson 2, Malin, Dawn, Chicago and Henry Hub, divided the Company's natural gas production.

"DD&A expense per Mcfe and boe" is comprised of DD&A expense, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"Gross sale price" is comprised of natural gas and natural gas liquids sales, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"G&A expense per Mcfe and boe" is comprised of G&A expense, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"Interest and financing expense per Mcfe and boe" is comprised of interest and financing expense, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"Liquids production to sales gas ratio" is comprised of NGLs production, divided by the Company's natural gas production.

"Net sale price" is comprised of natural gas and natural gas liquids sales including hedging gains or losses, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"Operating expense per Mcfe and boe" is comprised of operating expense, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"Other income per Mcfe" is comprised of other income, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"Production per million common shares" is comprised of the Company's total production divided by the basic weighted average number of shares outstanding for the period.

"Realized condensate and pentanes plus price" is comprised of condensate and pentanes commodity sales from production, as determined in accordance with the Accounting Standards, divided by the Company's condensate and pentanes production.

"Realized gain on foreign exchange per Mcfe" is comprised of realized gain on foreign exchange, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"Realized natural gas price" is comprised of natural gas commodity sales from production, as determined in accordance with the Accounting Standards, divided by the Company's natural gas production.

"Realized NGLs price" is comprised of NGLs commodity sales from production, as determined in accordance with the Accounting Standards, divided by the Company's NGLs production.

"Royalties as a percentage of sales" is comprised of royalties, as determined in accordance with the Accounting Standards, divided by commodity sales from production as determined in accordance with the Accounting Standards.

"Royalties per Mcfe and boe" is comprised of royalties, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"Sale price" is comprised of total commodity sales from production including hedging gains or losses, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"Total dividends per common share" is comprised of dividends declared, as determined in accordance with the Accounting Standards, divided by the number of shares outstanding at the dividend record date.

"Total realized hedging gain (loss) per Mcfe and boe" is comprised of realized gain (loss) on derivative financial instruments, as determined in accordance with the Accounting Standards, divided by the Company's total production.

"Transportation per Mcfe and boe" is comprised of transportation expense, as determined in accordance with the Accounting Standards, divided by the Company's total production

FORWARD-LOOKING STATEMENTS

Certain statements contained in this MD&A constitute forward-looking statements or forward-looking information (collectively, "forward-looking statements") within the meaning of applicable Canadian securities laws. These forward-looking statements relate to future events or Peyto's future performance. All statements other than statements of historical fact are forward-looking statements. The use of any of the words "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "potential", "should", "believe" and similar expressions are intended to identify forward-looking statements. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. These statements speak only as of the date of this MD&A.

Forward-looking statements are based on a number of factors and assumptions which have been used to develop such forward-looking statements but which may prove to be incorrect. Although Peyto believes that the expectations reflected in such forward-looking statements are reasonable, undue reliance should not be placed on forward-looking statements because Peyto can give no assurance that such expectations will prove to be correct. In addition to other factors and assumptions which may be identified in this MD&A, assumptions have been made regarding, among other things: the impact of increasing competition; the general stability of the economic and political environment in which Peyto operates; the timely receipt of any required regulatory approvals; the ability of Peyto to obtain qualified staff, equipment and services in a timely and cost efficient manner; drilling results; the ability of the operator of the projects which Peyto has an interest in to operate the field in a safe, efficient and effective manner; the ability of Peyto to obtain financing on acceptable terms; field production rates and decline rates; the ability to replace and expand oil and natural gas reserves through acquisitions, development and exploration; the timing and costs of pipeline, storage and facility construction and expansion and the ability of Peyto to secure adequate product transportation; future oil and natural gas prices; currency, exchange and interest rates; the regulatory framework regarding royalties, taxes, environmental and climate change matters in the jurisdictions in which Peyto operates; and the ability of Peyto to successfully market its oil and natural gas products.

In particular, this MD&A contains forward-looking statements pertaining to the following:

- Peyto's 2026 capital expenditure program of \$450 to \$500 million;
- Peyto's belief that funds from operations based on current strip pricing, together with available borrowings under the credit facility will be sufficient to maintain dividends, finance current operations, and fund the planned capital expenditure program;
- the existence, operation and strategy of Peyto's commodity price risk management program; and
- the approximate and maximum amount of forward sales and hedging to be employed by Peyto.

The actual results could differ materially from those anticipated in these forward-looking statements as a result of the risk factors set forth below and elsewhere in this MD&A:

- public health risks;
- volatility in market prices for oil and natural gas;
- fluctuations in foreign exchange or interest rates and stock market volatility;
- loss of markets;
- changes to the Company's capital budget;
- liabilities inherent in oil and natural gas operations;
- uncertainties associated with estimating oil and natural gas reserves;
- risks and uncertainties associated with Peyto's oil and natural gas exploration and development program;
- competition for, among other things, capital, acquisitions of reserves, undeveloped lands and skilled personnel;
- incorrect assessments of the value of acquisitions and exploration and development programs;
- geological, technical, drilling and processing problems;
- restrictions and/or limitations on transportation, including pipeline systems;
- uncertainties associated with changes in legislation, including, but not limited to, changes in income tax laws, tariffs, threat of tariffs, oil and natural gas royalty and regulatory frameworks and climate change laws and frameworks; and
- the other factors discussed under "Risk Factors" in Peyto's latest Annual Information Form.

Statements relating to reserves are deemed to be forward-looking statements as they involve the implied assessment, based on current estimates and assumptions, that the reserves described can be profitably produced in the future. The foregoing lists of factors are not exhaustive. The forward-looking statements contained in this MD&A are expressly qualified by this cautionary statement. Peyto does not undertake any obligation to publicly update or revise any forward-looking statements, except as required by applicable securities law.

CONVERSION RATIO

Natural gas liquids volumes are recorded in barrels of oil (bbl) and are converted to a thousand cubic feet equivalent (Mcf) using a ratio of six (6) thousand cubic feet to one (1) barrel of oil (bbl). Natural gas volumes recorded in thousand cubic feet (mcf) are converted to barrels of oil equivalent (boe) using the ratio of six (6) thousand cubic feet to one (1) barrel of oil (bbl). Boe may be misleading, particularly if used in isolation. A boe conversion ratio of 6 Mcf:1 bbl is based in an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. In addition, given that the value ratio based on the current price of oil as compared with natural gas is significantly different from the energy equivalent of six to one, utilizing a boe conversion ratio of 6 Mcf:1 bbl may be misleading as an indication of value.

GLOSSARY

The following is a list of abbreviations that may be used in this MD&A:

Measurement

bbl barrel

bbl/d barrels per day

Mbbl thousand barrels

MMbbl million barrels

boe (1) barrels of oil equivalent

boe/d (1) barrels of oil equivalent per day

Mboe (1) thousands of barrels of oil equivalent

MMboe (1) millions of barrels of oil equivalent

Mcf thousand cubic feet

Mcf/d thousand cubic feet per day

Mcfe thousand cubic feet of gas equivalent

MMcf million cubic feet

MMcf/d million cubic feet per day

Bcf billion cubic feet

MMBtu million British thermal units

GJ gigajoule

NM not meaningful number

Independent Auditor's Report

To the Shareholders of Peyto Exploration & Development Corp.

Opinion

We have audited the consolidated financial statements of Peyto Exploration & Development Corp. (the "Company"), which comprise the consolidated balance sheets as at December 31, 2025 and 2024, and the consolidated income statements, statements of comprehensive income, statements of changes in equity and statements of cash flows for the years then ended, and notes to the consolidated financial statements, including material accounting policy information (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2025 and 2024, and its financial performance and its cash flows for the years then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB").

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

A key audit matter is a matter that, in our professional judgment, was of most significance in our audit of the consolidated financial statements for the year ended December 31, 2025. This matter was addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

Property, Plant and Equipment - Oil and natural gas properties - Refer to Note 4 in the financial statements

Key Audit Matter Description

The Company's property, plant and equipment includes oil and natural gas properties. Oil & natural gas properties are depleted using the unit-of-production basis ("depletion") based on total estimated proved plus probable oil and natural gas reserves. The Company engages an independent reservoir engineer to estimate oil and natural gas reserves using estimates, assumptions and engineering data. The development of the Company's proved plus probable oil and natural gas reserves used to determine depletion requires management to make significant estimates and assumptions related to future oil and natural gas prices, reserves, and future operating and development costs.

Given the significant judgments made by management related to future oil and natural gas prices, reserves, and future operating and development costs, these estimates and assumptions are subject to a high degree of estimation uncertainty. Auditing these estimates and assumptions required auditor judgement in applying audit procedures and in evaluating the results of those procedures.

How the Key Audit Matter Was Addressed in the Audit

Our audit procedures related to future oil and natural gas prices, reserves, and future operating and development costs used to determine depletion included the following, among others:

- Evaluated future oil and natural gas prices by independently developing a reasonable range of forecasts based on reputable third-party forecasts and market data and comparing those to the future prices selected by management.
- Evaluated the Company's independent reservoir engineer by examining reports and assessing their scope of work and findings and assessing the competence, capability and objectivity by evaluating their relevant professional qualifications and experience.
- Evaluated the reasonableness of reserves by testing the source financial information underlying the reserves and comparing the reserve volumes to historical production volumes.
- Evaluated the reasonableness of future operating and development costs by testing the source financial information underlying the estimate, comparing future operating and development costs to historical results, and evaluating whether they are consistent with evidence obtained in other areas of the audit.

Other Information

Management is responsible for the other information. The other information comprises Management's Discussion and Analysis.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in this auditor's report. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Company as a basis for forming an opinion on the financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Mandeep Singh.

Peyto Exploration & Development Corp.

Notes to Consolidated Financial Statements

As at December 31, 2025 and 2024

(Amounts in \$ thousands, except as otherwise noted)

1. Nature of operations

Peyto Exploration & Development Corp and its subsidiaries (together "Peyto" or the "Company") is a Calgary based oil and natural gas company. Peyto conducts exploration, development and production activities in Canada. Peyto is incorporated and domiciled in the Province of Alberta, Canada. The address of its head office is 300, 600 – 3rd Avenue SW, Calgary, Alberta, Canada, T2P 0G5.

These consolidated financial statements were approved and authorized for issuance by the Board of Directors of Peyto on March 10, 2026.

2. Basis of presentation

These consolidated financial statements ("consolidated financial statements") as at and for the years ended December 31, 2025 and December 31, 2024 represent the Company's results and financial position in accordance with IFRS® Accounting Standards (the "Accounting Standards") as issued by the International Accounting Standards Board ("IASB")

a) Summary of material accounting policies

The precise determination of many assets and liabilities is dependent upon future events and the preparation of periodic consolidated financial statements necessarily involves the use of estimates and approximations. Accordingly, actual results could differ from those estimates. The consolidated financial statements have, in management's opinion, been properly prepared within reasonable limits of materiality and within the framework of the Company's basis of presentation as disclosed.

b) Management Judgements and Estimation Uncertainty

The timely preparation of the consolidated financial statements in conformity with IFRS requires that management make estimates and assumptions and use judgment regarding the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Such estimates primarily relate to unsettled transactions and events as of the date of the consolidated financial statements. Accordingly, actual results may differ from estimated amounts as future confirming events occur.

Climate change and the evolving worldwide demand for alternative sources of energy that are not sourced from fossil fuels could result in a change in assumptions used in determining the recoverable amount and could affect the carrying value of the related assets. As these issues become more advanced and regulation changes by governments, future financial performance may be impacted. This also presents uncertainty and risk with respect to the Company, its performance and estimates and assumptions. The timing in which global energy markets transition from carbon based sources to alternative energy or when new regulatory practices may be implemented is highly uncertain. Changes to assumptions could result in a material adjustment to the carrying amount of assets and liabilities within the next financial year.

Depletion and recoverability of oil and natural gas properties

Depletion, performance-based compensation and recoverability of oil and natural gas properties are based on estimates of proved plus probable reserves and future development costs required to develop those reserves. By their nature, these estimates of reserves, including the estimates of future prices and production costs, required capital expenditures and the related future cash flows are subject to measurement uncertainty, and the impact in the consolidated financial statements of future periods could be material.

The recoverability of oil and natural gas properties carrying values is assessed at the cash generating unit ("CGU") level. The determination of CGUs requires judgment in defining a group of assets that generate cash inflows that are largely independent of the cash inflows from other assets or groups of assets. CGUs are determined by shared infrastructure, commodity type, similar exposure to market risks and materiality.

In assessing the recoverability of oil and natural properties, each CGU's carrying value is compared to its recoverable amount, defined as the greater of its fair value less cost of disposal ("FVLCD") and value in use ("VIU"). Management has determined that Peyto's asset base represents one CGU as its properties are in close proximity to each other, with interconnected infrastructure, similar cost structure and aggregated marketing arrangements. Peyto applies information on estimates of future commodity prices, expected production volumes, quantity of reserves and resources, future development costs, future operating costs, discount rates and income taxes when determining an acceptable range of recoverable amounts.

Oil and natural gas properties are reviewed for impairment at a CGU level when indicators of impairment exist. When indicators of impairment exist, the carrying value of each CGU is compared to its recoverable amount which is defined as the higher of its FVLCD or its VIU. VIU is estimated as the present value of the future cash flows expected to arise from the continuing use of a CGU or an asset. FVLCD is the amount that would be realized from the disposition of an asset or CGU in an arm's length transaction between knowledgeable and willing parties. FVLCD is based on the discounted after-tax cash flows of reserves using forward prices and costs, consistent with Company's independent qualified reserves evaluators and may consider an evaluation of comparable asset transactions.

Key estimates used in determining cash flows from the Company's reserves include:

- Reserves - Assumptions that are valid at the time of reserve estimation may change significantly when new information becomes available. Changes in forward price estimates, production costs, required capital expenditures or recovery rates may change the economic status of reserves and may ultimately result in reserves being restated.
- Crude oil and natural gas prices - Forward price estimates are used in the discounted cash flow model. These prices are adjusted for quality differentials, heat content and distance to market. Commodity prices can fluctuate for a variety of reasons including supply and demand fundamentals, inventory levels, exchange rates, weather, economic and geopolitical factors.
- Discount rate - The discount rate used to calculate the net present value of cash flows is based on estimates of an industry peer group weighted average cost of capital as appropriate for each CGU being tested. Changes in the general economic environment could result in significant changes to this estimate.

Decommissioning provision

The decommissioning provision is based on estimated inflation and discount rates, current legal requirements, technology, cost of services and expected plans for remediation expenditures. These obligations extend decades into the future, so the ultimate cost and timing are uncertain. Future changes in environmental regulations, the development of new remediation technologies, changes in commodity price inflation, or shifts in field operating plans could materially affect the estimated liability. The Company monitors such factors and updates the decommissioning provision as required.

Derivative financial instruments

The estimated fair value of derivative financial instruments resulting in financial assets and liabilities is reliant upon forward prices. Any change in the forward price curves could result in a change to the estimated valuation of the instruments.

Stock-based compensation

All equity settled, share-based awards issued by the Company are recorded at fair value using the Black Scholes option-pricing model or Monte Carlo simulation model. In assessing the fair value of equity-based compensation, estimates are made regarding the expected volatility in share price, option life, dividend yield, risk-free rate and estimated forfeitures at the initial grant date.

Income Taxes

Tax regulations and legislation are subject to change and differing interpretations requiring management judgement. Deferred tax assets are recognized when it is considered probable that deductible temporary differences will be recovered in future periods, which requires management judgement. Deferred tax liabilities are recognized when it is considered probable that the tax on temporary differences will be payable to tax authorities in future periods, which requires management judgement. Income tax filings are subject to audits and reassessments and changes in facts, circumstances and interpretations of the regulations and legislation may result in a material increase or decrease in the Company's provision for income taxes.

c) Presentation currency

All amounts in these consolidated financial statements are expressed in Canadian dollars, as this is the functional and presentation currency of the Company.

d) Cash Equivalents

Cash equivalents include term deposits or a similar type of instrument, with a maturity of three months or less when purchased.

e) Jointly controlled operations and assets

Certain activities of the Company are conducted jointly with others where the participants have a direct ownership interest in, and jointly control, the related assets. Accordingly, the accounts of Peyto reflect only its working interest share of revenues, expenses and capital expenditures related to these jointly controlled assets.

Processing and gathering recoveries related to joint operations reduces operating expenses.

f) Exploration and evaluation assets

Pre-license costs

Costs incurred prior to obtaining the legal right to explore for hydrocarbon resources are expensed in the period in which they are incurred. The Company has no pre-license costs.

Exploration and evaluation costs

Once the legal right to explore has been acquired, costs directly associated with an exploration well are capitalized as exploration and evaluation intangible assets until the drilling of the well is complete and the results have been evaluated. All such costs are subject to technical feasibility, commercial viability and management review as well as review for impairment at least once a year to confirm the continued intent to develop or otherwise extract value from the discovery. The Company has no exploration or evaluation assets.

g) Property, plant and equipment

All property, plant and equipment are stated at cost, less accumulated depreciation and accumulated impairment charges.

The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, the initial estimate of the decommissioning provision and borrowing costs for qualifying assets. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset. Costs include expenditures on the construction, installation or completion of infrastructure such as well sites, pipelines and facilities including activities such as drilling, completion and tie-in costs, equipment and installation costs, associated geological and human resource costs, including unsuccessful development or delineation wells.

Depletion and depreciation

Oil and natural gas properties are depleted on a unit-of-production basis over proved plus probable reserves. All costs related to oil and natural gas properties (net of salvage value) and estimated costs of future development of proved plus probable undeveloped reserves are depleted using the unit-of-production method based on proved plus probable reserves as determined by independent reservoir engineers. For purposes of the depletion calculation, relative volumes of petroleum and natural gas production and reserves are converted at the energy equivalent conversion rate of six thousand cubic feet of natural gas to one barrel of crude oil.

Gas processing facilities are depreciated using a declining balance method over useful life of 20 years.

h) Business Combination

Management's determination of whether a transaction constitutes a business combination or asset acquisition is determined based on the criteria in IFRS 3 Business Combinations ("IFRS 3"). Business combinations are accounted for using the acquisition method of accounting. Management makes estimates of the acquisition-date fair value of assets acquired and liabilities assumed which includes assessing the estimated fair value of oil and natural gas properties (included in property, plant and equipment) derived from estimated recoverable quantities of proved plus probable reserves and the related cash flows being acquired. Transaction costs incurred are expensed.

i) Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of fair value less costs to sell or value-in-use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is assessed as part of a CGU. If the carrying amount of an asset or CGU exceeds its recoverable amount, the asset or CGU is considered impaired and is written down to its recoverable amount. In assessing value-in-use, the estimated future cash flows are discounted to their present value using a after- tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded securities or other available fair value indicators.

Impairment charges of continuing operations are recognized in the income statement.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment charges may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depletion, had no impairment charge been recognized for the asset in prior years.

j) Financial instruments

The Company has classified each financial instrument into the following categories: "Amortized Cost, Fair Value through Other Comprehensive Income and Fair Value through Profit and Loss". On initial recognition, financial instruments are measured at fair value. Measurement in subsequent periods depends on the classification of the financial instrument as described below:

The Company has made the following classifications:

Financial Assets & Liabilities	Category
Cash	Fair value through profit or loss
Accounts Receivable	Amortized cost
Accounts Payable and Accrued Liabilities	Amortized cost
Dividends Payable	Amortized cost
Long Term Debt	Amortized cost
Derivative Financial Instruments (non-hedged)	Fair value through profit or loss ("FVTPL")
Derivative Financial Instruments (hedged)	Fair value through other comprehensive income ("FVOCI")

Impairment of Financial Assets

Impairment of financial assets is determined by measuring the assets' expected credit loss ("ECL"). Accounts receivable are due within one year or less; therefore, these financial assets are not considered to have a significant financing component and a lifetime ECL is measured at the date of initial recognition of the accounts receivable. ECL allowances have not been recognized for cash and cash equivalents due to the virtual certainty associated with their collection. The ECL pertaining to accounts receivable is assessed at initial recognition and this provision is reassessed at each reporting date. ECLs are probability-weighted estimates of all possible default events related to the financial asset (over the lifetime or within 12 months after the reporting period, as applicable) and are measured as the difference between the present value of the cash flows due to Peyto and the cash flows the Company expects to receive, including cash flows expected from collateral and other credit enhancements that are a part of contractual terms. In making an assessment as to whether financial assets are credit-impaired, the Company considers historically realized bad debts, evidence of a debtor's present financial condition and whether a debtor has breached certain contracts, the probability that a debtor will enter bankruptcy or other financial reorganization, changes in economic conditions that correlate to increased levels of default, the number of days a debtor is past due in making a contractual payment, and the term to maturity of the specified receivable. The carrying amounts of financial assets are reduced by the amount of the ECL through an allowance account and losses are recognized in the statements of income.

Derivative financial instruments

Derivative financial instruments are utilized by the Company to manage economic risk to market risk against volatility in commodity prices. All derivative financial instruments are initiated within the guidelines of the Company's risk management policy. This includes linking all derivatives to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. The Company's policy is not to utilize derivative instruments for speculative purposes. The estimated fair value of all derivative financial instruments is based on quoted market prices or, in their absence, third-party market indications and forecasts.

All derivative financial instruments, other than those designated as effective hedging instruments, are classified as FVTPL and are recorded at fair value. Derivative financial instruments that do not qualify as hedges, or are not designated as hedges, are recorded using mark-to-market accounting whereby instruments are recorded in the consolidated balance sheets as either an asset or liability with changes in fair value recognized in earnings (loss) as unrealized gain or loss on derivative financial instruments. Realized gains and losses on these instruments are recorded in the consolidated income statements in the period they occur. Derivative instruments that have been designated as effective hedging instruments are further classified as either fair value or cash flow hedges (see "Hedging").

Embedded derivatives

An embedded derivative is a component of a contract that causes some of the cash flows of the combined instrument to vary in a way similar to a stand-alone derivative. This causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified variable, such as interest rate, financial instrument price, commodity price, foreign exchange rate, a credit rating or credit index, or other variables to be treated as a financial derivative.

Normal purchase or sale exemption

Contracts that were entered into and continue to be held for the purpose of the receipt or delivery of a non-financial item in accordance with the Company's expected purchase, sale or usage requirements fall within the exemption from IAS 32 *Financial Instruments: Presentation* ("IAS 32"), which is known as the 'normal purchase or sale exemption'. The Company recognizes such contracts in its balance sheet only when one of the parties meets its obligation under the contract to deliver either cash or a non-financial asset.

k) Hedging

At the inception of a derivative transaction, if the Company elects to use hedge accounting, formal designation and documentation is required. The documentation must include: identification of the hedged item or transaction, the hedging instrument, the nature of the risk being hedged, the Company's risk management objective and strategy for undertaking the hedge and how the Company will assess the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item.

A hedge is assessed at inception and at the end of each reporting period to ensure that it is highly effective in offsetting changes in fair values or cash flows of the hedged item. For a fair value hedge, the gain or loss from remeasuring the hedging instrument at fair value is recognized immediately in net loss with the offsetting gain or loss on the hedged item. When fair value hedge accounting is discontinued, the carrying amount of the hedging instrument is deferred and amortized to net loss over the remaining maturity of the hedged item.

For a cash flow hedge, the effective portion of the gain or loss is recorded in other comprehensive income. Any hedge or portion of a hedge that is ineffective is immediately recognized in earnings (loss). Hedge accounting is discontinued on a prospective basis when the hedging relationship no longer qualifies for hedge accounting. Any gain or loss on the hedging instrument resulting from the discontinuation of a cash flow hedge is deferred in other comprehensive income until the forecasted transaction date. If the forecasted transaction date is no longer expected to occur, the gain or loss is recognized in net loss in the period of discontinuation.

The Company has chosen to designate its existing derivative financial instruments as cash flow hedges.

l) Inventories

Inventories are stated at the lower of cost and net realizable value. Cost of producing oil and natural gas is accounted on a weighted average basis. This cost includes all costs incurred in the normal course of business in bringing each product to its present location and condition.

m) Provisions

General

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the income statement net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability.

Decommissioning provision

The Company's activities give rise to future dismantling, decommissioning, and site restoration obligations. A provision is recognized for these costs based on the present value of management's best estimate of the expenditures required to settle the obligation at the end of an asset's useful life. This estimate incorporates assumptions on the scope of work, when decommissioning occurs, future inflation, and a risk-free rate. The resulting present value is capitalized as part of the cost of the related oil and natural gas asset and is depreciated over the asset's useful life. Subsequent changes in the estimated obligation can result from updates to the expected cost, scope or timing of decommissioning activities, or changes in the inflation or discount rates. Such revisions are added to or deducted from the carrying amount of the associated assets prospectively, where those assets are no longer in use or have been fully impaired, changes are recognized immediately in profit or loss. The provision is also increased over time as the discount unwinds, with this accretion recognized in finance costs. Actual restoration expenditures are charged against the provision as incurred.

n) Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date, in Canada.

Current income tax relating to items recognized directly in equity is recognized in equity and not in the income statement. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax

The Company follows the liability method of accounting for income taxes. Under this method, income tax assets and liabilities are recognized for the estimated tax consequences attributable to differences between the amounts reported in the consolidated financial statements and their respective tax bases, using enacted or substantively enacted tax rates expected to apply when the asset is realized, or the liability settled. Deferred income tax assets are only recognized to the extent it is probable that sufficient future taxable income will be available to allow the deferred income tax asset to be realized. Accumulated deferred income tax balances are adjusted to reflect changes in income tax rates that are enacted or substantively enacted with the adjustment being recognized in earnings in the period that the change occurs, except for items recognized in equity.

o) Revenue recognition

Revenue associated with the sale of natural gas and natural gas liquids is measured based on the consideration specified in contracts with customers. Revenue from contracts with customers is recognized when Peyto satisfies a performance obligation by transferring a promised good or service to a customer. A good or service is transferred when the customer obtains control of that good or service. The transfer of control of natural gas and natural gas liquids usually coincides with title passing to the customer and the customer taking physical possession.

Peyto principally satisfies its performance obligations at a point in time. Joint venture partners are not considered customers and therefore processing and gathering recoveries related to joint operations are netted against operating expenses.

At times, Peyto may purchase commodity products from third parties to fulfill sales commitments; Peyto subsequently sells these products to its customers. These transactions are presented as sales and purchases of natural gas and natural

gas liquids from third parties on the statements of income.

Marketing revenue and marketing purchases

Peyto purchases natural gas liquid mix from third parties, transports and fractionates the product, and sells the natural gas liquid components. The marketing revenue and marketing purchases of the third-party natural gas liquids are recorded gross for financial statement presentation purposes.

p) Share-based payments

Peyto has three equity-settled share-based compensation plans: stock options, deferred share units (“DSUs”), and the total shareholder return rights plan (“TSRRP”). The stock option plan is available to employees, officers, and consultants and is settled in equity. The DSU plan, designated for the Board of Directors, is also equity-settled. The TSRRP is offered to employees, officers, and consultants, and may be settled in either cash or equity at the discretion of the Board of Directors. TSRRP issued to non-officers are time-vested only. Officers of the Company will be subject to performance conditioning metrics on 50% of the Rights granted to them. Peyto intends to settle in-the-money rights held by employees and officers in common shares and accounts for these as equity-settled. Rights held by consultants are intended to be settled in cash and are therefore accounted for as cash settled.

Compensation expense for equity-settled awards is based on the grant-date fair value and recognized over the vesting period, with a corresponding increase to contributed surplus. Fair value is determined using the Black-Scholes option pricing model for stock options, DSUs, and TSRRP awards. For TSRRP rights with performance conditions issued to officers, a Monte Carlo simulation model is used. Upon vesting, the related contributed surplus is credited to shareholders’ capital.

Rights intended to be cash-settled are measured at the fair value of liability on the grant date and accrued over the vesting period. The liability is measured at each reporting date using the Black-Scholes model.

q) Earnings per share

Basic earnings per share is computed by dividing the earnings (loss) available to common shareholders by the weighted average number of shares outstanding during the reporting period.

Diluted earnings per share is calculated by adjusting the weighted average number of common shares outstanding for the dilutive common shares related to the Company’s share-based compensation plans which could have a dilutive impact on earnings during the year. The number of shares included is computed using the treasury stock method, whereby the common shares are assumed to be purchased at the average market price.

r) Share capital

Common shares are classified within equity. Incremental costs directly attributable to the issuance of shares are recognized as a deduction from share capital.

s) Future Accounting Pronouncements

Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instrument: Disclosures

In May 2024, the IASB issued amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures relating to settling financial liabilities using an electronic payment system and assessing contractual cash flow characteristics of financial assets. The amendments will be effective on January 1, 2026, but are not expected to have a material impact on the Company’s financial statements.

IFRS 18 Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18 Presentation and Disclosure in Financial Statements (“IFRS 18”), which will replace IAS 1 and includes requirements for all entities applying IFRS Accounting Standards for the presentation and disclosure of information in the financial statements. IFRS 18 will introduce new totals, subtotals, and categories for income and expenses in the statement of income, as well as requiring disclosure about management-defined performance measures and additional requirements regarding the aggregation and disaggregation of certain information. It will be effective on January 1, 2027, with earlier adoption permitted, and it must be adopted on a retrospective basis. The Company is currently evaluating the impact on its financial statements.

3. Property, plant and equipment

Cost	
At December 31, 2023	8,406,481
Additions	456,872
Asset dispositions, net of acquisitions	(474)
ROU Asset	5,504
Change in decommissioning provision	88,328
At December 31, 2024	8,956,711
Additions	473,349
Asset dispositions, net of acquisitions	(1,434)
Change in decommissioning provision	(59,984)
At December 31, 2025	9,368,642
Accumulated depletion and depreciation	
At December 31, 2023	(3,516,294)
Depletion and depreciation	(377,689)
At December 31, 2024	(3,893,983)
Depletion and depreciation	(387,533)
At December 31, 2025	(4,281,516)
Carrying amount at December 31, 2024	5,062,728
Carrying amount at December 31, 2025	5,087,126

During 2025, Peyto capitalized \$12.2 million (2024- \$11.9 million) of general and administrative expense directly attributable to exploration and development activities.

At December 31, 2025, the Company identified no indicators of impairment and therefore a test was not performed.

4. Current and long-term debt

	December 31, 2025	December 31, 2024
Revolving Credit Facility	690,000	760,000
Term Loan	-	106,000
Long-term senior secured notes	489,824	492,556
Current and long-term debt, before deferred financing costs	1,179,824	1,358,556
Deferred financing costs	(5,551)	(5,463)
Total current and long-term debt	1,174,273	1,353,093
Current portion of long-term debt	100,000	57,855
Long-term debt	1,074,273	1,295,238

On October 23, 2025, the Company entered into an agreement with its syndicate of lenders to amend and extend its credit facilities, which increased the revolving operating facility (the "Revolving Credit Facility") to \$1.05 billion. The maturity date of the Revolving Credit Facility was extended to October 23, 2029, and consists of a \$40 million working capital tranche and a \$1,010 million production line, available on a revolving basis. Additionally, effective October 23, 2025, Peyto repaid the \$50 million outstanding balance under its amortizing term facility (the "Term Loan") using proceeds from the increased Revolving Credit Facility and terminated the Term Loan.

Borrowings under the Revolving Credit Facility bears interest at Canadian bank prime or US base rate, or, at Peyto's option, Canadian dollar CORRA advances or US dollar SOFR loan rates, plus adjustments and applicable margin.

The Company had \$9.1 million Letters of Credit outstanding at December 31, 2025 (\$6.6 million at December 31, 2024).

Peyto is subject to the following financial covenants as defined in the credit facility, term loan and senior secured note agreements:

- Long-term debt and subordinated debt plus bank overdraft and letters of credit not to exceed 4.0 times trailing twelve-month net income before non-cash items, interest and income taxes;
- Long-term debt plus bank overdraft and letters of credit not to exceed 3.5 times trailing twelve-month net income before non-cash items, interest, and income taxes.
- Trailing twelve months net income before non-cash items, interest, and income taxes to exceed 3.0 times trailing twelve months interest expense.

Peyto is in compliance with all financial covenants at December 31, 2025.

Outstanding senior notes are as follows:

Senior Secured Notes	Date Issued	Rate	Maturity Date
\$100 million (CAD)	January 3, 2019	4.39%	January 3, 2026
\$100 million (CAD)	January 2, 2018	3.95%	January 2, 2028
\$40 million (USD)	October 29, 2021	3.98%	October 29, 2028
\$160 million (CAD)	October 24, 2023	6.46%	October 24, 2030
\$75 million (CAD)	October 17, 2024	5.638%	October 17, 2034

Senior secured notes in the amount of \$100 million with a coupon rate of 4.39% mature on January 3, 2026, and are classified as a current liability.

On January 5, 2026, Peyto issued \$100 million of senior secured notes. The notes have a coupon rate of 5.03% and mature on January 5, 2033. The notes were issued by way of a private placement pursuant to a note purchase agreement and rank equally with Peyto's obligations under its bank facility and existing note purchase and private shelf agreement. Interest will be paid semi-annually in arrears. Proceeds from the notes were used to repay the \$100 million, 4.39% notes that matured on January 3, 2026.

Total interest and financing costs for 2025 was \$75.7 million (2024 - \$97.7 million) and the weighted average borrowing rate for 2025 was 5.9% (2024 - 7.1%).

5. Decommissioning provision

The Company provides for the future cost of decommissioning wells and facilities on a discounted basis based on the timing of abandonment and reclamation of these assets.

The Company has estimated the net present value of its total decommissioning provision to be \$312.5 million as at December 31, 2025 (2024 - \$369.3 million) based on a total escalated future undiscounted liability of \$1,046.1 million (2024 - \$971.7 million). At December 31, 2025, management estimates that these payments are expected to be made over the next 50 years (2024 - 50 years) with the majority of payments being made in years 2042 to 2076. The Bank of Canada's long-term bond rate of 3.85% (2024 - 3.33%) and an inflation rate of 2.0% (2024 - 2.0%) were used to calculate the present value of the decommissioning provision.

The following table reconciles the change in decommissioning provision:

Balance, December 31, 2023	279,913
New or increased provisions	5,274
Accretion of discount	9,457
Change in discount rate and estimates	83,054
Decommissioning expenditures	(8,446)
Balance, December 31, 2024	369,252
New or increased provisions	6,457
Accretion of discount	13,330
Change in discount rate and estimates	(66,441)
Decommissioning expenditures	(10,115)
Balance, December 31, 2025	312,483
Current	13,000
Non-current	299,483

The following table demonstrates the change in decommissioning provision as a result of a reasonably possible change in discount rates.

	Years ended December 31	
	2025	2024
Increase of one percent	(82,356)	(91,245)
Decrease of one percent	112,684	122,307

6. Equity

Share capital

Authorized: Unlimited number of voting common shares

Issued and Outstanding

	Number of Common Shares	Amount \$
Common Shares (no par value)		
Balance, December 31, 2024	197,829,480	1,977,905
Common shares issued under stock option plan	5,228,703	70,862
Private placement	211,761	3,519
Issued on settlement of DSU's	73,547	661
Contributed surplus on exercise of stock options	-	15,031
Common share issuance costs (net of tax)	-	(196)
Balance, December 31, 2025	203,343,491	2,067,782

Per share amounts

Basic and dilutive earnings per share have been calculated based upon the weighted average number of basic common shares outstanding.

	Years ended December 31	
	2025	2024
Weighted average common shares basic	200,720,890	195,737,374
Weighted average common shares diluted	203,130,517	197,084,973

Dividends

During the year ended December 31, 2025, Peyto declared \$1.32 per common share or \$0.11 per common share for the months of January to December 2025, totaling \$264.9 million (2024-\$1.32 per common share or \$0.11 per common share for the months of January to December totaling \$258.4 million).

On January 15, 2026, Peyto declared dividends of \$0.11 per common share that were paid on February 13, 2026. On February 13, 2026, Peyto declared dividends of \$0.11 per common share to be paid to shareholders of record on February 28, 2026. These dividends will be paid on March 13, 2026.

7. Operating expense

The Company's operating expenses include all costs with respect to day-to-day well and facility operations. Processing and gathering recoveries related to jointly owned production reduces gross field expenses to Peyto's operating expenses.

	Years ended December 31	
	2025	2024
Gross field expense	183,744	174,899
Cost recoveries related to processing and gathering of partner production	(30,956)	(29,556)
Operating expense	152,788	145,343

8. Finance costs

	Years ended December 31	
	2025	2024
Accretion of decommissioning provision	13,330	9,457
Financing expense	3,557	3,468
Lease interest	455	378
Interest	70,827	93,811
Finance costs	88,169	107,114

9. Performance-based compensation

Reserves value-based bonus

The reserves value-based bonus is 4% of the incremental increase in per share value, if any, as adjusted to reflect changes in debt, dividends, general and administrative costs and interest expense of proved producing reserves, calculated using un-escalated average realized prices of the current year and a discount rate of 8%. The Company recognized \$18.0 million for 2025 (2024 - \$15.3 million). The amount is recorded in Accounts payable and accrued liabilities.

10. Stock-based compensation

Total Shareholder Return Rights

In May 2025, the Company adopted, and shareholders approved the Total Shareholder Return Rights Plan ("TSRRP") to replace Peyto's stock option program as the Company's only security-based compensation arrangement for employees, executive officers and consultants. Under the TSRRP, participants are granted rights ("Rights") that vest ratably over three years. The future value of which is based on the difference between the market value of the common shares on the date of grant and the market value of the common shares on vesting date, plus the dividends paid to shareholders during such period. Plan participants who are executive officers of the Company will be subject to performance conditioning metrics on 50% of the Rights granted to them (the "Performance Rights"). Employees and officers are expected to settle any in-the-money rights through the issuance of common shares, which will be issued from treasury. Rights held by consultants are expected to be settled in cash. The TSRRP provides that the aggregate number of common shares issuable

thereunder and under all other security-based compensation arrangements of the Company at any time may not exceed 6.5% of the total number of issued and outstanding common shares from time to time.

Stock Options

The Company has a stock option plan allowing for the granting of stock options to officers, employees and consultants of the Company. Stock options were granted periodically with a three-year vesting period. At the vesting, recipients have thirty days to exercise options after which any unexercised options expire. With the adoption and approval of the TSRRP, Peyto has ceased granting new awards under the stock option plan. Outstanding stock options will vest, exercise or expire according to original grant agreements.

Deferred Share Units

Peyto has a deferred share unit ("DSU") plan, whereby DSUs may be issued to members of the Board of Directors. Each DSU is a notional unit equal in value to one Common Share, which entitles the holder to receive a common share upon redemption. DSUs vest immediately but can only be converted to a share upon the holder ceasing to be a Director of the Company. The expense associated with the DSU plan is determined based on the 5-day VWAP of Common Shares at the grant date. The expense is recognized in the income statement in the quarter in which the units are granted, with a corresponding charge to contributed surplus in the balance sheet.

Total Shareholder Return Rights Plan

The following tables summarize the Rights outstanding at December 31, 2025:

	TSRRP Rights		TSRRP Performance Rights	
	Number of Rights	Weighted average Grant price \$	Number of Rights	Weighted average Grant price \$
Balance, December 31, 2024	-	-	-	-
Rights granted	2,764,548	19.89	855,000	19.89
Forfeited	(6,600)	18.89	-	-
Balance, December 31, 2025	2,757,948	19.90	855,000	19.89
	December 31, 2025			
Fair value of Rights granted (weighted average)		\$3.68		\$3.45
Expected volatility		28.76%		28.76%
Average option life		2 years		2 years
Risk-free interest rate		2.57%		2.57%
Forfeiture rate		5.83%		5.83%
Dividend Yield		0%		0%

Rights will be granted throughout the year and vest 1/3 on each of the first, second and third anniversaries from the date of grant. At vesting, if the value of the right is greater than zero, the vested right shall become subject to payment in accordance with the TSRRP. At December 31, 2025, no Rights have vested.

Performance Rights will be granted throughout the year and vest 1/3 on each of the first, second and third anniversaries from the date of grant. At vesting, if the Company's total shareholder return for the performance period is greater than 8% per annum, the vested Performance Right shall become subject to payment in accordance with the TSRRP. If total shareholder return for the performance period is less than 8% per annum, the vested Performance Right's value will be deemed zero and participants will not be entitled to a payment. At December 31, 2025, no Performance Rights have vested.

Stock option plan

The following tables summarize the stock options outstanding at December 31, 2025:

		Weighted average exercise price \$
Balance, December 31, 2024	11,260,657	13.85
Stock options granted	1,623,000	16.71
Exercised	(5,228,703)	13.17
Forfeited	(20,784)	14.38
Expired	(106,964)	14.55
Balance, December 31, 2025	7,527,206	14.67

The Company estimates the fair value of stock options using the Black-Scholes pricing model. During the year ended December 31, 2025, the weighted-average fair value per option was \$1.89. The following tables summarize the assumptions used in the Black-Scholes model:

	December 31, 2025
Fair value of options granted (weighted average)	\$1.89
Expected volatility	30.26%
Average option life	2 years
Risk-free interest rate	2.89%
Forfeiture rate	6.51%
Dividend Yield	7.70%

Options vest 1/3 on each of the first, second and third anniversaries from the date of grant. At the vesting, recipients have thirty days to exercise options after which any unexercised options are expired.

At December 31, 2025, no stock options are exercisable.

The following tables summarize the DSUs outstanding at December 31, 2025:

Balance December 31, 2024	340,053
DSU granted	69,746
DSU settled	(73,547)
Balance December 31, 2025	336,252

11. Revenue and receivables

Peyto derives its revenue from contracts with customers primarily through the transfer of commodities at a point in time representing the following major product types:

	Years ended December 31	
	2025	2024
Natural gas sales	749,393	485,857
Natural gas liquid sales	331,045	371,370
Natural gas and natural gas liquid sales	1,080,438	857,227

	December 31, 2025	December 31, 2024
Accounts receivable from customers	144,599	113,780
Accounts receivable from realized derivative financial instruments	9,428	22,702
Accounts receivable from joint venture partners and other	9,843	11,079
Accounts Receivable	163,870	147,561

12. Income taxes

	Years Ended December 31	
	2025	2024
Earnings before income taxes	535,822	365,077
Statutory income tax rate	23.00%	23.00%
Expected income taxes	123,239	83,968
Increase (decrease) in income taxes from:		
Stock-based compensation ⁽¹⁾	(1,734)	2,310
True-up tax pools	(2,990)	(1,680)
Change in unrecognized deferred tax asset	(1,076)	(813)
Other	(203)	722
Total income tax expense	117,236	84,507
Current income tax expense	106,592	73,477
Deferred income tax expense	10,644	11,030
Total income tax expense	117,236	84,507

(1) Stock-based compensation includes a \$5.1 million deduction for non-qualifying stock option benefit deductions, offset by \$3.4 million of non-deductible stock-based compensation expense (2024 – \$0.9 million of non-qualifying stock option benefit deductions and \$3.2 million of non-deductible stock-based compensation expense).

The components of deferred income tax assets and liabilities are as follows:

	December 31, 2025	December 31, 2024
Property, plant and equipment in excess of tax basis	(910,709)	(913,489)
Derivative financial instruments	(28,440)	(54,459)
Share issuance costs	3,142	3,552
Long-term debt	608	922
Other	2,108	2,399
Decommission provision	71,871	84,220
Deferred income taxes	(861,420)	(876,855)

The following tables provide a continuity of deferred income taxes during the years ended December 31, 2025, and 2024:

	December 31, 2024	Recognized in Net Earnings	Acquired in Business Combination	Recognized in OCI/Equity	December 31, 2025
Property, plant and equipment in excess of tax basis	(913,489)	2,780	-	-	(910,709)
Derivative financial instruments	(54,459)	-	-	26,019	(28,440)
Share issuance costs	3,552	(410)	-	-	3,142
Long-term debt	922	(314)	-	-	608
Other	2,399	(291)	-	-	2,108
Provision for decommission provision	84,220	(12,349)	-	-	71,871
Deferred income taxes	(876,855)	(10,584)	-	26,019	(861,420)

	December 31, 2023	Recognized in Net Earnings	Acquired in Business Combination	Recognized in OCI/Equity	December 31, 2024
Property, plant and equipment in excess of tax basis	(880,521)	(32,968)	-	-	(913,489)
Derivative financial instruments	(84,498)	-	-	30,039	(54,459)
Share issuance costs	3,807	(255)	-	-	3,552
Long-term debt	388	534	-	-	922
Other	580	1,819	-	-	2,399
Provision for decommission provision	64,380	19,840	-	-	84,220
Deferred income taxes	(895,864)	(11,030)	-	30,039	(876,855)

At December 31, 2025, the Company has federal tax pools of approximately \$1,141 million (2024 - \$1,103 million) available for deduction against future income.

Deferred tax assets have not been recognized in respect of the following items because it is not probable that future taxable profits will be available against which the Company can use the benefits:

	Year ended December 31, 2025		Year ended December 31, 2024	
	Gross amount	Tax effect	Gross amount	Tax effect
Deductible temporary differences	56,367	12,964	63,270	14,552

13. Financial instruments

Financial instrument classification and measurement

Financial instruments of the Company carried on the balance sheet are carried at amortized cost with the exception of cash and derivative financial instruments. There are no significant differences between the carrying amount of financial instruments and their estimated fair values as at December 31, 2025 except for derivative financial instruments.

The fair value of the Company's cash and derivative financial instruments are quoted in active markets. The Company classifies the fair value of these transactions according to the following hierarchy.

- Level 1 – quoted prices in active markets for identical financial instruments.
- Level 2 – quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant and significant value drivers are observable in active markets.
- Level 3 – valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

The Company's cash and financial derivative instruments have been assessed on the fair value hierarchy described above and classified as Level 1 and Level 2, respectively.

Fair values of financial assets and liabilities

The Company's financial instruments include cash, deposits, accounts receivable, accounts payable and accrued liabilities, dividend payable, current portion of long-term debt, long-term debt, and derivative financial instruments. At December 31, 2025 and 2024, cash and derivative financial instruments are carried at fair value. Current assets and current liabilities approximate their fair value due to their short-term nature. The carrying value of the revolving credit facility approximates its fair value due to the floating rate of interest charged under the credit facility.

Market risk

Market risk is the risk that changes in market prices will affect the Company's earnings or the value of its financial instruments. Market risk is comprised of commodity price risk and interest rate risk. The objective of market risk management is to manage and control exposures within acceptable limits, while maximizing returns. The Company's objectives, processes, and policies for managing market risks have not changed from the previous year.

Commodity price risk management

Financial derivative instruments

The Company is a party to certain derivative financial instruments, including fixed price contracts. The Company enters into these contracts with well-established counterparties for the purpose of protecting a portion of its future earnings and cash flows from operations from the volatility of petroleum and natural gas prices. The Company believes the derivative financial instruments that do apply hedge accounting are effective, both at inception and over the term of the instrument, as the term and notional amount do not exceed the Company's firm commitment or forecasted transactions and the underlying basis of the instruments correlate highly with the Company's exposure.

Following is a summary of all derivative financial instruments in place at December 31, 2025:

Commodity contracts

Natural Gas – AECO 7A Monthly			
Index			Average Price
Period Hedged	Type	Daily Volume (GJ)	(CAD/GJ)
Q1 2026	Fixed Price	240,000	\$4.17
Q2 2026	Fixed Price	217,500	\$3.29
Q3 2026	Fixed Price	217,500	\$3.29
Q4 2026	Fixed Price	214,185	\$3.44
Q1 2027	Fixed Price	212,500	\$3.52

Q2 2027	Fixed Price	50,000	\$2.70
Q3 2027	Fixed Price	50,000	\$2.70
Q4 2027	Fixed Price	16,848	\$2.70

Natural Gas – NYMEX Henry Hub			Average Price
Period Hedged	Type	Daily Volume (MMBtu)	(USD/MMBtu)
Q1 2026	Fixed Price	140,000	\$4.18
Q2 2026	Fixed Price	190,000	\$3.75
Q3 2026	Fixed Price	190,000	\$3.75
Q4 2026	Fixed Price	113,750	\$4.04
Q1 2027	Fixed Price	75,000	\$4.42
Q2 2027	Fixed Price	75,000	\$3.59
Q3 2027	Fixed Price	75,000	\$3.59
Q4 2027	Fixed Price	25,272	\$3.59

Crude Oil – WTI CAD			Average Price
Period Hedged	Type	Daily Volume (bbl)	(CAD/bbl)
Q1 2026	Fixed Price	4,100	\$87.54
Q2 2026	Fixed Price	2,700	\$84.88
Q3 2026	Fixed Price	2,200	\$84.37
Q4 2026	Fixed Price	2,200	\$84.37
Q1 2027	Fixed Price	800	\$84.58
Q2 2027	Fixed Price	400	\$83.68
Q3 2027	Fixed Price	200	\$82.60
Q4 2027	Fixed Price	200	\$82.60

Crude Oil – WTI CAD			Put - Call
Period Hedged	Type	Daily Volume (bbl)	(CAD/bbl)
Q1 2026	Collar	500	\$85.00–\$100.00
Q2 2026	Collar	500	\$90.00–\$110.50

Propane - Conway			Average Price
Period Hedged	Type	Daily Volume (bbl)	(USD/bbl)
Q1 2026	Fixed Price	500	\$33.60

Had these contracts closed on December 31, 2025, Peyto would have realized a gain in the amount of \$123.3 million. If the gas price on December 31, 2025, were to increase by \$0.10/GJ, the unrealized gain would decrease by approximately \$21.1 million. An opposite change in commodity prices would result in an opposite impact on other comprehensive income

Foreign exchange contracts

Average Rate forward	Amount (USD)	Rate (CAD/USD)
Sold USD Contracts		
Q1 2026	\$51.7 million	1.3688
Q2 2026	\$40.0 million	1.3630
Q3 2026	\$40.0 million	1.3630
Q4 2026	\$16.5 million	1.3675
Q1 2027	\$4.8 million	1.3865
Q2 2027	\$12.0 million	1.3646
Q3 2027	\$12.0 million	1.3646
Q4 2027	\$4.0 million	1.3646

Had these contracts settled on December 31, 2025, Peyto would have realized a gain in the amount of \$0.7 million. If the CAD/USD FX rate on December 31, 2025 were to increase by 0.05, the unrealized gain would decrease by approximately \$9.0 million. An opposite change in the CAD/USD FX rate would result in an opposite impact on other comprehensive income.

Interest rate contracts

Term	Notional Amount	Peyto pays fixed rate	Peyto receives floating rate
March 17, 2023 to March 17, 2026 ⁽¹⁾	\$50 million	3.28%	CORRA
January 30, 2025 to January 30, 2028	\$50 million	2.67%	CORRA

(2) The March 17, 2023 interest rate contracts were modified in June 2024 with the transition of the underlying interest rate benchmark from the Canadian Dollar Offer Rate (CDOR) to the Canadian Overnight Repo Rate Average (CORRA).

Had these contracts closed on December 31, 2025, Peyto would have realized a loss in the amount of \$0.3 million.

Subsequent to December 31, 2025, Peyto entered into the following contracts:

Natural Gas – AECO 7A Monthly Index			
Period Hedged	Type	Daily Volume (GJ)	Average Price (CAD/GJ)
Q4 2026	Fixed Price	23,207	\$2.91
Q1 2027	Fixed Price	35,000	\$2.91
Q2 2027	Fixed Price	60,000	\$2.26
Q3 2027	Fixed Price	60,000	\$2.26
Q4 2027	Fixed Price	66,630	\$2.75
Q1 2028	Fixed Price	70,000	\$2.97

Natural Gas – NYMEX Henry Hub			
Period Hedged	Type	Daily Volume (MMBtu)	Average Price (USD/MMBtu)
Q4 2026	Fixed Price	39,783	\$4.19

Crude Oil – WTI CAD			
Period Hedged	Type	Daily Volume (bbl)	Average Price (CAD/bbl)
Q1 2026	Fixed Price	800	\$81.78
Q2 2026	Fixed Price	2,800	\$90.00
Q3 2026	Fixed Price	1,900	\$86.26
Q4 2026	Fixed Price	1,500	\$84.00
Q1 2027	Fixed Price	500	\$80.00
Q2 2027	Fixed Price	500	\$80.00
Q3 2027	Fixed Price	500	\$80.00
Q4 2027	Fixed Price	500	\$80.00

Crude Oil – WTI CAD			
Period Hedged	Type	Daily Volume (bbl)	Put - Call (CAD/bbl)
Q3 2026	Collar	500	\$75.00–\$89.15
Q4 2026	Collar	500	\$75.00–\$89.15
Q1 2027	Collar	500	\$75.00–\$87.25
Q2 2027	Collar	500	\$75.00–\$87.25
Q3 2027	Collar	500	\$75.00–\$87.25
Q4 2027	Collar	500	\$75.00–\$87.25

Foreign exchange contracts

Average Rate forward	Amount (USD)	Rate (CAD/USD)
Sold USD Contracts		
Q4 2026	\$6.0 million	1.3500
Q1 2027	\$9.0 million	1.3500
Q2 2027	\$4.8 million	1.3450
Q3 2027	\$4.8 million	1.3450
Q4 2027	\$1.6 million	1.3450

Interest rate risk

The Company is exposed to interest rate risk in relation to interest expense on its revolving credit facility. Peyto uses interest rate swaps on a portion of its floating rate debt to mitigate its interest rate exposure. If the weighted average borrowing rate were to increase by 100 bps (1%) it is estimated that the Company's earnings before income tax for the year ended December 31, 2025, would decrease by \$7.9 million. An opposite change in interest rates would result in an opposite impact on earnings before income tax.

Credit risk

A substantial portion of the Company's accounts receivable are with petroleum and natural gas marketing entities. Industry standard dictates that commodity sales are settled on the 25th day of the month following the month of production. The Company generally extends unsecured credit to purchasers, and therefore, the collection of accounts receivable may be affected by changes in economic or other conditions and may accordingly impact the Company's overall credit risk. Management believes the risk is mitigated by the size, reputation and diversified nature of the companies to which they extend credit. Credit limits exceeding \$2,000,000 per month are not granted to non-investment grade counterparties unless the Company receives either i) a parental guarantee from an investment grade parent; or ii) an irrevocable letter of credit for two months revenue. The Company has not previously experienced any material credit losses on the collection of accounts receivable. Of the Company's revenue for the year ended December 31, 2025, approximately 33% was received from two companies (22% and 11%) (December 31, 2024 –26% was received from two companies 14% and 12%). Of the Company's accounts receivable at December 31, 2025, there were three companies that had a receivable balance over 10% (December 31, 2024 two companies that had a receivable balance over 10%). Maximum exposure to credit risk is represented by the carrying amount on the balance sheet. There are no material financial assets that the Company considers past due and no accounts have been written off.

The Company's accounts receivable was aged as follows at December 31, 2025:

	December 31, 2025	December 31, 2024
Current (less than 30 days)	158,704	136,539
31-60 days	822	1,069
61-90 days	504	1,031
Over 90 days	3,840	8,922
	163,870	147,561

The Company may be exposed to certain losses in the event of non-performance by counterparties to commodity price contracts. The Company mitigates this risk by entering into transactions with counterparties that have investment grade credit ratings.

Counterparties to financial instruments expose the Company to credit losses in the event of non-performance. Counterparties for derivative instrument transactions are limited to high credit-quality financial institutions, which are all members of our syndicated credit facility.

The Company assesses quarterly if there should be any impairment of financial assets. At December 31, 2025 and 2024, there was no impairment of any of the financial assets of the Company.

Liquidity risk

Liquidity risk includes the risk that, as a result of operational liquidity requirements:

- The Company will not have sufficient funds to settle a transaction on the due date;
- The Company will be forced to sell financial assets at a value which is less than what they are worth; or
- The Company may be unable to settle or recover a financial asset at all.

The Company's operating cash requirements, including amounts projected to complete our existing capital expenditure program, are continuously monitored, and adjusted as input variables change. These variables include, but are not limited to, available bank lines, oil and natural gas production from existing wells, results from new wells drilled, commodity prices, cost overruns on capital projects and changes to government regulations relating to prices, taxes, royalties, land tenure, allowable production and availability of markets. As these variables change, liquidity risks may necessitate the need for the Company to conduct equity issues, obtain debt financing, alter capital spending or change dividend levels.

The following are the contractual maturities of financial liabilities as at December 31, 2025:

	< 1 Year	1-2 Years	3-5 Years	Thereafter
Accounts payable and accrued liabilities	192,810	-	-	-
Dividends payable	22,368	-	-	-
Income tax payable	32,010	-	-	-
Current portion of decommissioning provision	13,000			
Long-term debt ⁽¹⁾	-	-	690,000	-
Secured senior notes	100,000	155,000	160,000	75,000

(1) Revolving credit facility (see Note 4)

Capital disclosures

The Company's objectives when managing capital are: (i) to maintain a flexible capital structure, which optimizes the cost of capital at acceptable risk; and (ii) to maintain investor, creditor, and market confidence to sustain the future development of the business.

The Company manages its capital structure and adjusts it in light of changes in economic conditions and the risk characteristics of its underlying assets. The Company considers its capital structure to include equity, debt and working capital. To maintain or adjust the capital structure, the Company may from time to time, issue common shares, raise debt, adjust its capital spending or change dividends paid to manage its current and projected debt levels. The Company monitors capital based on the following measures: current and projected debt to earnings before interest, taxes, depreciation, depletion and impairment ("EBITDA") ratios, payout ratios and net debt levels. To facilitate the management of these ratios, the Company prepares annual budgets, which are updated depending on varying factors such as general market conditions and successful capital deployment. Currently, all ratios are within acceptable parameters. The annual budget is approved by the Board of Directors.

There were no changes in the Company's approach to capital management from the previous year.

	December 31 2025	December 31 2024
Equity	2,851,734	2,696,329
Long-term debt	1,074,273	1,295,238
Working capital deficit (surplus)	5,613	(124,908)
	3,931,620	3,866,659

14. Changes in non-cash working capital

	December 31 2025	December 31 2024
Change in current assets and liabilities		
Accounts receivable	(16,309)	14,174
Prepaid expense and other	11,497	7,974
Accounts payable and accrued liabilities	32,756	(11,707)
Income tax payable	11,961	(2,985)
Deferred other income	4,731	-
	44,636	7,456
Relating to operating activities	25,175	(16,699)
Relating to investing activities	19,461	24,155

15. Related party transactions

Certain directors of Peyto are considered to have significant influence over other reporting entities that Peyto engages in transactions with. Such services are provided in the normal course of business and at market rates. These directors are not involved in the day to day operational decision making of the Company or the related entities. The dollar value of the transactions between Peyto and the related reporting entities is summarized below:

Expense (Income)		Accounts Payable (Accounts Receivable)	
Year ended December 31		As at December 31	
2025	2024	2025	2024
(693)	1,952	32	6

The Company has determined that the key management personnel consists of key employees, officers and directors. In addition to the salaries and directors' fees paid to these individuals, the Company also provides compensation in the form of stock options and reserved based bonus to some of these individuals. Compensation expense of \$3.0 million is included in general and administrative expenses, \$7.3 million in stock-based compensation expense and \$9.0 million in performance-based compensation expense relating to key management personnel for the year 2025 (2024 - \$2.2 million is included in general and administrative expenses, \$6.5 million in stock-based compensation expense and \$6.5 million in performance-based compensation expense relating to key management personnel).

16. Commitments and Contingencies

In addition to those recorded on the Company's balance sheet, the following is a summary of Peyto's contractual obligations and commitments as at December 31, 2025

	2026	2027	2028	2029	2030	Thereafter
Interest payments ⁽¹⁾	20,926	20,743	16,937	14,565	13,703	16,914
Transportation commitments	117,986	94,880	61,907	45,484	39,502	397,471
Operating leases	2,429	2,436	2,438	2,539	2,569	2,884
Methanol	6,909	-	-	-	-	-
Total	148,250	118,059	81,282	62,588	55,774	417,269

⁽¹⁾ Fixed interest payments on senior secured notes

The Company may be involved in litigation and disputes arising in the normal course of operations. Management is of the opinion that any potential litigation will not have a material adverse impact on Peyto's financial position or results of operations at December 31, 2025.
