

PEYTO'S MARKETING

Gas Hedging and Diversification Strategy Moderates Volatility

2026E Natural Gas Marketing

- For 2026, Peyto has fixed 500 MMcf/d of its gas volumes while the remaining volumes “float” at the hubs shown on the map
- Diversification reduces single market risk. Empress exposure minimizes risk to a potential disconnection in the AECO market that can dislocate, especially in summer.

Gas Price⁽¹⁾ (\$/mcf)

- Peyto has beat the AECO monthly price in 15 of the last 20 years using a methodical hedging and diversification strategy
- Since 2003, through to the end of Q2-2026, we have realized a cumulative gain of **\$816MM** from all our hedging activities
- Hedging and diversification gains are expected through 2026 and 2027 based on current strip pricing⁽¹⁾**

(1) Forecasted prices are based on July 31, 2026 strip price forecast

GAS DIVERSIFICATION | PREMIUM MARKETS

Exposure to premium North American demand hubs

- Henry Hub – Major trading hub in the Southern US
- Dawn/Parkway – Eastern Canadian markets
- Ventura and Chicago – Mid-west & Northeastern US markets
- Emerson 2 & Empress – additional flexibility to move gas out of the AECO market and expose to markets above
- Malin – Californian market

Peyto's gas diversification portfolio reduces the risk of selling into a single market and exposes gas sales to demand markets that can be more influenced by seasonal changes.

Exposure to the local Power Market in Alberta

- Direct natural gas supply to Kinetikor's Cascade Power Generation Plant southwest of Peyto's Edson Gas Plant
 - Supply agreement came into effect August 31st, 2024
 - 60,000 GJ/d for a 15-year term
 - Peyto receives a gas price correlated to the operator's realized monthly power price which yields a price of approximately \$10/GJ at \$150/MWh and approximately \$3.75/GJ at \$60/MWh

NEW: Exposure to European natural gas prices through the recently signed supply agreement with Centrica Energy

- 50,000 MMBtu/d for a 10-year term starting in 2029
- Title Transfer Facility "TTF Netback deal" with the gas delivered to NIT "AECO"

GAS DIVERSIFICATION | LNG-LINKED PRICING

On June 2nd, 2026 Peyto announced the signing of a long-term natural gas supply agreement with Centrica Energy

- 10-year term commencing in 2029
- Delivery of 50,000 MMBtu/d to AECO (NIT)
- Netback deal with pricing exposure to the European Title Transfer Facility (TTF) adjusted for transportation costs, liquefaction, shipping, and regasification

GAS MARKETING

Future Market Diversification and Gas Price Protection

Peyto has used financial basis and physical transportation agreements between AECO and other hubs to gain market diversification and exposure to demand regions. This reduces risk of exposure to a single market. **Peyto's non-AECO markets represent 40-50% of future production.**

505 MMcf/d fixed at \$4.02/Mcf for Q3–Q4 2026
404 MMcf/d fixed at \$3.31/Mcf for 2027
 Total fixed-price volume represent **3%** of Peyto's proved plus probable gas reserves

- Average fixed price volumes include all fixed price financial and physical contracts, foreign exchange forward contracts, fuel deduction of ~2% and all market diversification costs. USD contracts are converted at 1.39CAD/USD
- Empress service allows Peyto to diversify from the AECO market for future basis deals and physical contracts. Peyto incurs transportation costs of ~\$0.22/GJ to get to Empress
- Assumes average heating value of approximately 1.15 GJ/mcf for Peyto's gas
- The Centrica TTF contract is expected to commence some time in 2029.

GAS MARKETING | REALIZED PRICES

Peyto embarked upon a diversification strategy ~5 years ago. This has complimented our hedging program to yield superior prices over AECO.

Natural Gas Price

- (1) AECO 7A monthly benchmark has been converted to \$/Mcf at Peyto's average heat content of 1.15 GJ/Mcf.
 (2) Diversification value represents the difference between Peyto's realized natural gas price (before hedging) and the AECO 7A monthly benchmark price net of costs to get to the market.

GAS MARKETING

Fixed Price Gas Contracts

Peyto uses a dollar cost averaging approach to smooth out the volatility in future prices by forward selling smaller blocks of production. Fixed price swaps give price certainty.

- Henry Hub, Malin, Dawn and Chicago volumes are sold using physical basis deals from AECO and Empress and are priced on the respective indices less the hub basis shown above and fuel of ~ 2%
- Ventura volumes are priced on the Ventura index less transportation, marketing and fuel for total deductions of ~ \$US1.13/MMBtu
- Emerson 2 volumes are priced on the Emerson 2 index less transport and fuel of ~4%.
- Dawn/Parkway volumes are priced on the Union Dawn/Parkway indices, less transport and fuel of ~6%.
- Peyto's realized price under the Cascade gas supply agreement is indexed to Cascade Power's realized power price.
- Natural gas for the Centrica Energy TTF contract is delivered to NIT (AECO) and priced against the Dutch TTF benchmark, less deductions. Contract expected to commence sometime in 2029.

NGL MARKETING

Fixed Price Contracts

Peyto uses swaps and costless collars to secure liquids revenue as well.
